WASHINGTON LETTER.

(From Our Regular Correspondent.)

WASHINGTON, December 29th, 1902.

The sanguine view of the Venezuelan situation taken in my letter of a week ago proves, in the light of subsequent events, to have been amply warranted. Not only have all the parties to the difficulty consented to submit their difference to arbitration but they have accepted the suggestion of the United States and will employ the good offices of the Hague Tribunal. Numerous administrative details remain to be perfected and even some more important contentions on the part of the Powers await final settlement, but it is known that Secretary Hay has already begun work on the preliminary protocol which, when signed, will confide to the Hague the arbitration of the many claims and differences. There was a time during the past week, when it was feared that the President would be compelled to accept the onerous task of arbitrating the case, such being the wishes of the Allies, but Secretary Hay with great diplomacy succeeded in making it clear that it would be an imposition to ask the President to perform so difficult and thankless an undertaking, and emphasized the wisdom of following the example of this country in the Pious fund and honoring the international tribunal which all the Powers involved had established for emergencies similar to the present.

Germany have protested against what they claim is a failure on the part of this country to maintain that policy. In evidence of such failure they cite the case of Manila hemp and fibre on which the Philippine Commission, with sanction of Congress, has imposed an export duty of \$7.50 per ton, which duty, however, is remitted when the product is shipped to the United States. Senator Lodge of the Philippine committee has always argued that the open door policy must stand and for that reason no advantage could be afforded the United States on goods shipped into the Philippines, but it now looks as though that position was about to be abandoned. The Administration holds that as a possession of the United States the Philippines cannot be bound by the policy but must be regarded in the light of colonies, to which foreign nations have no greater right to expect equal import and exports duties than they have to expect such duties in importing from or exporting to the British colonies. For instance, it is said that while the Peace Commission made some pledges in regard to such a policy, it was because the Commission did not foresee that the islands were to become an actual possession of the United States but contemplated some form of independent government with merely a protectorate on the part of this country.

WE TAKE PLEASURE

in the opportunity now afforded us of sincerely thanking our friends and customers in the past with what they have favored us, and hope to merit their trade and friendship in the future.

AND WISH YOU ALL A HAPPY NEW YEAR.

FLOUR

We represent some of the best flouring mills in Minnesota and can always supply you with the very best goods on earth at right prices.

We have all kinds of Ground Feed and Coarse Grain. Salt of all kinds. Oatmeal, Cornmeal, etc. always on hand; and we are cash buyers of all kinds of products and Live Stock.

Second in importance to the satisfactory progress of the Venezuelan negotiations, has been the publication of the terms of the Cuban treaty negotiated in Havana by General Tasker H. Bliss, acting under the instructions of Secretary Hay. The general trend of the treaty was outlined in these letters some weeks ago but now absolute facts can be stated. The reduction from prevailing tariff rates provided is 20 per cent on all goods not on the free list at the present time, but in addition, the United States receives a large number of special discounts which, in the judgment of the administration, will secure to the manufacturers and producers of this country an absolute monopoly of the Cuban trade. So far as it has been possible to ascertain, members of Congress are well pleased with the treaty which they regard as a triumph for American diplomacy. Several have predicted that the convention will be promptly ratified. The President has skillfully forestalled the imminent discussion as to the respective prerogatives of the Senate and the House by announcing that if the Senate ratified the treaty without reference to the House he would immediately send a message to Congress asking for enabling legislation.

The adage that "the laughs best who laughs last" is being proven in the case of the Senate and the Philippine monetary standard. Last session the House insisted on a gold standard was maintained, although the wise ones in the House predicted at the time that a change would have to be made soon. The necessity has now arisen and the Senate Philippine Committee has favorably reported a bill providing for the gold standard. This is the second time, during this session, that the Senate has had to yield to the judgment of the House, the other instance being in regard to the Cuban treaty the President, as stated above, having determined to ask the sanction of the House if the Senate does not.

PINE CITY, - - MINN.

Under the provisions of the treaty Cuban products entering the United States will do so at a uniform discount of 20 per cent from the Dingley rates and products of the United States entering Cuba will receive a concession of 20 per cent from the lowest Cuban tariff assessed on similar goods from other countries except when otherwise provided, the exceptions being instances where special discounts 25, 30 and 40 per cent are allowed. It is worthy of note that, even with the 20 per cent discount, the producers of beet sugar will still enjoy a protection of one third cent per pound against Cuban competition. Agricultural products receive special consideration, to wit, 30 per cent discount on butter, raw cotton and wool, 40 per cent on rice, etc. Manufactured cotton and woolen goods receive a discount of 40 per cent, while manufacturers of iron and steel, and the raw material receive discounts of 25 per cent and silk goods, watches, umbrellas, etc., receive a discount of 40 per cent.

The so-called "open door policy" in the Philippines is occasioning much perplexity in the War Department and the Senate committee on Philippines. Great Britain and

Generally speaking, politics have been eschewed in Washington this week and have given place to social gaiety. While no state entertainments will take place at the White House until after New Year's the President and Mrs. Roosevelt are entertaining a number of guests and members of the diplomatic corps are giving many and elaborate receptions and dinners.

LIST OF PATENTS

Granted to Minnesota inventors this week, reported by C. A. Snow & Co., H. L. Crutenden, Northfield, dental cement injector; H. L. Crutenden, Northfield, collapsible dental cement injecting tube; S. M. Klarquist, Minneapolis, acetylene gas generator; S. C. Lawlor, Duluth, window cleaning apparatus; A. G. Lawrence, Motley, automatic railway switch; J. T. Smith, Heron Lake, flax thrasher; S. W. Vance, Crookston, brick truck.

For copy of any of above patents send ten cents in postage stamps with date of this paper to C. A. Snow & Co., Washington, D. C.

A glass or two of water taken half an hour before breakfast will usually keep the bowels regular. Harsh cathartics should be avoided. When a purgative is needed, take Chamberlain's Stomach and Liver Tablets. They are mild and gentle in their action. For sale by L. E. Breckenridge.

Remember when you want to find the Pioneer office, that we have moved two doors North, in the Miller block, and that we are better prepared than ever to do all kinds of commercial and fancy job printing.

PINE CITY, MINN.

A representative of the German government has been sent to Canada to ascertain what trees can be profitably transplanted into Germany. He has already decided that white pine, cherry, spruce and black walnut would flourish on German soil.

Another society woman has elected to exchange the drawing-room for the footlights. She is the Hon. Mrs. Robert Buresford, Lord Leslie's sister-in-law. Under the stage name, Miss Della Buresford, she appeared on the opening night of "The Girl From Kay's," the new musical comedy at the Apollo, London, as a bridesmaid.

The earnings of the various steel and iron concerns for 1902 will be larger in the aggregate than in any year in the history of the industry. It is estimated that the net earnings of all the large steel and iron companies will run close to \$200,000,000, which the United States steel corporation will contribute something like \$137,000,000.

At Tunia the average commercial value of green almonds in good sized lots is 15 francs (\$2.50) per 100 kilograms (223 1/2 pounds). The average value of almonds is about four times as great, and the decaffeinated fruit brings 205 francs (\$39.00) per 100 kilograms. The stock on hand of the processing harvest is insignificant—approximately 2,000 kilograms (4,402 1/2 pounds).

Flies are the natural prey of spiders, yet, strange to say, there are in Brazil some flies which prey on spiders. These during little insects do not differ much from the common house fly, they are hymenoptera, according to the scientists, and possess a typical insect of this kind. They usually come upon the spiders when the latter are unprepared and sting them to death.

Every now and then we hear of the invention of a new typewriter which in the estimation of its maker, is destined to excel all others as regards speed, convenience and mechanical construction. An interesting report of this sort comes from Europe, to the effect that a Frenchman named M. Laffrains has produced an ingenious machine which will write shorthand characters.

The Passaic (N. J.) board of health has discovered that pencils used in the local public schools are the main cause of the large number of cases of diphtheria. More than eight cents receive a pencil each day. Therefore school closes there are collected and put in a box together. The contagion comes, the officers say, from the children picking up the pencils at their mouths after other children have done the same thing.

