General Merchandise.  
Best Goods at Lowest Prices  
Finlayson, - - Minnesota.

**Willow River House.**  
MIKE HAWLEY, Manager.  
Willow River, - Minn.

**Pine City Restaurant and Bakery.**

More of our farmers are putting in wheat than ever before in our promising town, which will be equal to true as to increased acreage devoted to wheat this year, as against any in the past. The same will apply to oats, corn, potatoes, vegetables, etc., wild and tame fruit gardens, as well as by their numerous aids, composed of the dads, the misses, the bubs and kids. Long live Pookanna!

Miss Kothera, now residing in this district with her parents, has been engaged to teach the new school to be opened in the Wilson, Ellison and Lewis locality. This school which is the fourth in district No. 22, will be opened in a few days. Miss Kothera is no novice at school teaching. She is well qualified—has taught in our district before, and is well liked. She has a way of teaching her quill so prettily that it would turn the eyes of a Spencerian professor green with envy.

Mr. Wallace Butler who has taught a six month school at the head of the lake closed the term last Friday with exercises, distribution of cards, etc. This was Mr. Butler's first experience at teaching. He has done well, maintained as good order as could be expected, and the children have had an all-winter school. But we have no school here during the summer, as six months is school

**A Word to the Wise Is Sufficient,**

And all we need to say is that if you desire courteous treatment, add to buy your goods at a reasonable price.

**WE are the people.**

Cash paid for Potatoes.

**GILMAN & MATSON,**  
ROCK CREEK, MINN.

## CORRESPONDENCE

Gleaned for our Readers From All Sections of the County.

**MEADOW LAWN.**  
The roads are improving rapidly the past few days.  
Miss Anna Smith, from Pine City, is visiting her parents here this week.

Emer Smith will leave here next week for Pierce county, Wis., where he will spend the summer.

Mr. Kline and family, from Bergen, have moved here, and are erecting a house near A. Hathaway's.

J. F. Holler is booming his logs on Cross lake this week, and will run them down to the mill at Pine City Thursday, if the wind does not prevent it.

Born—To the wife of A. Hathaway, on Tuesday morning, a son. Also does not recognize anybody now. Mother and child are getting along nicely.

**HISTORICAL POKEGAMA.**  
Where each and all forget their cares, And look on high for glory, With bounding hearts they climb the stairs Of the observatory.

The early spring chicken came to our town several weeks ago, and is already on his legs that will take a sneak to the nest before long.

Messrs. Worthington and Fairbanks, their son-in-law, who occupied the Lambert farm on Mission Creek for the last two years, departed on Wednesday, the 13th inst., in a wagon-draw-prairie-schooler route, for Iowa or elsewhere.

Miss Costello, of Mission Creek, is engaged by our school board to teach a three month term at the Amnush school, and commenced on Monday, April 11th. Miss Costello is an excellent school teacher. She has taught in our district before, and is well liked.

Miss Maggie Heywood, of Pine City, is getting along nicely with her school near Jarvis bay, on the west side of the lake, in what is known as the Bergman, Quinn and Peters locality. Miss Heywood boards at Mr. Bergman's hotel, on the beautiful banks of Pookanna.

More roads are wanted, as is evidenced by the presentation of a carefully drawn petition duly signed by John A. Anderson and others, asking for a road from Mr. Anderson's place to intersect with the west shore road—distance one mile, and which will make an outlet for several others.

More of our farmers are putting in wheat than ever before in our promising town, which will be equal to true as to increased acreage devoted to wheat this year, as against any in the past. The same will apply to oats, corn, potatoes, vegetables, etc., wild and tame fruit gardens, as well as by their numerous aids, composed of the dads, the misses, the bubs and kids. Long live Pookanna!

Miss Kothera, now residing in this district with her parents, has been engaged to teach the new school to be opened in the Wilson, Ellison and Lewis locality. This school which is the fourth in district No. 22, will be opened in a few days. Miss Kothera is no novice at school teaching. She is well qualified—has taught in our district before, and is well liked. She has a way of teaching her quill so prettily that it would turn the eyes of a Spencerian professor green with envy.

Mr. Wallace Butler who has taught a six month school at the head of the lake closed the term last Friday with exercises, distribution of cards, etc. This was Mr. Butler's first experience at teaching. He has done well, maintained as good order as could be expected, and the children have had an all-winter school. But we have no school here during the summer, as six months is school

is about all we can attempt to maintain in four school houses during the year. District No. 22, in the town of Pookanna, is right to the front on the school question. Free text books for the children—just think of it, and don't forget to applaud District No. 22.

## WASHINGTON LETTER.

From Our Regular Correspondent.

WASHINGTON, April 18, 1898. President McKinley did not fretting because Congress took a whole week to act upon his message on armed intervention in Cuba, while the general expectation was that the business would be done in two days at the outside. He knows what responsibility is. That the delay has been beneficial to this government may be seen from the following language, used by a member of the cabinet to an impatient friend who was repeating the argument used on all sides against the apparent tardiness both of congress and the President.

"Nobody has the remotest idea how unprepared we were when congress made the appropriation of \$50,000,000. As a matter of fact, there were not five rounds of ammunition in a fortified place in the country, and the ships did not have ammunition enough to fight anything. We were simply ready in an amateurish manner. The president was shocked when he learned the full facts. A knowledge of these facts had as much to do with making him cautious as a desire to avoid war. Had this country been forced into war three weeks ago, we might have gotten the worst of things for awhile. I think we are now about ready, and can give an account of ourselves." These words should be considered by the hair-trigger individuals who blame the President for not rushing into war weeks ago.

