WASHINGTON LETTER.

(From Our Regular Correspondent.)
WASHINGTON, March 10th 1902.

As I have previously stated in these letters the United States is coming to be regarded more and more, by foreign nations, as a power in the diplomatic world. The diplomatic receptions of the Secretary of State, which occur every Thursday, are more generally attended than ever before and a few hours spent in the ante-room of the Secretary's reception room in the State Department, will furnish an opportunity of seeing practically all of the ambassadors and ministers accredited to Washington. Where, a few years ago, the diplomatic days of the Secretary were hardly observed and only a small number of the secretaries and attaches called, with perhaps an occasional minister who had some special object in view, today none of the ambassadors consider that he is properly following his mission to the United States if he does not attend at least two days in the month and pay his respects to the Secretary of State.

Another notable instance of the importance which this country has attained in European eyes is the elevation of the minister from Austria Hungary to the rank of an ambassador. This will, of course, be followed by the elevation of the United States minister to that country, Mr. Robert S. McCormack, to a like rank. The diplomatic and consular bill, which has just been passed and which carries total appropriations of approximately \$2,000,000, will make this change possible. There is at least one person in Washington who does not welcome the increased importance from the European standpoint of the United States and that is Miss Alice Roosevelt. Following the christening of the "Meteor" the Emperor of Germany extended an invitation to Miss Roosevelt to visit him on her proposed trip to Europe at the time of the coronation of King Edward. As it would be impossible for Miss Roosevelt to accept the invitation in the purely personal capacity in which she would have attended the coronation ceremonies, and as a refusal of the imperial hospitalities might have offense, the young lady has been compelled to abandon her European trip entirely for the present. The President holding the view that after the people of the United States had spent so much time and effort in the entertainment of Prince Henry, with a view to cementing the friendly relations between the United States and Germany, it would be most improper to do anything which in any way might undo, by offending the super-sensitive pride of his Teutonic Majesty, whatever good may have been accomplished. Miss Roosevelt left last night for a visit to Cuba where she will be the guest of Gen. and Mrs. Leonard Wood, the trip being something of a consolation favor in view of the disappointment which attended the foregoing of the European visit. Miss Roosevelt will be accompanied by Mrs. Harriet Elaine Beale who will also be a guest of Mrs. Wood.

One of the events of the past week in the Senate was the passage of Legislative and Executive Appropriation bill which carries a total appropriation of about \$25,000,000. There has been little attention paid to this bill by the newspapers for the reason that it contains provisions for many abuses for the protection of both political parties and party organs are unable to criticize its provisions without running smack among the pets of politicians. A mere line stating that the bill has passed is all that will be found in the majority of the newspapers.

There is a growing conviction that Secretary Long will leave the Cabinet about May first. It is also said that his successor will be the Representative Shufeldt of Massachusetts. Of course the latter rumor is a matter of pure speculation, but if Mr. Roosevelt follows any precedent he will select a New England man.

The Senate is actively engaged in discussing the measure popularly known as the "Ship-subsidy Bill." If it becomes a law it will increase the annual expenses of the government by several millions of dollars but the republicans claim that the advantages to be derived will more than offset any increase in the government outlay. The democrats on the other hand, pronounce the measure an extravagant and unnecessary form of legislation. From a non-partisan stand the bill seems to be clearly in line with the republican policy of the past and simply an extension of the protective principle to the owners of vessels. It will be discussed until the 17th, of the month and will be made the occasion of much lurid oratory on both sides of the Senate. Senator Hanna has already broken his long period of silence to give his views on the subject and he presented a most striking appearance as he did so. Mr. Hanna finds speech-making a stupendous and heating undertaking and when he had concluded his speech he remarked, mopping his brow, as he took his seat, "There! I think that effort alone earned me my salary for this session."

The House is still debating the question as to whether the rural mail routes shall be carried by salaried employees or by those persons who submit the lowest bids for the work to be done and the matter will come to a vote today. There have been presented able arguments on both sides of the question, but I believe that a majority in the Senate favor the salary system. At least, all the Western senators to whom I have talked on the subject have so expressed themselves.

Cuban reciprocity continues to be a source of trouble to the republicans. The apprehension that any practical reduction of the sugar and tobacco schedules in Cuba's favor will be made the occasion of amendments by the Senate which will precipitate a virtual tariff revision all about the line leads many of the republican members, who do not consider the time ripe for such a revision, to vigorously oppose the measure reported by the Ways and Means Committee. The caucus of Thursday evening was the third that has been held on the subject and the members seem to be no nearer an agreement than they were at first, while the President has made it clear that he will not concede anything from his original position as expressed in his message.

The President has signed the bill making the Census Bureau a permanent part of the governmental machinery but, by what appears to have been a predetermined arrangement between the White House and the Conference Committee, the President is authorized to exclude from the classified service all those persons whose services will not be required in the permanent organization. The discovery of this fact has caused no little indignation at the Capitol for it means the discharge between now and July 1st of some 1,200 clerks, all of whom are proteges of members of Congress.

George Hayes, who has been making his home with W. S. Hunt and family, made us a pleasant call on Monday afternoon and bid us goodbye, as he left with Mr. Hunt on Wednesday. George has worked on the Pioneer several times when we were hard pushed, and we have always found him a gentleman and a good workman. We hope that he will meet with unbounded success in his new home.

W. S. Hunt and family left the middle of the week for Tenney, Wilkins Co., this state, where they have rented a farm of two hundred acres. Their household goods and cattle they shipped by rail on Friday last, Frank, the eldest son, going with the car. Jake, the second son, left on Saturday last, and the balance of the family left on Wednesday and will travel overland to their new home in the western part of the state. We welcome Mr. Wells and family to Pine county. He has one of the best farms in this part of the state, and as he is a practical farmer there is no reason why he should not do well. Sunday morning two other farmers arrived from Illinois each having a car-load of household goods, horses and cattle. They have purchased farms out east of here on the St. Croix road.

Prof. Hill's Lectures.

Those who have attended the M. E. church during the fore part of the week and listened to the lectures delivered by Prof. G. W. E. Hill on Europe have had a treat indeed. The Prof. is an easy and entertaining speaker, and on Sunday evening in his description of the "Passion Play" he held his audience spell bound by his graphic account of that most wonderful performance. He painted it in such realistic colors that it seemed that his audience was there and the "Play" was being enacted before their eyes. The Prof. has a vast fund of humor running through him so that there is just enough of the ridiculous in his lectures to make them entertaining. Monday evening he spoke on his travels through Europe and his talk was both instructive and entertaining. Tuesday evening was a continuation of the talk on Monday and was listened to with profit by those who heard him. On Wednesday evening the last lecture was given and was a description of a trip the Prof. took through the southwestern part of the United States, and what he saw in that wonderful, yet so little known part of this great country. His description of the dwellings built by the

cliff dwellers and the prehistoric people who occupied this wonderful country was instructive and entertaining, as was also his description of the Great Cannon of the Colorado.