A St. Petersburg physician has experimented with blue electric light to make operations painless without resorting to other anesthetics. Burns of the skin and especially of the mucous membrane, are said to have not only been rendered painless but healed also more rapidly.

News has reached St. Petersburg that the band of brigands which has been terrorizing the central provinces of Russia recently attacked the home of M. Muelevic, a wealthy landowner. In broad daylight, intimidated the inmates and carried off jewelry, diamonds and money to the value of nearly \$150,000. The report that the leader of these desperadoes is a woman is confirmed by M. Muelevic, who describes her as above the medium height, dark hair horsewoman and a crack shot.

On the eve of Minister Wain's departure from Washington a young woman of his acquaintance said to him that she hoped to visit China some day, as what he had told her about his native country had been so interesting. "But you have never explained," she added, "why Chinamen take four or five wives." With a grave bow the orientalist diplomat said: "My countrymen take so many in order that they may find in all of them the beauties and accomplishments of one such young lady as you."

The prevalence of appendicitis in London has induced Lloyd's to issue insurance against the premium of five shillings a man is assured that if he is to undergo an operation he has all his medical expenses paid up to £200 (\$1,000), and even for death to £200 (\$1,000) with the policy. A large number of appendicitis policies were issued. The premium is the same as was charged for insurance during the smaller epidemic in 1901. It is an axiom that everything is insurable at Lloyd's.

At a country fair at Benthall, Chesh., a little village near London, a fat carriage named Hay surprised the natives by skidding himself up in a barrel with a barrel of dynamite. A moment later, when the spectators expected to see him half destroyed by the red-hot, the man opened the lid of the barrel and showed himself unharmed, with the rate clattering along his breast. He said that the explosions of his vision acted as a charm upon the dynamite and prevented the little animals from devouring him.

THE CUBAN TREATY.

Opposition to Ratification Is Being Developed.

FRIENDS OF MEASURE CONCERNED.

Some of the Arguments Advanced by Its Opponents Will Be Considered. It Is Feared That the Treaty Will Be Ratified.

Washington, Dec. 30.—Considerable opposition is developing to the ratification of the Cuban reciprocity treaty now pending in the senate. It is not taking quite the form that the opposition to the Cuban legislation took last spring, but it is sufficient in substance to give concern to the friends of the measure. From time to time, as opportunities offer, the president is discussing the matter with senators, particularly those who are known to have objected to the enactment of legislation extending tariff concessions to the Cuban republic. Several weeks ago it appeared that the senate, when presented to the senate, would be without difficulty, but some senators now are taking as strong grounds against the treaty as they took against the legislation proposed in the last session of congress. These senators are of two classes, those who are opposed on principle to any "tariff tinkering" in the United States, and those states whose products may be affected by the concessions extended to Cuba by the pending treaty.

Senators of the first class might be induced to support the treaty, inasmuch as it does not involve, in their view, an attack on the system of protection, which is not for their apprehension that the ratification of the Cuban treaty may lead to a demand from other countries that they, too, be accorded special tariff concessions in the United States. It is pointed out by the president that in the event of the ratification of the Cuban treaty, a demand may be expected from Germany within 30 days for concessions similar to those accorded Cuba.

Germany's Attitude. The most distinct desire of the German emperor, it is pointed out, is for the extension of the foreign commerce of his empire. He, of course, regards Cuba as a nation foreign to the United States. If tariff concessions are granted to Cuba, Germany, under the most favored nation clause will request that she be given similar concessions. That request may take the form almost of a demand. If it is not granted, the fear is expressed that Germany may initiate legislation that will be inimical to the industrial development of this country, so far as Germany is concerned, even if it should not curtail American commerce already established in Germany and its possessions. The same argument is applied to other countries. Germany being used simply as an example of what may be expected from the rest of the foreign nations with which the United States has extensive commercial relations.

Special Ratification. The president, it is understood, believes that the pending treaty with Cuba will be ratified. He desires that it should be ratified as promptly as possible, and that the little friction as possible. He sees in the proposed ratification no possible assault on the tariff system of this country, and believes that it would be simply the redemption of a promise made and implied, made to the Cuban people when they were in the throes of the organization of their government. In this view of the matter, it is supported by a large majority of the republican senators. While some trouble is anticipated in effecting the ratification of the treaty, it is believed generally that ratification will not be delayed seriously.

President Wounded. Mr. Roosevelt receives Cut from a Rapier During a Fencing Bout with Gen. Wood.

Washington, Dec. 30.—A wound received by President Roosevelt in a fencing bout with Gen. Leonard Wood a day or two ago, though superficial, is being treated with some care. The wound, it is reported, was a narrow escape from the loss of the left eye. The rapier of Gen. Wood, who is an expert fencer and who is teaching the president, the cut penetrated the president's mask, inflicting a wound just above the eyebrow. The deviation of an ink well had come President Roosevelt the slight of that eye.

On a Lecture Tour. Illinois, N. Y., Dec. 30.—President Jacob Gould Behrman left Illinois Monday night for an extended western trip. He will visit several of the larger cities and will speak on judicial and educational topics. His itinerary shows he is already scheduled to speak in Chicago, St. Louis, Chicago and Lincoln, Neb. President Behrman will speak in Illinois Thursday on "Our Philippine Problem."

Reveries of Cholera. Manila, Dec. 30.—More on the island of Mindanao report that cholera is rampant in the villages on the east side of Lake Lanao. There is an average of 30 deaths a day. The disease also prevails at Ilorin, the city, and at Zamboanga, an island of Lake Lanao, but the Filipino residents of the island do not yet seem to have been attacked.

SCENES OF SPLENDOR.

Magnificent Parade of Officials and Citizens at the Opening of the Durbar in India.

Delhi, India, Dec. 30.—The ceremony, Lord Curzon, of Khetlone, made his state entry Monday into the capital of the Moguls. This constituted the official opening of the durbar held to celebrate the accession of King Edward as emperor of India. It was a splendid and, probably unparalleled, in its magnificence. At the head of the elephant procession rode Lord and Lady Curzon on the state "grand trapezoid," 12 feet high, the largest elephant in India. Their howdah was decked with gold and silver, and the elephant was almost hidden beneath a gold-worked saddle cloth. Surrounding them were footmen in scarlet and gold liveries bearing massive silver trays.

The route was lined with British and native troops, and crowds of on-lookers witnessed the spectacle, which, it is asserted, never has been surpassed in magnificence, even in this country of oriental splendor.

TO HONOR HER MEMORY.

Steps Taken to Establish a Memorial to the Life and Work of the Late Alice Freeman Palmer.

Boston, Dec. 30.—Representative Edward A. Hooper, in a conference here Monday decided to invite subscriptions to a fund with which to establish a suitable memorial to the life and work of the late Alice Freeman Palmer, formerly president of Wellesley college, long member of the Massachusetts state board of education, and formerly adviser of the women's department of Harvard university. A committee of five was appointed to choose the memorial, to arrange for committees in various places to receive and collect funds and to appoint a committee of business men to act as trustees. President Eliot, of Harvard, is chairman, and Mr. Crane, of Massachusetts, is president. Other members are: Richard Watson Gilbert, of the Century, and Mrs. Quincy Adams Shaw, of Boston, are members.

Held to the Grand Jury.

Cleveland, O., Dec. 30.—George W. Merdith, a wealthy liquor distiller at East Liverpool, O., has been bound over here to the United States grand jury in the suit of \$5,000 of United States Commissioner Simpson, on the charge of making false entries and with rectifying spirits without giving notice to the internal revenue authorities. He is also charged with having inspected and sold spirits in violation of the law, and with shipping them under false trade names and failing to destroy the marks and stamps on empty spirit packages.

Theater Burned. Atlanta, Ga., Dec. 30.—The Star theater building, on Decatur street, was almost completely destroyed by fire Monday afternoon. A vaudeville company was giving a rehearsal in the theater when started by a fire of the theatrical company and the members of the company made a hasty retreat from the burning building in their stage costumes. All of the property was saved, and no one was in the building escaped without injury. The burned building originally cost \$30,000. There was no insurance.