Just when hostilities will begin is still a matter of some doubt, altho it must necessarily be soon. Nothing official has been said about the program that will be followed after the Cuban resolution reaches the President, but the statement is made upon good authority that the president will make a demand upon Spain to evacuate Cuba, and will grant one or two days for the answer. This will be largely for form's sake, as it is already practically certain that Spain will refuse, and will probably accompany the refusal with a message of defiance. Then the naval forces of the country will be put in motion, and the first steps taken towards driving the Spaniards out of Cuba, while the troops now being hurried as fast as steam can carry them towards convenient points of embarkation, will be got in shape to be rushed over to Cuba just as soon as the fleet has captured a desirable location on the island for them to be landed. Once landed the war will be pushed to a speedy and victorious end both on land and on water.

Naval officials smile at sensational predictions of damage that will be done to our commerce by Spanish privateers. Instead of having any fears on that score, they think that we shall have so many fast and formidable auxiliary cruisers on the seas that any Spanish privateer that gets far from home will be extremely fortunate if it escapes destruction or capture by some of them. The Spanish are not ignorant of our preparation in this line, and they are not likely to go as extensively into the privateering business as our sensationalists have made them go in imagination.

The massing of practically three-fourths of the regular army—about 13,000 men—at Chickamauga Park, New Orleans, Mobile and Tampa, is the first open move towards the military occupation of Cuba. The plan of campaign is all made out, but so well has the secret been kept that no person not an official, can positively say whether these regulars will have militia assistance in their invasion of Cuba or not. The general impression is, however, that they will, and that a call for volunteers from the militia will be issued by President McKinley within 48 hours of the moment his signature

is attached to the joint resolution authorizing forcible intervention in Cuba. It is understood, but not officially, that the President has decided to adopt the plan of calling for volunteer militia men rather than one calling upon each state to furnish its quota of the number of men desired, and that the organizations which volunteer first are to be accepted, regardless of the states from which they come. According to estimates made by the War Department officials, more than 2,000,000 volunteers have been offered to the government, which is about twenty times more men than anyone expects to be needed.

Just after a meeting of the cabinet, at which the probability of the materialization of the forcible European intervention upon which Spain relies to save it from a terrible thrashing, was referred to in a discussion, a member was asked what would be the probable result of an attempt on the part of the six great European powers to force the United States to withdraw its demand that Spain evacuate Cuba. "Fighting, and plenty of it," was his prompt reply. "That represents the position of the administration to a dot. It proposes to drive Spain out of Cuba, regardless of whether it has to fight Spain alone, or the allied powers. This is very well known to the European ambassadors and ministers at Washington, unofficially, and they have only to give the President an opportunity, by presenting a note either threatening or announcing European intervention, to be made officially acquainted with it."

## LIST OF PATENTS

Granted to Minnesota inventors this week. Reported by C. A. Snow & Co., patent Attorneys, Washington, D. C.

Martin B. Donaldson, Duluth, artificial limb; Scott F. Evans, Minneapolis, dumping platform.

For copy of any of above patents, send 10 cents and date of this paper to C. A. Snow, Washington, D. C.

With all due deference to General Lee, it is but just to the President to say that Lee only carried out the wishes and policy of the administration, as it was his sworn duty to do. Any other able and fearless American would have done the same.—Wassena Journal.

Uncle Sam has been buying ships wherever he could get them, and fitting them for war purposes. Two of them, unfortunately, have been found unseaworthy, and may have to be sold to the Alaska trade.—Taylors Falls Journal.

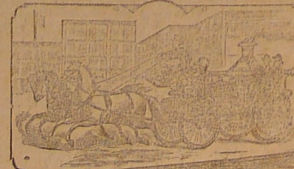

## "Dr. Fenner's Blood and Liver Remedy and Nervine Tonic."

This famous remedy, by a famous physician, has the virtue of curing all ailments of the blood, and has been used in all cases of debility, nervousness, impure blood, etc. The "Blood and Liver Remedy" is impossible to find it equal. The first bottle is guaranteed to give satisfaction by Breckenridge.

—While passing the store of N. A. Crittenden, opposite the court house, stop and see the display of ladies' shirt waists in his window. He has the finest assortment that has ever been brought to this place or in fact north of St. Paul, and he is selling them at prices that defy competition. When in need of clothing, shoes, or anything in the gent's furnishing line give him a call. He will suit you in both goods and prices.

—WARNING—Herman Sauray, who was working for us during the past winter on Willow River, lost his time check near Nickerson, and any one finding same will please return to us as same will not be paid by us, excepting to Mr. Sauray. Time bill is dated March 12th, 1898, showing balance due \$25.00 issued by Saxon & Co., Geo. E. McCormick, clerk. SEXTON & CO. Stillwater, Minn. March 22, 1898.

"Your wife is a jewel." Keep her "bright and shining." Now's the time—"springtime." Give her Rocky mountain Tea, make's the family well. Woman's best friend. For sale by J. Y. Breckenridge, Pine City.

## Fire Insurance

Written in any part of Pine County, and only in the Best Companies.