Renunciation Accepted. Vienna, Dec. 30.—The semi-official Wiener Abend Post says Emperor Francis Joseph has accepted Archduke Leopold Ferdinand's renunciation of his rank as a member of the adoption of a civil name, Weotting, and has also ordered that his name be stricken off the lists of the Knights of the Golden Fleece and of the army.

Will Be Created.

Los Angeles, Cal., Dec. 30.—In accordance with her wishes, the body of Mrs. Jessie Benton Fremont will be created. The funeral is to be held today from the Episcopal church. Her ashes are to be buried beside the grave of Gen. Fremont on the Hudson, and thus will be fulfilled one of the chief desires of Mrs. Fremont's last years.

Ice Yacht Regatta.

Kalamazoo, Mich., Dec. 30.—Eastern iceboats will compete with western boats on a western course for the first time at the International Ice Yacht regatta, to be held at Cadillac, January 20 to 25, under the auspices of the Kalamazoo Ice Yacht club.

Victims of Heart Failure.

Carlisle, N. M., Dec. 30.—W. T. Tansill, the well-known millionaire cigar manufacturer, died here Monday of heart failure. Mr. Tansill came here for his health several years ago and has been very active in his efforts for the advancement of the territory.

Will Hold No Extra Session.

Havana, Dec. 30.—After a lengthy conference between President Palma, members of the cabinet and leading senators, it has been decided not to call an extra session of the senate to discuss the reciprocity treaty with the United States.

Prince to Come Again.

Berlin, Dec. 30.—The papers here today are full of reports that the prince of the United States in 1901 to visit the St. Louis exposition and attend the extreme moment in Philadelphia.

A DARING ROBBERY.

Window of New York Pawnshop Is Smashed by Paving Block.

DIAMONDS WORTH \$1,000 STOLEN.

Crowd Captures the Robber and Places Him Almost to Death—He Is Thought to Have Passed the Gems to a Confederate.

New York, Dec. 30.—In full view of the passing crowd, a window in the pawnshop of R. Simpson & Co., on West Forty-second street, was smashed by a Belgian paving block Monday night, and \$1,000 worth of diamonds were stolen. Only three of the gems were recovered after the capture of the robber. It is believed by the police that several men were in the job and that the man who broke the window passed the jewels to confederates. After an exciting chase which was entered into by hundreds of men, the robber, who drew a pistol and fought desperately for his liberty, was captured. He was more dead than alive when the police rescued him from the crowd of pursuers. He is 19 years old and calls himself William Madison, of Boston. It was one of the most daring robberies heard of in New York for a long time. The shop was thought to be close when a paving block, covered with paper, crashed through

GERMANY IS SILENT.

Will Not Disclose Her Intentions Regarding Blockade of the Venezuelan Coast.

Berlin, Dec. 30.—The German government is completely silent as to when the blockade will be raised or whether it will be raised at all until every question concerning arbitration is settled. The acceptance of arbitration after the blockade was begun is certainly not received with popular favor in Germany. Gen. von Bismarck, one of the foremost military writers, contributed to the Tagliche Rundschau his views upon the Monroe doctrine, and argues that the withdrawal of the blockade at this stage would show singular weakness.

The Frankfurter Zeitung hail President Roosevelt's refusal as good news, and praise the United States for having done so much to bring the Hague tribunal into vogue, referring to the cause already settled at the United States' instance.

The Neuste Nachrichten says it hopes the statement that Minister Bowen will represent Venezuela's case is not true, "since the United States' action would thus appear in a bad light after refusing arbitration and keeping the largest hand in the game in an irresponsible way." Caracas, Dec. 30.—Senor Lopez Baralt, Venezuelan minister of foreign affairs, has given out the following statement: "Venezuela agrees to pay all her debts, the payments to be guaranteed by a certain percentage of the customs receipts or by the

THE COAL SHORTAGE.

Railroad Men Say Efforts Are Made to Relieve It.

THE SITUATION IS VERY SERIOUS.

Officials of the Great Dry Participation in Movement to Increase Price—200,000 Tons Ordered from Abroad.

Carbondale, Ill., Dec. 30.—Every effort was made Monday by the coal operators and railroad officials of southern Illinois to send coal to the markets where the supply is limited. In the southern Illinois fields the mines are working only half of the time owing to a scarcity of cars. A belief is held in due, it is said, to the retention of coal cars in St. Louis and Chicago by coal dealers who refuse to unload their coal. Railroad men are making every possible movement to increase the price, and say that every effort is being made to relieve the present situation. A belief is becoming prevalent to the effect that no great supply of coal will be turned out by the mines until after the annual meeting of the trustees and miners. The mining scale for the coming year will be adjusted at the coming meeting.

Coal from Abroad.

London, Dec. 30.—As said on good authority in Liverpool that contracts have been made for 200,000 tons of coal for shipment from English, Scotch and Welsh ports to eastern ports of the United States. The purchase of coal and the engagement of ships, it is added, have been going on for a fortnight, and are expected to continue for several weeks. Forty steamers have already been chartered. The same authority says the coal shortage is the result of an "unexpected lull in the coal strike arbitration in the United States."

Doing Their Best.

Philadelphia, Dec. 30.—It was announced at the office of the Philadelphia & Reading Coal and Iron company Monday that for the first time in several weeks the collieries of the company in the anthracite region are working to their utmost capacity.

Railroads Short of Coal.

New York, Dec. 30.—The coal stringency in New England has become so acute that a curtailment of train schedules on railroads that section in the near future appears to be almost inevitable.

Will Demand Increase.

Springfield, Dec. 30.—W. D. Ryan, secretary-treasurer of the United Mine Workers of Illinois, in a statement says that the miners of the United States will make a demand for a 10 per cent increase in wages at the national convention at Indianapolis on January 19. Mr. Ryan says that the operators are refusing a large increase for coal than ever before, and they cannot make the excuse that the mines are not paying expenses. Mr. Ryan says that the convention will produce figures to show the total cost of mining a ton of coal and give the public an idea of the profit being reaped by the operators. Mr. Ryan will attend the convention, and no doubt lead the fight for higher wages.

Passed Away.

Omaha, Neb., Dec. 30.—John J. Lickey, superintendent of the western district of the Western Union Telegraph and Cable company in this city at 3:30 o'clock Monday night. His death was very sudden, and was the result of an attack of influenza which had developed into pneumonia. Only members of his immediate family were at his bedside when death came.

Receivers Named.

Cumbeerland, Md., Dec. 30.—Lloyd Louwens, Jr., and Robert R. Henderson have been appointed receivers for the Maryland Paper company, which operated a large plant here. The company was recently acquired by a Rhode Island syndicate. It is alleged that insufficient capital caused the failure. No statement of assets and liabilities is available.

Roosevelt's Picture.

Washington, Dec. 30.—A new oil painting of President Roosevelt now in the hands of the artist who decorates the private dining-room by the white house. It is life size and shows the president in his rough "guy" uniform. He stands in his position, holding his hat in his hand.

Frozen to Death.

Calumet, Mich., Dec. 30.—There was one fatality in the blizzard throughout northern Michigan on Christmas day. The body of Mrs. Ida Parkinson, 30 years of age, was today found frozen stiff.

Fatal Infection.

Washington, Dec. 30.—Chet Harris, a married man aged 35, shot and slightly wounded Alvin Edwards, a girl of 14 years, and then killed himself. He was infatuated with Miss Edmonds.

New Battleship Maine.

Philadelphia, Dec. 30.—The new battleship Maine was placed in commission at the navy yard Monday. She was turned over to Capt. Leidy, who will command her.

THE INTERNATIONAL ALPHONSE AND GASTON.

Alphonse Roosevelt—You arbitrate it, my dear Gaston.

the window, and in an instant a tray of diamond rings and pins disappeared. One of the clerks jumped over the counter and pursued the man who broke the window. A great crowd followed, and when the man was overtaken he was buried under a score of men and so badly battered that a physician's services were required. Madison said he came here a week ago and was prompted to commit the deed by cold and hunger.

Madison later told the police that his name is Angus W. McPherson, and that he is a bellboy at a well-known hotel in this city. He said that he was heavily in debt and sought to relieve his financial straits by robbery.

Final Maneuvers.

Washington, Dec. 30.—The ships of the three American squadrons in the Caribbean, which were distributed at the great sea trials in the United States last week for the purpose of giving the men shore leave during Christmas holidays, have now begun to reassemble at Culebra for the final maneuvers. These will begin January 2.

Like Our School System.

New York, Dec. 30.—Twenty-five women school-teachers went from the United States to the Argentine Republic for a few years ago for the purpose of introducing American educational methods in that country. The result is that the schools of the great republic of the south are now modeled upon the system born and developed here.

New Secretary.

Washington, Dec. 30.—Robert R. Armstrong, private secretary to the secretary of the treasury, will be appointed assistant secretary of the treasury on the reassembling of congress, to succeed Gen. Spaulding. The duties of the new secretary will be in the hands of Secretary Shaw for some time.

Life Imprisonment.

Washington, Dec. 30.—Hilario Ponce, the spy who, next to Gen. Pancoque, is believed to be the credit of capturing Aguinaldo, has been sentenced to life imprisonment for murder, according to charges received from Manila by the War Department. Details of the crime are lacking.

Destroyed by Fire.

Bradford, Pa., Dec. 30.—Three buildings were burned to the ground by fire that started in the post office building here. The loss is \$75,000.

Will Demand Increase.

Springfield, Dec. 30.—W. D. Ryan, secretary-treasurer of the United Mine Workers of Illinois, in a statement says that the miners of the United States will make a demand for a 10 per cent increase in wages at the national convention at Indianapolis on January 19. Mr. Ryan says that the operators are refusing a large increase for coal than ever before, and they cannot make the excuse that the mines are not paying expenses. Mr. Ryan says that the convention will produce figures to show the total cost of mining a ton of coal and give the public an idea of the profit being reaped by the operators. Mr. Ryan will attend the convention, and no doubt lead the fight for higher wages.

Washington, Dec. 30.—A new oil painting of President Roosevelt now in the hands of the artist who decorates the private dining-room by the white house. It is life size and shows the president in his rough "guy" uniform. He stands in his position, holding his hat in his hand.

Frozen to Death.

Calumet, Mich., Dec. 30.—There was one fatality in the blizzard throughout northern Michigan on Christmas day. The body of Mrs. Ida Parkinson, 30 years of age, was today found frozen stiff.

Fatal Infection.

Washington, Dec. 30.—Chet Harris, a married man aged 35, shot and slightly wounded Alvin Edwards, a girl of 14 years, and then killed himself. He was infatuated with Miss Edmonds.

New Battleship Maine.

Philadelphia, Dec. 30.—The new battleship Maine was placed in commission at the navy yard Monday. She was turned over to Capt. Leidy, who will command her.

CHAS. AVERY, General Manager.

GRANTON. Harry Kvarts, of Blue Earth county, is visiting friends and looking after his land in this vicinity.

Our Graston merchants shipped eleven cars of wood between Christmas and New Year.

L. H. Wallace, of Aurelia, Iowa, visited with his son H. L. Wallace between trains last Monday.

O. H. Wallace killed a large timber wolf while returning from Graston Christmas day. They are quite numerous in this vicinity.

The farmers are all busy hauling wood in this corner of the county. It commands a good price and the shipping is the best we have had for several years.

Remember when you want to find the Pioneer office, that we have moved two doors North, in the Miller block, and that we are better prepared than ever to do all kinds of commercial and fancy job printing.

News of the Week.

Chips Picked up Around Town and Vicinity.

NOTICE

Hereafter all matter for publication and copy for advertisements must reach this office by Thursday morning.

A dance was given last evening in honor of the members of the Sandstone bowling team and friends. A very enjoyable time is reported. We carry a full line of silver table ware that will always remain the same color till worn out. You don't have to pay "jeweler's" fancy prices for these goods. Smith the Hardware Man.

Miss Emma Axtell won the prize in the perfume contest at Breckenridge's pharmacy, having written the sentence, "Christmas Goods at Breckenridge's Pharmacy" 421 times. The others did very well also.

If you are going to build call at Wiseman & Co. and get prices on glazed sash.

At cost—Glazed Sash—Wiseman & Co.

Frank Baumbach, of Beroun, was a county seat caller on Tuesday. Buy your mangle and rutabaga seed at Madden's.

S. G. L. Roberts departed on Monday for St. Paul, accompanied by two of his daughters, the elder of which he took down to a specialist, they fearing that she had hip disease. We are pleased to state that after a most careful examination nothing of the kind was found.

Abe's Window—Prettiest display in town. Store of Wiseman & Co.

Mrs. Dorsett and two daughters returned on Thursday from Chicago where they have been on a visit for the past couple of months.

Closing out, our stock of glazed sash. Wiseman & Co.

Mr. and Mrs. E. E. Barum celebrated the twenty-fifth anniversary of their marriage on Christmas day, which was remembered in a very pleasant manner by their many friends at home and abroad, receiving a great many beautiful as well as useful presents.

Save money; buy your glazed sash where you can get it cheap at Wiseman & Co.

K. P. ATTENTION! Next Wednesday evening Jan. 7th will be installation of officers, after which there will be a banquet and smoke social. All members of the order are requested to be present.

Aesculapins is the best medicine the world has ever known for headaches, at J. Y. Breckenridge's Drug Store.

Mrs. Jas. D. Boyle's mother, who has been visiting with her daughter for the past month, returned to her home in Dakota Sunday afternoon.

All silver ware engraved free of charge when purchased of Swanson at Wiseman & Co's.

F. W. Kvech traded his saloon in the Pat Connor building to D. R. Waldron for a farm in N. Dakota. Frank informs us that he will not leave this place even though he has gone out of business.

A local team of bowlers were defeated yesterday afternoon by a team from Sandstone, on the Rath alleys in this place. Eight men constituted a side, and excitement ran high all through the game. Sandstone won the first game by a score of 1221 pins to Pine City's 974; the locals won the second, defeating their opponents by 77 pins. Pine City managing to knock down 1136 pins. Sandstone's 1059; but in the third and last game the P. C. boys fell down and could materialize only 882 points while Sandstone bowled 1138. In the three games played the visiting team bowled a total of 3418 pins while the locals could cure but 2292 and therefore were defeated by 426 points. The Pine City team did not bowl nearly up to their average, but the rule prohibiting breaking over the foul line and which heretofore had not been heeded by the local boys, went a long way towards their defeat. This is the first match game the team has played but as considerable interest is manifested in bowling in this place and as there is plenty of good material here for first class bowlers, we will look forward to more of these games.

Dr. E. L. Irving, Dentist.

at his office in the Rybak Block, Jan. 3-1 to 10th. Gas administered for the extraction of teeth.

Mrs. G. J. Albrecht and son, Clyde, departed Christmas for St. Paul where they went to receive special medical treatment for Clyde's throat, and to visit friends and relatives.

Lots of good bargains on the remnant counter at the Big Store.

H. C. Pitt, the local manager of the Minnesota Mutual telephone Co. and also of the American telephone and telegraph Co. from Forest Lake to Rutledge, has been under the weather for the past week with a touch of the la grippe.

Riverside Circle, Ladies of the Grand Army of the Republic will meet in K. P. Hall, Tuesday afternoon, Jan. 6th at 2 o'clock. A full attendance is requested and a 10 cent lunch will be served from 5 until 7 o'clock. Albina M. Nester, Pres.

We carry a full line of silver table ware, "Rodgers 1847" knives and forks, tea and table spoons. Nickel silver ware that will always remain the same color till worn out. You don't have to pay "jeweler's" fancy prices for these goods. Smith, the Hardware Man.