## CALL,

Or write for rates, etc., to

**J. Y. BRECKENRIDGE,**  
DRUG STORE.

Main Street, Pine City, Minnesota.

## KILLING WORMS IN FLOWER POTS

A strong mixture of ground mustard in water, applied to the surface. This brings them to the surface, where they can then be killed.

When you are in need of

## FLOUR,

We also make and have on hand all kinds of sausages.

PINE COUNTY PIONEER

20 C. GOTTR Editor and Prop.

TERMS: \$1.00 A YEAR IN ADVANCE

Published at the Pine City Post Office as Second Class Matter.

PINE CITY MINN., APRIL 22, 1898.

PASSING THE PATCH.

During the past three or four years, when the country was in the midst of the financial depression which caused so much suffering...

At the meeting of the Republican State Central committee held in St. Paul this week, a call was issued for a State Convention to be held on the 30th of June.

The Farm and Garden Aid Association, which has been the head and front of the relief work for two seasons, closed its labors last year with satisfaction to the members and to the beneficiaries.

Mayor Pratt, who has been particularly active in the work, states that only one person has spoken to him this year, about a garden plot.

The situation this year with reference to the succession not only one but to both United States senatorships in Minnesota is something out of the ordinary.

UNEFT TAXES.

A speaker in congress referred to "the indirect and almost stealthy manner in which a large part of our taxes are exacted."

Of course that is humbug. If a man earns \$1,000 a year and pays \$100 in the tax-enhanced cost of his necessary purchases...

The Times' conclusions are all right. The difficulty lies with the premises. Any school boy who can sit down and take a pencil and paper and figure up the cost of a load of hay, can figure out the falsity of the premises assumed by the Times.

before a conclusion can be reached satisfactory to the free trader. The theory of tariff legislation in America teaches that a tariff levied on a principle of protection can never be a tax, while a revenue, or horizontal tariff must inevitably be a tax.

The action of the Republican State Central committee in deciding to embrace in their call for a state convention the election of delegates for the purpose of expressing the choice of the Republican party for United States Senator in 1898...

The increase in the number of delegates Pine county will be entitled to in the Republican state convention this year, speaks volumes for our growth.

On Sunday evening Fritz Jonston asked Hilda Nelson and Anna Rolander two young ladies who work at the Pioneer house, to take a buggy ride.

They then ran about a half a mile further when one of the horses fell and got tangled up in the harness, where Fritz and the young ladies found them on their way to town.

The situation this year with reference to the succession not only one but to both United States senatorships in Minnesota is something out of the ordinary.

Special Notice to the A. O. U. W. Mrs. Ella Mantor, of Wilmar, the State Organizer of the Degree of Honor, will be in this place next Monday, and will give an address in the hall of the Pioneer house, at 7:45 in the evening.

The Princeton Union says whether or not he is nominated for governor, Judge Collins may feel that he is being highly complimented by the press of the state in his capacity as a candidate for governor.

TAX JUDGMENT SALE.

Pursuant to a Real Estate Tax Judgment of the District Court, in the County of Pine, State of Minnesota, entered the twenty-first (21st) day of March, A. D. 1898...

First publication April 22, 1898. Order to Examine Accounts, Etc. County of Pine, State of Minnesota.

On reading and filing the petition of Otto Kowalski, deceased, representing among other things, that he has fully administered said estate and has in a full and proper manner discharged all his duties...

By the Court. E. VEENHOVEN, Judge of Probate.

LANDS FOR SALE.

The following lands are for sale on four acres, viz: West half (W 1/2) of southeast quarter (SE 1/4) section 4, T. 10 N., R. 10 W., Township forty (40), Range twenty-two (22).

Methodist Episcopal - Services every Sunday morning at 10:00, evening at 7:30. Everybody invited.

Pine City Directory. Churches. Methodist Episcopal - Services every Sunday morning at 10:00, evening at 7:30.

County Directory. County Officers. Auditor - J. H. G. Greer, Treasurer - J. H. G. Greer, Sheriff - J. H. G. Greer.

Table of Through Trains, Effective October 3, 1897. Columns include Train Name, Direction, and Schedule.

Saint Paul and Duluth Railroad. Time Table of Through Trains, Effective October 3, 1897. Includes detailed schedule for various routes.

CHIPS AND SHAVINGS.

Chips Picked up Around Town and Shavings Clipped From Our Exchange.

Try whole wheat flour, for sale by all merchants.

The flour mills are paying \$1.00 a bushel for wheat.

One-hundred-bar box of Lenox soap for \$2.75, at F. J. Rybak's.

Don't forget your Fire Insurance.

Carlson, of Rush City is bound not to be beaten on prices. See his ad.

Wm. Knight, of Rock Creek, was in town on Wednesday, on business.

The rain and snow on Monday proved of great benefit to growing grains.

MONEY TO LOAN. In small sums on improved farm lands. Apply at this office.

Fred Wright has erected a fine large barn on his farm two miles south of town.

Farm wanted—Send full particulars, price etc., at once. A. H. Russel, Akron, ..

Seeding is about completed in this section, the acreage being greater than ever before.

For Sale—A complete set of Chambers' Encyclopaedia, cheap. Enquire at this office.

The snow on Monday night was as good as a rain for the farmers, and made them happy.

Try "Whole Wheat Flour."

Is something new—manufactured by the Pine City Roller mills.