Arthur Olsen returned on Monday morning from St. Peter, where he spent Christmas and is again installed in the Pioneer office.

Mayor Smith has had barrels sunk in the ice for the benefit of the fire department, so that in case of fire all that will have to be done is break in both heads of the barrel and put in the suction hose. This is a good thing as when the ice gets so thick, by the time a hole is cut half the town might be burned. The council with Mr. Smith at the head, do whatever the fire laddies ask for without a murmur, and the boys appreciate it.

You can get your Patent Medicines as cheap at "The Drug Store" Breckenridge's Pharmacy as any place in the state. Special Prices on all 1.00, 50 and 25c preparations. The right place to buy your drugs and medicines, and save money, is at the Drug Store.

The Misses Pennington entertained Tuesday evening in honor of Mrs. Merton Radant, nee Jessie Westcott, of St. Paul, also the Misses Greeley and Wiseman, who are here for their holiday vacation.

Mrs. R. J. Gilmore and children, of St. Paul, is spending the week with her parents Mr. and Mrs. Furstenburg.

Don't fail to see the bargain counter at the Big Store.

We are pained to have to chronicle the serious illness of young Chas. Heywood with that dreadful disease consumption. He has been slowly failing for about a year but has only been confined to the house for a couple of weeks. At the last report he was a very sick young man.

Geo. Kiek has traded off his property next to Wm. Goslar's residence including the butcher business, for a farm near Beroun. Messrs. Kiek and Engler wish to thank their patrons for past favors, and wishing you all a prosperous and happy New Year they retire from business. The new proprietor expects to take possession today.

The firemen's masquerade ball on New Years eve was a grand success, both socially and financially. The Schmidt's North Branch orchestra furnished the music, and the boys never played better. The supper was served at the Wilcox house and was the best midnight supper ever given in this part of the state. The costumes were fine and there were about thirty-five maskers present. Kate Sticha representing the U. S. mail received the prize for the finest costumed lady, Dannie Dosoy took the prize for the finest costumed gentleman being dressed to represent an English captain. Mrs. Cooper was dressed as a typical Irish woman and took the ladies comic prize; Archie Enos as the tramp received the prize for the most comical costumed gentleman. The costumes were all good and it took the judges some time to make the choice.

The Price of Corn is GOING DOWN

and we can supply you with Cracked Corn and Feed direct from Nebraska at the Latest Market Prices.

Bran and Shorts at Lowest Market Prices.

PINE CITY MILL & ELEVATOR CO.

Frank Smith, son of Mayor Smith, who is working for Janey Sempke Co. of Minneapolis, came on on Wednesday to take in the Firemen's dance and spend New Year with his parents and friends.

Wiseman & Co. are very busy this week taking inventory. The whole force has been hard at work since before Christmas.

D. R. Waldron and John Holland departed on Sunday for North Dakota to look over Mr. Waldron's farm, the one he traded to F. W. Kvech for his saloon business.

Frank Radly has his bowling alley completed, and the lovers of the game can now have their choice of two alleys to play on.

Marshal McKusick, of Chalais, Maine, is visiting at the residence of his uncle, L. H. McKusick, this week. Mr. McKusick is a professor in a school in North Dakota.

John Stochi Jr. who is working in Minneapolis in a wholesale tobacco house, spent Christmas with parents and friends. He returned to the city on Sunday.

THE STORY TELLER

Her Brief Hour of Triumph.

A Romance of the Hop Fields.

By Marguerite Stahler.

"AY, Mollie," said Nolan, in an off-hand manner, "what's that fellow in the leggings doing up here?"

The sun had passed the meridian and the shadows were beginning to fall on Nolan's side. The hop-field code of courtesy demands that when a man is picking with a "lady" give her always the shady side. But Nolan, in his perturbation of mind, forgot his manners.

"Nolan," came indifferently from Mollie, feeling the August rays' pelting down upon her head, and remembering the thoughtfulness of the fellow in the leggings in pulling the tallest vines down on his side.

"Say, Mollie," asked Nolan, persistently, after a half-hour's silence, during which time several couples had caught the eye of the "lady" who might have the benefit of the shade, "what was he hangin' round you all mornin' for?"

"Nolan!" The black eyes were stubbornly glued to their work, while beads of perspiration stood out on the round, tanned cheeks.

Therefore, the "lady" vine was reached and stripped in oppressive silence. At length, after having decided to adopt a course of moody silence, which would break the haughty spirit of this girl, and make her hang upon his slightest word, Nolan heard himself say, before he knew it, in tones coaxing, to the "lady":

"Say, Mollie, what was he talkin' to you about, anyway?"

"Nolan!" Mollie's chin went in to the air and her lips snapped together like the blades of a jack-knife. The beads of perspiration had grown into rivulets that trickled from nose to chin, and splashed on the market. The market of the row was picked in silence. The foreman of the field rods by several times, taking and more work being done between the two than usual, and when at last the shadows grew so long it did not matter which side by the way was on, and the men began to feed behind a bank of smoke and dust, the joyful sound of the quitting bell pealed over the field.

Arms just lifted to reach a vine, hands in the act of stripping a branch, fingers just crooked to pick a last hop, stopped and fell empty at the sound of the quitting bell. The happy Nolan could not stop his thoughts so quickly, nor resist a last appearing. "Say, Mollie, what's the matter with you, anyway?"

"But the maid only threw a defiant 'Nolan!' over her shoulder as she was joined at the end of the row by a tall fellow in the leggings. The black eyes lost their defiance, the lips ripped into smiles as she pushed her sun-bonnet back and looked up into the laughing face under the sun-bonnet.

"Great place, isn't it?" the tall fellow picked half to himself, as he watched the pickers fling by—Chinese, Indians, Japs, and whites of every brand, and all sorts and conditions. There was the objectionable element of "hookers," but the majority of the pickers were the men who, after harvesting their own meagre little hop crops, packed their wagons, loaded to their families, whistled to their dogs and started off for a three or four weeks' camp in the hop-fields. With these camps it is a regular institution, and the one interesting occasion of the year. Here new acquaintances are made, foot-hill gossip exchanged, the district gossip, false flirtations and romances spring up, flourish, and die, with the hops.

Mollie stole a one-sided glance at the fellow in the leggings, and took in every detail as his eyes followed the crowd. She held her head just a trifle higher than usual when familiar faces looked up and saw her chatting with this fish-looking fellow in the corduroy knickers. In fact, when some of the Coon Creek friends came along, she found her in conversation with the tall fellow in the leggings, who in refined society their "Hello Mollie" would not be considered good form.

"How long have you worked here?" the tall fellow asked her, shortening his stride to fall in with her little trip.

Mollie, delighted to be called upon for information, gurgled out everything she knew about the hop-fields: the advantage of being paid by the piece instead of the day, the amount the average picker could make a day, the weighing in the baskets, the processing in the kiln, the pressing and baling and the joys of the dance given every Saturday night. Adding, for she could scarcely believe this distinguished-looking personage could be a common picker like Miss Nolan and Piny Smith, and the rest of them: "Are you visiting at Hop-toway?"

"No," the fellow laughed, "I'm a citizen if I can stand these beastly hours. For the next few weeks I'm a son of the soil in order to fill up my coffers for the next summer." This fellow related the surprising power of the black eyes beside him, and Mollie, having studied short primer and

chemistry, felt herself on an intellectual level with this college senior.

As they heard the camp she was mistress of the foot-rod curious eyes peering at her from under tent flaps, but tucking her chin up into the air she walked along as oblivious of those spectators. If she and this new friend were alone in a wilderness.

Before picking the next morning it was thoroughly understood by all the pickers on Mollie's side of the field that Nolan's race was over, and that Mollie had a new "steady" from "below," as the western counties are termed by the inhabitants of the northern.

Nolan, his wrath cooled by a night's rest, became aware of this fact when he waited at the usual tramping place by the first row of poles, and saw the tan sunbonnet looming up in the wake of the blue sun-bonnet. The rest of the day he was pursued by the cheerful files of his friends about being thrown down for a city crowd. Poor Mike, even his daughter's good humor went down under their clumsy efforts at consolation.