Fresh roasted peanuts, all kinds of fruits in their season, nuts and candies, at Jos. Veverka's.

Capt. Webber contemplates purchasing a new whistle for the Nyroca. He will use the old one for a watch charm.

Services in the Presbyterian church next Sunday, April 24 as usual. Morning 10:30, evening 7:30. Everybody invited.

Wanted, no buy out, two, or three row boats in good condition. Apply to Maj. Wm. Cooley, Pine City, or at this office.

Miss Alvina and Emily Brandes returned home on Thursday of last week from a few weeks' visit in Stillwater and St. Paul.

For Sale—A good farm of 227 acres within one mile of this village. A snap for some one—Enquire at this office for particulars.

"Nyroca," the new oil launch of A. E. Webber, is a beauty, and runs well, looking fine when it is cutting the waters of the Snake.

W. G. Royer, of Withie, Wis., J. T. Barber, of Eau Claire, and P. Terris, of Winona, were in attendance at Court Wednesday.

It will pay you to call at the store of G. A. Carlson in Rush City. Examine goods and ask for prices. He sells as low as the lowest.

Don't miss that great opportunity, but come down and take a share in our great bargains.

B. H. Harris, Rush City.

Mrs. Mary Murphy, mother of Mrs. Amos Gambel, is quite sick at present, but at last accounts she is some better. Mrs. Murphy is 91 years of age.

A. E. Webber launched his new steam yacht, the "Nyroca," the latter part of last week, and is now running regularly between here and Lake Pokegama.

We are pained to state that Edward Jeanner is quite sick at his residence three miles southwest of town, but at last reports he is noticeably improving.

The first of the week Capt. Webber moved the household effects of another settler up to the west shore of Pokegama lake, transporting the goods on his new steamer.

For overworked men, delicate women, sickly children, Rocky Mountain Tea is the greatest blessing known. Keeps the whole family well—if taken this month. For sale by J. Y. Breckenridge.

Will Buttrick, St. Paul & Duluth station agent and operator at Maultowa, was a Pine City visitor Thursday. Will's many friends in this place are always pleased to see him.

It's a woman's duty to "look her best." All women cannot be "beautiful," yet all can be "mighty good-looking" if they'll only take Rocky Mountain Tea.

For sale by J. Y. Breckenridge, Pine City.

Don't forget the dance to be given in Conroy's hall this evening. The best of music has been engaged and a royal good time is guaranteed those that attend.

Mrs. McDonald returned the first of the week from Hudson, Wis., where she has been visiting for the past week. She reports everything in excellent condition in her old home.

Work on Radley's cellar is completed, and the stone work will be commenced at once. When this building is completed it will be a great addition to the business portion of the village.

J. C. Miller has improved the property recently purchased by him from Adam Bickerman, known as the Mark Bickerman property, by adding a new porch and otherwise improving the building.

Mr. A. Pennington has added a new piano to his household effects. This makes somewhere in the neighborhood of twenty-five pianos now in our village. This is not bad for a town of 1,000 inhabitants.

The most profitable account a man can have on his books—this month—is expense, \$1.00, three packages Rocky Mountain Tea. Saved \$1,000.00, profit, \$999.00 and good health. For sale by J. Y. Breckenridge.

Mat Underwood, of Muskegon, Mich., was in the county seat the first of the week, getting out his second papers. Matt formerly lived at Hinckley, and is well known around here. He is a son-in-law of Dennis Breanna, of Hinckley.

Mr. I. A. Collins, proprietor of the Pioneer house, informs us that he will put in his hotel the acetylene gas that was on exhibition at the drug store last week. Wherever this gas has been used it has given the best of satisfaction.

Services in the M. E. Church on Sunday next as follows: At 10:30 a. m., subject, "A Christian's Duty." Evening, at 7:45, subject, "The Conquering Power of Truth." Young People's meeting at 7 o'clock. Everybody invited to these services.

M. E. Ellismore, who had charge of the office for the Brennan Lumber Co., at Hinckley, before the fire in 1884, but who has been at work for the Rust-Owen Lumber Co., of Eau Claire, since that time, was a Pine City visitor the first of the week.

John Maloney, of Sandstone, who has been at work for the G. N. Ry., at that place ever since he returned from the west, was a county seat caller last week and this, he being called as a witness in the suit of the Brennan Lumber Co. vs. the G. N. R. R. Co.

Last Wednesday was Fair day and was well represented by farmers and buyers from all parts of the county, together with a large crowd from Brook Park, who went home with wagon loads of provisions, flour, feed, pigs, and in fact, a little of everything.

J. S. Owen, of Eau Claire, Wis., was a witness on Wednesday on the case of the Brennan Lumber Co. vs. the Great Northern railway. Mr. Owen is a member of the Rust-Owen Lumber Co., of Eau Claire, and was quite well known at Hinckley before the fire.

All the citizens of this village and vicinity who are interested in having a band organization, are requested to meet at the Livery barn on Sunday afternoon April 24, at 3 o'clock to talk the matter up and see what can be done toward the organization of a brass band.

W. G. Ewing, of Clinton, Iowa, was called as a witness in the case of the Brennan Lumber Co. vs. the G. N. Ry., on Wednesday. Mr. Ewing is an old Hinckleyite, and his friends are pleased to see him still following up the lumber business at Clinton.

John Cathcart, of Ashland, Wis., and J. C. Bell, of Eau Claire, have been in town for the past two weeks as witnesses in the case of the Brennan Lumber Co. vs. the G. N. Ry. They are both looking well, and the past two or three years have not seemed to make much of a change in them.

J. J. Murray commenced the stone work on his new building on Main street on Thursday, and it will be pushed forward as rapidly as possible. Levi Ardner will have charge of the carpenter work, and Mr. Weigender the stone and brick work. When the structure is completed Mr. Murray will have a neat and attractive building, and one of the finest tenorial parlors on the line of the St. Paul & Duluth road.

H. D. Davis, formerly general manager of the Brennan Lumber Co., at Hinckley, but now of Eau Claire, has been a Pine City visitor for the past three or four weeks, being one of the parties interested in the case now being tried in the district court. Mr. Davis has a great many old friends in this place, who are always glad to see him.

We were glad to meet our old friend Lester H. Clow, of Pierre, S. D., on Wednesday. Mr. Clow had charge of the mill and yard for the Brennan Lumber Co. for about a year before the fire of 1884, and was the last person to leave the lumber yard on that memorable occasion. Mr. Clow went to work for the Rust-Owen Lumber Co. immediately after the fire, at Pierre, where he has been at work ever since. Mr. Clow's many friends are glad to see him looking so well.

On Saturday evening Butler's Musical Comedy Co., showed to a large and appreciative audience in Pioneer house hall. The show was very good, especially the dancing of Messrs. Butler and Perrey, and the sleight of hand performance by Geo. Gardner, one of his best tricks being what he calls his egg-bag trick which he performed down in the audience in the presence of the people, and he is so clever at it that it is impossible to detect him. He informed the audience that there were only four magicians in the world that did this trick. The company will be here again tonight and will play "Wealth Out-rivalled by Wit," this play is one of the strongest in their repertoire, and those who want to have a good hearty laugh should be sure and attend. Mr. Butler will dance the pedestal dance at this time, and the other specialties will all be different from what they were on Saturday evening. They will also play

again tomorrow night, and the Piazza benefits for them full houses at both performances.

John Sexton has raked up the old leaves and grass in the park and it now presents a clean appearance. He has also had a crew of men and boys at work raking up the rubbish that accumulated during the winter on the business streets. Citizens living on the other streets should rake up and remove the rubbish from in front of their property, so that when strangers come here they will find this the cleanest as well as the most beautiful village on the line of the St. Paul & Duluth railroad.

Work on F. A. Hodge's new residence is about completed, and J. E. Stone is pushing the work of grading rapidly, and in about two weeks expects to have the lots graded and seeded, and the shores of the lake and river faced with rock, to keep the high water from washing the soil away. A large force of men and teams are employed doing the grading and drawing the rock. When this residence is completed it will no doubt be the handsomest residence on the line of the Duluth road.

The plaintiffs in the suit of the Brennan Lumber Co. vs. the Great Northern Railroad had all their witnesses examined on Wednesday, and rested their case. The defense began examining their witnesses on Thursday morning, and will not get through until some time next week, as they have something over thirty to examine. This is the greatest case that has ever been tried in this county, and it is seldom that a case involving so much money is tried in any county.

Horses for Sale. I have just purchased a car-load of mares from a Lake City stock farm, which I will sell on reasonable terms. A. M. SHALLICE, Rush City.

BARNEY H. HARRIS, Rush City, Minn.

If you have lived in this vicinity long enough to become thoroughly acquainted, you won't think of buying any article before looking at our assortment. If a new-comer or a neighbor, they will tell you what nearly every one knows, that we are head-quarters of THE BEST GOODS AT THE LOWEST PRICES.

Advertisement for Barney H. Harris listing various goods like Dry Goods, Clothing, Wash Goods, Boys' Suits, Hats and Caps, Capes and Jackets, and Shoes with prices.

We take pride in posting our customers of what goods are worth, and showing them how to save money.

BARNEY H. HARRIS, RUSH CITY, MINN.

J. A. Franta, Manufacturer of Harness,

## FARM AND GARDEN.

### EXTRACTED HONEY.

A Pennsylvania Beekeeper Tells How to Prepare a Really Pure and Wholesome Article.

Comb honey is an ornament and generally a luxury. Extracted honey is a plain food and can be enjoyed by the masses. It can be prepared more cheaply and in larger quantity than the comb. If it is intelligently produced and properly handled it is preferable to comb honey simply as a food or table sauce, though not ornamental. There is so much adulterated glucose mixture on the market sold as extracted honey that the producer of a good article cannot compete with it in price. Under the circumstances many of our producers of extracted honey took a short cut and extracted "green" honey and ripened it artificially which produces a very inferior article. This poor honey and the adulterated mixtures have so demoralized the general market for extracted honey that if we wish to profitably produce fine flavored, well ripened extracted honey, we must make a local trade for it.

For some years I produced a limited quantity of extra fine extracted honey and sold it to local customers, and may prefer it to comb honey. It is gathered nearer, but they make it into honey. If we extract it before the bees have ripened it, making it into honey, it will be but little better than the glucose mixtures now so general on our market. What the bees do to the nectar I cannot best explain, but I do know that to have fine extracted honey that has ambrosial aroma that distinguishes it from all other sweets, we must allow the bees to ripen it fully in the hives before extracting.