The April day was not the only one suddenly effaced from the girl's flimsy memory. There were Piny and Spike, and Big Terry, into whose arms Mollie had flung herself, her black eyes had burned big holes, now not even when they passed her on the row.

The sun under the sunbonnet lost nothing of the situation. This little girl was undoubtedly pretty after a sort of wild-type type, and certainly had a laugh that was highly agreeable to him, and he spared no opportunity to produce that effect. Her cheeks, too, had a frank little glow of going pink—sometimes red—when the attention was direct enough to find together her open admiration put a fine gold edge on his self-esteem.

"The fellow who was in the leggings, he said he was from San Francisco," he asked her one day.

"No, I've never been there," she admitted, hesitatingly, but she hastened aside in order to dispel any idea of rusticity that admission might have given. "I've been twice from Coon Creek."

"Have you ever thought you might like to live there?" he pursued, reaching up to pull down a cut vine from the pole. His hand was very erect this time, and his tones full of meaning. It was pretty to see her eyes and cheeks glow with a deeper hue, and when she could not resist the slight touch. He did not wait for an answer, but went on: "Wouldn't you like to live there?"

But just then the Sacramento train thundered by on the trestle, drowning his words, but not the look in his eyes. For the moment he forgot the moon bell rang, at which every body quit work, and they walked up to the settlement together in silence. But when they reached the ground only in high places, her foolish little head 'way up in the clouds, the man's thoughts miles away, she was about him, and the hope of his heart centered on getting on the "variety" football team.

By the end of the season Miss Mollie had had her share of the attention to few more than her own family, and one tall man. She had discovered her tastes to be of the climbing variety, and had reached the fatal conclusion that not one of her old friends at Coon Creek possessed a particle of culture or style. And when, before dispersing for another year, the pickers were to give a grand ball in honor of the wind-up of the hop season, Mollie determined to show them the size of the girl that she felt, yawning behind herself, and them.

"These hop-pickers' dances are open to every one, so there are not many essential conditions to be met. The men exchange their bandana neckerchiefs for stiff celluloid collars, and the girls wash out a sprigged gown for a more radiant and ready-made frock. But Mollie, with a reckless slash into her summer's earnings, burst upon the scene, on the eventful evening, an animated billow of frills, and flounces, and furrows.

As the frolic progressed the tall fellow with his sunbonnet under his arm, watched the scene from the doorway with an amused, wondering smile. The big dining room that seated five hundred hungry pickers after which there were poles, and formed in less than an hour into a dancing hall. The tables had been hoisted to the ceiling by stout bales of hops, and they were crowded to the rafters, while the shelf that ran the length of the room on both sides was studded at regular intervals with empty bottles, into each of which was stuck a tall candle.

After the good old-fashioned custom, Piny Smith, with a girl in a yellow frock, led off the grand march. The tall fellow in the leggings and the girl, dressed in the latest fashion, followed. The tall fellow in the leggings and the girl, dressed in the latest fashion, followed.

When at last the dance was over, the fellow in the leggings, and hezel out the plaintive strains of "Home, Sweet Home," and the happy dancers swirled in twos for the best part of the evening's frolic. The tall fellow in the leggings—Mollie wondered, in her simple little soul, if Heaven could be any better than this.

Her companion did not tell her that he was going away the next morning until they had reached her own tent door. He had fancied she might be sorry he had not brought her some more care so much. He was sorry the moon was not brighter, for he knew he was missing much of the tell-tale play of expression in her eyes and cheeks, and when she repeated protestations of remembering her until his dying day, and promises of coming up to Coon Creek to see him, he had to be content with first chance he got, he took her hand to say "good-by," and bent so low her cheeks flamed up as red as her lips. But she could not resist the angry as she pretended to be, because, after the lights were out all up and down the line, they were still saying "good-by."

It was not a long walk to Hop-toway station, and next day the tall young fellow, again in tweeds and a Panama hat, tramped up and down the platform, impatient, to be back into the stir and bustle of the life he had left, and recounting to himself the incidents of the last night's chances of getting on the "variety" team as half-back.

"Hello, old man!" he shouted, as he jumped on the step, wondering at this gathering of the clans.

"Hello! Hello!" a volley of voices echoed as he entered the car. "Just coming down from Shasta," one of the fellows explained, "my sister and some friends of hers in the car. Come on!"

The train moved slowly when it reached the station. Mollie had counted on that, and hurried to the end of the hop-field so she might get a last smiling adieu from the car window. Four, five, six windows slipped by, and her heart began to flutter at the eighth, there he was, looking toward her, too. The black eyes widened as the window came abreast of her facepost. Yes, his head was turned in her direction, but why, oh, why, did he not see her handkerchief waving wildly at him? The next moment brought into view a fair-haired girl in the seat behind him, and the same look, the same smile she had lived upon all these weeks were bent upon her. It could not be possible that he had forgotten her already! Still, trusting little Mollie would her handkerchief, and then her hand. The red glow was turned in her direction, but he had eyes for no one but this trim-looking girl with the white dotted veil. A moment more and the train was gone, the rear end of the baggage car grew smaller and dimmer, till it was out of sight.

When the frolic night finally turned back to the hop-field, the tall fellow in her throat and an empty ache in her heart, the one or two Coon Creek people she met her here and there, but they were not expected to speak to her. At the turn in the road she passed a hilarious group of pickers exchanging types of the latest promises, but they were again new. Piny was there, laughing peanuts and gam on the crowd, and though he saw her, he did not look at her. The tall fellow in the leggings and the girl were not expected to speak to her. The rest of the day he was pursued by the cheerful files of his friends about being thrown down for a city crowd. Poor Mike, even his daughter's good humor went down under their clumsy efforts at consolation.

The April day was not the only one suddenly effaced from the girl's flimsy memory. There were Piny and Spike, and Big Terry, into whose arms Mollie had flung herself, her black eyes had burned big holes, now not even when they passed her on the row.

The sun under the sunbonnet lost nothing of the situation. This little girl was undoubtedly pretty after a sort of wild-type type, and certainly had a laugh that was highly agreeable to him, and he spared no opportunity to produce that effect. Her cheeks, too, had a frank little glow of going pink—sometimes red—when the attention was direct enough to find together her open admiration put a fine gold edge on his self-esteem.

"The fellow who was in the leggings, he said he was from San Francisco," he asked her one day.

"No, I've never been there," she admitted, hesitatingly, but she hastened aside in order to dispel any idea of rusticity that admission might have given. "I've been twice from Coon Creek."

"Have you ever thought you might like to live there?" he pursued, reaching up to pull down a cut vine from the pole. His hand was very erect this time, and his tones full of meaning. It was pretty to see her eyes and cheeks glow with a deeper hue, and when she could not resist the slight touch. He did not wait for an answer, but went on: "Wouldn't you like to live there?"

But just then the Sacramento train thundered by on the trestle, drowning his words, but not the look in his eyes. For the moment he forgot the moon bell rang, at which every body quit work, and they walked up to the settlement together in silence. But when they reached the ground only in high places, her foolish little head 'way up in the clouds, the man's thoughts miles away, she was about him, and the hope of his heart centered on getting on the "variety" football team.

By the end of the season Miss Mollie had had her share of the attention to few more than her own family, and one tall man. She had discovered her tastes to be of the climbing variety, and had reached the fatal conclusion that not one of her old friends at Coon Creek possessed a particle of culture or style. And when, before dispersing for another year, the pickers were to give a grand ball in honor of the wind-up of the hop season, Mollie determined to show them the size of the girl that she felt, yawning behind herself, and them.

chemistry, felt herself on an intellectual level with this college senior.

As they heard the camp she was mistress of the foot-rod curious eyes peering at her from under tent flaps, but tucking her chin up into the air she walked along as oblivious of those spectators. If she and this new friend were alone in a wilderness.

Before picking the next morning it was thoroughly understood by all the pickers on Mollie's side of the field that Nolan's race was over, and that Mollie had a new "steady" from "below," as the western counties are termed by the inhabitants of the northern.