My plan is to have plenty of comb and extracting supers and when one is filled I raise it up and empty one under it and repeat as often as is necessary. In this way my honey is fully ripened on the hive and the bees always have plenty of rooms and are not swarmed. By careful management not more than one-third to one-half is capped and that saves considerable unswarming, and also considerably less work for the bees. When the honey flows in I allow the lattice to ripen and then extract. It is hard work to throw out such heavy honey, but I was always paid for it thus far. While ordinary honey is selling for six to seven cents, I could sell mine for ten to twelve cents, and often did not have enough to meet the demand.—L. W. Lighty, in American Gardener.

### NOT A PERFECT FOOD.

Sunflower Seed is Not as Good as Egg Produce as Some Would Have You Believe.

A few, who seem to be interested for some reason in booming sunflower seed as poultry feed, are persistently claiming everything good that is produced. It is not a good feed for this purpose, and analysis shows that it is essentially a fattening food and not such one as would promote the production of eggs if fed in large quantities.

That sunflower seed is excellent in moderate quantities no one well posted will deny. It is one of the best feeds that can be given to the fowls in the fall when the fowls are moulting, and as it happens to ripen about that time it comes at a season when it is most useful.

At other times in the year an occasional feed of sunflower seed answers in the place of oil meal and similar feeds, and makes a variety which laying hens like. These seeds may be produced so cheaply that every poultry keeper should raise a supply for his own use, as they do well in odd corners, and grow under very little encouragement.

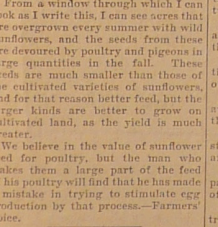

From a window through which I can look as I write this, I can see acres that are overgrown every summer with wild sunflowers, and the seeds from these are devoured by the fowls in large quantities in the fall. These seeds are much smaller than those of the cultivated varieties of sunflowers, and for that reason are better to grow on larger knolls are better to grow on cultivated land, as the yield is much greater.

We believe in the value of sunflower seed for poultry, but the man who makes them a large part of the feed of his poultry will find that he has made a mistake in trying to stimulate egg production by that process.—Farmers' Voice.

### SAFE PICKET FENCE.

It is Made Hen-Flight by Wire Netting stretched at the Top of the Wood Fencing.

On many farms the hens could be kept free range if the garden fence were a sufficient barrier to the fowls. The net fencing which is now being marketed shows a picket fence with a picket extending upward for 15 inches

HEN-TIGHT PICKET FENCE.

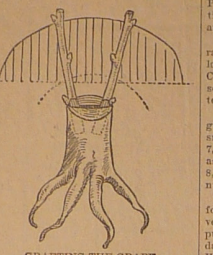

every 12 feet. To these extended ends of the pickets are stretched the netting, a strip of wire netting, as shown in the sketch. In the prominence of the pickets the fowls do not clearly notice the netting until they are against it. After a few trials they will give up the attempt to fly over. Poultry yard fences can be constructed in this way, using poultry pickets, and being the only needed width of netting, according as the fowls are Brahmas, Plymouth Rocks or Leghorns.—Orange Judd Farmer.

## GRAFTING THE GRAPE.

It Should Be Done Just as the Birds Begin to Push in Stock in the Springs.

Provide a sharp hand-saw, pruning knife, or strong pocket-knife, a mallet, two-inch chisel, a half-inch cold chisel, or a strong blunt half-inch chisel, a spade, strong well-sharpened axe, or four-eyes cuttings of last season's growth of the varieties to be grafted, and a flat basket or berry-crate's carrying case, in which to carry the small tools and cuttings.

With the spade, clear away the soil around the collar of the vine, two or three inches below the surface. Saw off the vine horizontally about one inch below the surface. With the knife, or the board chisel, if sharp, pare away the rough surface left by the saw, then with the broad chisel, hit with the mallet, split the stock in the center, and where it will split down the straightest, until the chisel has entered an inch or thereabouts. With the knife, cut the lower end of the cutting to a uniformly tapering wedge, to match the taper of the cleft when opened with the chisel, leaving a bud at the base of the wedge, and that side of the wedge slightly thicker than the other. Insert the wedge of the cutting in the cleft, so that the bud will stand on a level

GRAFTING THE GRAPE. (Straight Dotted Line Shows Level of Soil, Curved Dotted Line Damp Soil and Upper Line Ground of Earth.)

with the top of the stock, and the scion should lean a little outward on the side of the stock to which it was inserted, so the growing layer between the bark and wood comes opposite to the growing layer in stock, and nearly parallel with the wedge of the cutting in the cleft. If the stock is small, one graft will do, but if one or one-half inch or more in diameter, then two—one on either side—should be inserted. Sometimes three or four scions are inserted in a very young stock, by making cross clefts. The cleft in the stock is held open with the narrow blunt chisel as a lever inserted in the cleft in the center of the stock.

After the cuttings are accurately and firmly set, press clean, damp soil carefully and firmly with the hands, all round and over the junction of the scion with the stock, to exclude the air. I never tie or wax my grafting of this kind, and succeed with about 90 per cent of the wax is not nearly so congenial to the soil as a piece of damp soil, and much less liable to start decay. Finally heap up the loose soil about the mouth of the cleft, and with the soil left at the top of the eye of soil at cut. This grafting in place should be done just as buds begin to push in stock in the spring. She knows the situation of every one so well that she could almost perform her work in the dark. It is very trying on the eyes, and only one thorough acquaintance with the situation could do it in a satisfactory manner. The object of color over the dots is that they may be more readily perceived by the eye. The eye is, however, merely a tiny drop of red was put in the center of the yellow splash, but as the black dot underneath shows through the yellow perfectly, the center of the red has been discontinued, which lessens the labor by half.

There are 525 lights on the Atlantic coast, beginning to count at the northern part of Newfoundland and continuing to the south shore of Venezuela. This includes those of the Gulf of Mexico and along the coast of the West Indies. On the Pacific coast there are only 33 lights. Thus it will be seen that Miss Scott puts on hundreds of thousands of her little yellow buds in a year's time, although she works part from nine a. m. to four p. m.—N. Y. Sun.

### TIMELY FARM NOTES.

The earlier in the fall that a weed is killed the better. They rob the soil of moisture and plant food.

A good yield and quality usually pays for itself, even with the cost of production even with the price. These seeds are much smaller than those of the cultivated varieties of sunflowers, and for that reason are better to grow on larger knolls are better to grow on cultivated land, as the yield is much greater.

We believe in the value of sunflower seed for poultry, but the man who makes them a large part of the feed of his poultry will find that he has made a mistake in trying to stimulate egg production by that process.—Farmers' Voice.

### SAFE PICKET FENCE.

When Hens are Droopy. When a hen is droopy, it does not mean that she must be treated with some remedy. Like human individuals, fowls are affected with droopiness in several ways, and the remedy is not the same. In the first place, a hen may be droopy because she is overworked, and the remedy is to give her a few days' rest. In the second place, a hen may be droopy because she is overfed, and the remedy is to reduce her feed. In the third place, a hen may be droopy because she is old, and the remedy is to cull her. In the fourth place, a hen may be droopy because she is sick, and the remedy is to consult a veterinarian.

## FOREIGN GOSSIP.

Jealousy of the first husband of the widow he had married drove a Frenchman to kill his wife and then himself recently in Paris.

A Welsh member of parliament has asked the government to secure free passage for non-unionists on the railroads of the United Kingdom.

Warsaw's proposed celebration of the hundredth birthday of Adam Mickiewicz, the great Polish poet, has been prohibited by the police.

Russia has ordered a 10,000 horse power ice breaker of the Armstrongs, to cost \$800,000. It will be ready in October and will be used to keep open navigation to St. Petersburg through the winter.

Benja fever has been added to the list of epidemics like hay fever and rose fever by a German doctor, who has christened his discovery "Pavianus." His cure for the disease is to keep away from beehives.

Villa Achillea at Corfu, which the empress of Austria has abandoned, is likely to be bought from her by the Emperor of the Bulgarians, who is an orphanage for Greek children as a memorial of Lord Byron.

Connell in 1897, in the part of Cyrano de Bergerac, will be made into a statue of precious materials by the sculptor Puch. The flesh will be of ivory or tinted marble, the dress of ivory, gold, and emeralds and will cost \$1,000,000.

Paris is suffering from a plague of rats living in the sewers and in the cellars of the Palais Royal and the Halles Centrales. Le Gantois suggests that the sewers be divided into sections and let to sporting men for ratting contest.

Traffic through the Suez canal fell off greatly in 1897, the amount being the smallest in 15 years. 2,956 steamers, 7,589,881 tons register passed through, as compared with 3,408 steamers of 8,622,237 tons in 1896 and about the same number in 1895.

Prince Philip of Coburg is about to follow up his duel by demanding a divorce from his wife. The suit will be put off till after the marriage of his daughter, Princess Dorothea, to Kaiser Wilhelm's disreputable brother-in-law, Duke Ernst Günther, of Schleswig-Holstein-Augustenburg.

### MARKING THE COAST LIGHTS.

The Endless Task of Perfecting the Hydrographic Office Charts Performed by a Woman.

Miss Eliza Scott, cousin of Admiral Scott, is a little woman who sits hour after hour, day after day, in the hydrographic office, Washington, and puts little tabs of yellow paint here and there over the thousands of maps issued by the department. Each of these yellow splashes covers, but does not conceal, a tiny black dot which marks one of another of the hundreds of light-houses scattered along our coast line for the guidance of revolving ones and white flashlights, with occasionally a red sector, which indicates shoal water and danger, and tells the mariner to keep his ship's wheel inside the space covered by the light.

For 20 years has Miss Scott sat thus tabbing yellow dots, apparently in the most unimportant manner, every day after they have come from the press. A few moments' watching will convince one that there is method in her madness. She knows the situation of every one so well that she could almost perform her work in the dark. It is very trying on the eyes, and only one thorough acquaintance with the situation could do it in a satisfactory manner. The object of color over the dots is that they may be more readily perceived by the eye. The eye is, however, merely a tiny drop of red was put in the center of the yellow splash, but as the black dot underneath shows through the yellow perfectly, the center of the red has been discontinued, which lessens the labor by half.

There are 525 lights on the Atlantic coast, beginning to count at the northern part of Newfoundland and continuing to the south shore of Venezuela. This includes those of the Gulf of Mexico and along the coast of the West Indies. On the Pacific coast there are only 33 lights. Thus it will be seen that Miss Scott puts on hundreds of thousands of her little yellow buds in a year's time, although she works part from nine a. m. to four p. m.—N. Y. Sun.