Nolan, his wrath cooled by a night's rest, became aware of this fact when he waited at the usual tramping place by the first row of poles, and saw the tan sunbonnet looming up in the wake of the blue sun-bonnet. The rest of the day he was pursued by the cheerful files of his friends about being thrown down for a city crowd. Poor Mike, even his daughter's good humor went down under their clumsy efforts at consolation.

WORD OF THE PAST.

...guarantee of the future... of the past, and over fifty... people have publicly testified... Doan's Kidney Pills have cured... of numerous kidney ills, from... common backache to dangerous dia... betics, and all the attendant annoy... ances and sufferings from urinary dis... orders. They have been cured to stay... cured. Here is one case:

Samuel J. Taylor, retired carpenter, residing at 212 South Third St., Golden... Ind., says: "On the 25th day of August, 1897, I made an affidavit before... Jacob C. Mann, notary public, stating... my experience with Doan's Kidney... Pills. I had suffered for thirty years... and was compelled at times to walk... by the aid of crutches, frequently... passed gravel and suffered excruciat... ingly. I took every medicine on the... market that I heard about, and some... gave me temporary relief. I began... taking Doan's Kidney Pills, and the... results gave to the public in the state... ment above referred to. At this time... on the 19th day of July, 1900, I make... this further statement, that during... the five years which have elapsed I... have had no occasion to use either... Doan's Kidney Pills or any other med... icine for my kidneys. The cure effect... ed was a permanent one."

A FREE TRIAL of this great Kidney medicine which cured Mr. Taylor will be mailed on application to any part of the United States. Address: Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

PROFESSIONAL OPINION.

of a Lawyer to His Bar- who Was Cutting in on His Business.

Barner judge, now practicing law, interested when told by a lawyer that the latter had written a view to submission to the... with a view to admission to the... of the Philadelphia Times. The... lawyer encouraged him in every way... lending him books and giving him... an informal lesson while being... each morning. Soon the barber began... giving hypothetical cases to the... gravely, soundly and painstakingly... gave information as to correct procedure. After... a time the expert learned that the... lawyer was acting as a relative... for his friends, who invariably profit... following his advice. The following morn... the barber opened up his shop and... be described as an imaginary bit of... to the barber's credit, and he was... asked.

Now, judge, what do you advise? "Let-me-see," replied the lawyer, m... ingly. Then, "Why, I advise that you... come see me at 410 as a fee, and I'll... you how the case should be handled."

ABSOLUTE SECURITY. Genuine Carter's Little Liver Pills. Must Bear Signature of Dr. Wood. See Pac-Stimulo Wrapper Below. Small and easy to take as sugar. FOR HEADACHE, FOR DIZZINESS, FOR BILIOUSNESS, FOR TORPID LIVER, FOR CONSTIPATION, FOR SALLOW SKIN, FOR THE COMPLEXION.

ARE YOU SATISFIED? Are you entirely satisfied with the goods you buy and with the prices that you pay? Over 2,000,000 people are trading with us and getting their goods at wholesale prices. Our 1,000-page catalogue will be sent on receipt of 10 cents. It tells the story. Montgomery Ward & Co. CHICAGO. The house that sells the truth.

FRUIT GROWERS... TRUCK FARMERS... INVESTIGATE THE 40-Acre Tracts FOR SALE ON THE LINE OF THE OHIO IN THE CELEBRATED Peach Belt of Alabama. This is a rare opportunity for profitable investment. If you are looking for a better opportunity if you are looking for a permanent and increasing income in a healthy climate and pleasant surroundings. To get in touch, write JNO. M. BEALL, Asst. Gen'l Passenger Agent, M. & O. R. R., ST. LOUIS, MO.

INDUSTRY & MECHANICS

WHAT ELECTRICITY IS.

The Result of Splitting the Atoms of Elementary Substances Into Yet Smaller Units.

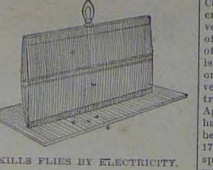

What is electricity? This question is now answered by many scientific men in a way that would have astonished the most advanced thinkers of a score of years ago, and yet the conclusions seem to be supported by the latest experiments, explains the People's Magazine. According to them, electricity is purely material, and is the result of splitting the atoms of elementary substances into yet smaller units. An atomic chip or electron, is the unit of so-called "negative electricity," and what is left of the atom is "positively charged," as we used to describe it. The so-called "cathode rays" are jets of electrons, and where these strike a solid they produce the explosive effect which we know as Roentgen rays. In certain atoms, as those of iron, the free electrons cleave about the remainder of the atom, and this constitutes the phenomenon of magnetism. These who hold these views assert that they have thus discovered, isolated and even weighed the electric substance, and may indeed prove to be the primordial substance—the "prytyle"—of the philosophers.

Internal Parts in Action. Internal parts of the living body in action have been photographed by Dr. P. H. Elyman. In investigating the motion of the tongue, pharynx and larynx in swallowing, he fixes an electric contact in every way possible, the movement of which closes a current defining the X-ray tube during the motion. He got a distinct photograph it is necessary to repeat the motion 120 or 130 times. The contact is altered for obtaining a different phase of the swallowing. Despite the difficulties of this curious experiment, finely good photographs have been made, and they throw new light on the working of the organs of the throat.

ELECTRIC FLY KILLER.

It Catches a Current in Flies Through the Insect's Bodies and Instantly Kill Them.

Nothing less than the electrocution of flies is the end the inventor of the electric fly-killer seeks to attain. The invention is designed especially for use in stores, kitchens, dining-rooms, etc., and is arranged to lure the insects to light on thin apparatus by providing suitable bait and then to pass an electric current through bodies to instantly electrocute them. This fly-killer consists of a frame made of insulating material, either wood or hard rubber, and having a half-rodler midway between the top and bottom of the frame. Vertical strips of metal which form the insect-troubling apparatus. These metal strips are connected alternately to the positive and negative wires of an electric circuit and it is obvious that an insect alighting on the strips must come in contact with both the positive and negative strips at the same instant, when the passage of the current through its body accomplishes the desired end.

KILLS FLIES BY ELECTRICITY.

Arrangement is made to suspend the fly-killer from the ceiling or to place it on a table or counter and as it carries no poison there is no danger of the insecting groceries or eatables if the apparatus fails to work in every case. The inventor is Edwin H. Greene, of Providence, R. I.—Chicago Daily News.

Air Ship of a Spider. A Texas spider weaves a balloon four feet long and two feet wide, which fastens to a tree by a single thread, then marches on board with her half dozen little ones, cuts the thread, and away goes. The air ship to some distant point on the prairie.

TOPICS OF INTEREST.

Live merchants are a reproach to unimproved morals. Advertising in the local paper induces home patronage. In Russia only 13 in 10,000 people are made intelligent the rate is 37. The island of Sakhalin, the great penal colony of Russia, has splendid forests of fir and pine. For a quarter of a century no new houses have been built in the Essex (England) village of Slindon.

A FINE COUNTRY.

Resident of Ohio Says Western Canada is an Ideal Land for Farmers and Ranchers.

A delegate from Ohio to Western Canada says: "The whole of Western Canada seemed to me to be a very fine country, but I spent most of my time about thirty miles east of Lacombe, in Alberta, near what is popularly known as the coal banks on the Red Deer River, and I am very pleased to report that the country appears to be everything that the Agents of the Canadian Government have claimed for it. Good water can be obtained almost anywhere from 17 to 40 feet, and fed generally by springs. The natural hay and grass were magnificent in their growth and wild pea vines very heavy. I met some of my friends who moved there seven years ago, and two brothers who had absolutely nothing on their arrival seven years before now own two and a half sections of land and are very rich. They told me that they did not feel their stock all winter, in fact, never saw them again until the spring, when they came home. I found without loss. I galloped out 6 ft. 4 high and running from 75 to 100 bushels per acre. It appeared to me that all grasses, wild and cultivated, are in perfection in any part of Alberta that I saw, and the farmers were cutting from two to three tons of wild hay to the acre. I saw the country was desirable in every respect, and I am told that the winter is the finest part of the year. There is plenty of coal and iron to be had at hand for the hauling, and such is my satisfaction with the country that I acquired some land and have put a bunch of cattle there, and I can confidently recommend Western Canada as a suitable place for farmers to immigrate to, and can assure them the kindest sentiments by me. There, no doubt, is a country where you can get much so that one does not distinguish the fact that we have left the boundaries of the United States."