### A Great Mining Country.

A bulletin of the Dominion geological survey just issued shows that Canada's mineral production has advanced from \$10,000,000 in 1886 to \$22,000,000 in 1896. In 1896, the production was valued at \$28,750,000, or \$6,000,000 more than in 1895, and double the output of a decade ago. Its coal mines are still the most important, with a production of 4,576,000 tons, valued at \$2,480,000, but rock is fast overtaking coal, with an output of 30,700,000 tons. Other minerals which have advanced in value are: Lead, \$1,396,000; copper, \$1,501,000; nickel, \$1,399,000; silver, \$3,222,000; and petroleum, \$1,031,000. The value of all the minerals produced in 1897 was \$8,600,000.—N. Y. Sun.

### One Slight Mistake.

"Did I understand you to say that I was a perfect brute?" he asked. "If you did, you are mistaken," she replied coolly. "For he is from here to apply the adjective 'perfect' to you. It would convey a very erroneous impression."

After that she was comparatively good natured, as one often is after a great victory.—Chicago Post.

For the Eyes. The following is a soothing lotion to be applied with an eye ball several times a day: One grain of borax, one ounce of camphor water.—Chemist's Requirement.

## HELD THE TRAIN.

Until the Old Lady's Good little Man Made Up the Full Dose of Eggs.

There is no better known food character in Lancaster than Jim Dillon, and he is as many friends as a man in Garrat county. His intimate old friend "Old Crow" has invited him to be a party of friends. "I boarded a train on a little trip to go over to a neighborly town. You know this line doesn't claim a speed record for the Boston express, but the friends of the officers say they are satisfied if the road can clear two dollars a day. On the occasion I refer to the wind-blown was raining my destination when it came to a dead standstill. I quickly headed out of the window to learn the cause of the stop, and to the conductor talking to an old woman with bonnet and shawl and Sunday togethery and a small basket in hand.

"Being curious to know the import of the dialogue between the two, I went forward and looked at the woman and flagged the train for the purpose of getting on board and going on to 'tempt' to sell a dozen eggs. She told the conductor, however, that she had not an egg in the basket at that moment, and that she was in a hurry to get to the post, was immediately expected to lay her full basket on the table, and to say that it would be a great accommodation if he would hold the station until this should occur as it would be a pity to proceed to market with fewer than a dozen eggs. The conductor consented and then our wait was over.

Finally, after the lapse of about 20 minutes, a furious cackling was heard near the head of the train, and the old lady had fluttered into view, followed by the old lady, who came running toward the cars, and, taking out a small basket, she presented an egg. She placed it while it was being counted, and then our wait was over. Thanked the conductor and clambered away.—Louisville Post.

### SECRETARY OHLEY.

Recommends Pe-Ru-na for Catarrh. As a Spring Tonic it Has No Equal.

## RHEUMATISM.

Removed the Cause. A most interesting case of rheumatism occurred yesterday that I ever had to attend to. Second Question: "What was it?" Answer: "It was a case of rheumatism in my eye, my daughter had a college student. I moved it."—Philadelphia Call.

## THE TOLLING PAVILION.

Offered me \$500 for my interest in the property and she refused to consider the proposition. I offered her \$400.00 and she jumped at it.—Detroit Free Press.

### Reminiscence and Reminder.

"What a nice little shirt you have for a pen wiper," Mr. Jolley said. "Yes that's the only one worned by me over bought of a peddler."—N. Y. World.

When a man becomes thoroughly contented he has outlived his usefulness.—Chicago News.

## BLOOD POISONING.

### A Nurse's Experience. She'd rather have one than three.

There are thousands of people suffering from blood poisoning who have almost begged themselves in buying medicines from which they have obtained no help. There are thousands of others who first try to have tried Dr. Ayer's Sarsaparilla, and found perfect relief. Of these cases I will give you one. On the 15th of August, 1897, I was called to the residence of a lady who was suffering from blood poisoning. She had four large sores on her face, and she was very much distressed. She had tried many medicines, but they had no effect. I gave her a bottle of Dr. Ayer's Sarsaparilla, and she took it for a few days. She then told me that she had a great deal of relief. I gave her another bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a third bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a fourth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a fifth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a sixth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a seventh bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her an eighth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a ninth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a tenth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her an eleventh bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twelfth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a thirteenth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a fourteenth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a fifteenth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a sixteenth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a seventeenth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her an eighteenth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a nineteenth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twentieth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twenty-first bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twenty-second bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twenty-third bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twenty-fourth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twenty-fifth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twenty-sixth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twenty-seventh bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twenty-eighth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a twenty-ninth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a thirtieth bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a thirty-first bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a thirty-second bottle, and she took it for a few days more. She then told me that she had a great deal of relief. I gave her a thirty-third bottle, and she took it for a few days more. GEN. D. S. FORBES  
Fredonia, N. Y.

the able and accomplished Military Commander (father-in-law of the late Commander Wm. B. Cushing, U. S. N., who gained world-wide renown for his crowning feat of blowing up the iron clad Albatross) in 1863 writes Dr. Fenner:

"For many years I have kept on hand your Blood and Liver Remedy and Nerve Tonic for immediate use when ever I have

A bilious attack or nervous prostration or feel run down. It always gives relief—so much so that I have come to rely on it with the same certainty that I do on the law of gravitation."