THE OLD FOLKS AT HOME Are Never Without Peruna in the House for Catarrhal Diseases.

MR. AND MRS. J. O. ATKINSON, INDEPENDENCE, MO.

In a letter dated January 10, 1900, Mr. Atkinson says, after five years' experience with Peruna: "I will ever continue to speak a good word for Peruna. In my rounds as a traveling man I am a walking advertisement for Peruna and have induced many people during the past year to use Peruna with the most satisfactory results. I am still cured of catarrh." John O. Atkinson, Independence, Mo. When old age comes on, catarrhal diseases come also, systemic catarrh is almost universal in old people. This explains why Peruna has become so indispensable to old people. Peruna is their safe-guard. Peruna is the only remedy yet devised that meets these cases exactly. Such cases cannot be treated locally; nothing but an effective systemic remedy could cure them. This is exactly what Peruna is. If you do not receive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis. Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

THE WORLD'S COAL PRODUCTION.

The coal production and consumption of the world is the subject of a monograph issued by the treasury bureau of statistics. The capability with which the production of coal has increased may be appreciated when the present volume is considered and when we reflect in how recent a time the production formed but a very small fraction of that quantity. In 1901 the total coal production of the world was \$60,055,000 tons. Until as late a period as 1853, the world's production had never been half so great, being only 450,990,000 tons in that year; and not until 1872 had the world's production been as much as a third as large as it is at present. In 1801 the total coal production of the world was \$60,055,000 tons, or less than 23 per cent of the production of 1901. The statistics for earlier periods cannot be determined with any accuracy, but on the basis of the British statistics from 1854, and of estimates for earlier periods, and from such statistics as are available from France, Germany, Belgium and Austria, an approximation may be made of the actual production. In 1850 the world's production of coal was about 144,000,000, or less than one-fifth of the production of 1901, and less than the production of either the United States or the United Kingdom at present. Ten years earlier the world's production amounted to only about \$3,900,000 tons, considerably less than the present output of the single state of Pennsylvania. In 1840 the production was much smaller still, amounting to little over 45,000,000 tons, or about one-seventeenth of the present output, while in 1801 the world's production was only 17,000,000 tons, or less than one-fiftieth of the production of 1901. The statistics for earlier periods cannot be determined with any accuracy, but on the basis of the British statistics from 1854, and of estimates for earlier periods, and from such statistics as are available from France, Germany, Belgium and Austria, an approximation may be made of the actual production. In 1850 the world's production of coal was about 144,000,000, or less than one-fifth of the production of 1901, and less than the production of either the United States or the United Kingdom at present. Ten years earlier the world's production amounted to only about \$3,900,000 tons, considerably less than the present output of the single state of Pennsylvania. In 1840 the production was much smaller still, amounting to little over 45,000,000 tons, or about one-seventeenth of the present output, while in 1801 the world's production was only 17,000,000 tons, or less than one-fiftieth of the production of 1901. The statistics for earlier periods cannot be determined with any accuracy, but on the basis of the British statistics from 1854, and of estimates for earlier periods, and from such statistics as are available from France, Germany, Belgium and Austria, an approximation may be made of the actual production. In 1850 the world's production of coal was about 144,000,000, or less than one-fifth of the production of 1901, and less than the production of either the United States or the United Kingdom at present. Ten years earlier the world's production amounted to only about \$3,900,000 tons, considerably less than the present output of the single state of Pennsylvania. In 1840 the production was much smaller still, amounting to little over 45,000,000 tons, or about one-seventeenth of the present output, while in 1801 the world's production was only 17,000,000 tons, or less than one-fiftieth of the production of 1901. The statistics for earlier periods cannot be determined with any accuracy, but on the basis of the British statistics from 1854, and of estimates for earlier periods, and from such statistics as are available from France, Germany, Belgium and Austria, an approximation may be made of the actual production. In 1850 the world's production of coal was about 144,000,000, or less than one-fifth of the production of 1901, and less than the production of either the United States or the United Kingdom at present. Ten years earlier the world's production amounted to only about \$3,900,000 tons, considerably less than the present output of the single state of Pennsylvania. In 1840 the production was much smaller still, amounting to little over 45,000,000 tons, or about one-seventeenth of the present output, while in 1801 the world's production was only 17,000,000 tons, or less than one-fiftieth of the production of 1901. The statistics for earlier periods cannot be determined with any accuracy, but on the basis of the British statistics from 1854, and of estimates for earlier periods, and from such statistics as are available from France, Germany, Belgium and Austria, an approximation may be made of the actual production. In 1850 the world's production of coal was about 144,000,000, or less than one-fifth of the production of 1901, and less than the production of either the United States or the United Kingdom at present. Ten years earlier the world's production amounted to only about \$3,900,000 tons, considerably less than the present output of the single state of Pennsylvania. per cent. Dividends.

Spindle Top Lands Have the Only Cushers.

No other field on earth can compare with its already enormous output. 500,000 barrels were produced and consumed in 1901.

WE OWN OUTRIGHT ONE-HALF ACRE OF THE CORE.

Most companies own 1-16, 1-32 or 1-64 of an acre of proven oil land on Spindle Top. We lead all Minnesota companies

A Home Company and a Home Market.

Minnesota business men control the affairs of the company and we have already established a market for the oil in St. Paul, Minneapolis, Red Wing and other Minnesota cities.

The Minnesota Oil Co., of Texas,

If you cannot call 403 Bank of Minnesota Bldg. write for particulars. ST. PAUL, MINN.

Burlington Route

St. Louis and the South

Are conveniently and comfortably reached by our two trains a day.

The Limited, leaving Minneapolis at 7:50, St. Paul 8:35 p. m. daily, arrives in St. Louis the following afternoon. Combination Compartment and Standard Sleepers and Reclining Chair Cars.

The Scenic Express, leaving Minneapolis at 7:30, St. Paul 8:05 a. m., except Sunday, arrives in St. Louis early next morning. Sleeping Cars from Rock Island south.

This is the most direct route from Minneapolis and St. Paul to Clinton, Dayton, Rock Island, and all Mississippi River cities. Passengers by either train make close connections with lines south southeast and southwest in St. Louis Union Station.

ASK YOUR HOME AGENT FOR TICKETS VIA THE BURLINGTON.

The Worst Form.

Multitudes are singing praises of Kodol, the new discovery which is making so many sick people well and weak people strong by digesting what they eat, by cleansing and sweetening the stomach and by transforming their food into the kind of pure, rich, red blood that makes you feel good all over. Mrs. Gerald, of Troy, T. writes: "For a number of years I was troubled with indigestion and dyspepsia which grew into the worst form. Finally I was induced to use Kodol, and after using four bottles I am entirely cured. I heartily recommend Kodol to all sufferers from indigestion and dyspepsia." Take a dose after meals. It digests what you eat.

Natural Anxiety.

Mothers regard approaching winter with uneasiness, children take cold so easily. No disease costs more little lives than croup. It's attack is so sudden that the sufferer is often beyond human aid before the doctor arrives. Such cases yield readily to One Minute Cough Cure. Liquifies the mucus, allays inflammation, removes danger. Absolutely safe. Acts immediately. Cures coughs, colds, grip, bronchitis, all throat and lung troubles. F. S. McMahon, Hampton, Ga. "A bad cold rendered me voiceless just before an oratorical contest. I intended to withdraw, but took One Minute Cough Cure. It restored my voice in time to win the medal."

Kodol Dyspepsia Cure

Digests what you eat.
This preparation contains all of the
digestants and digests all kinds of
food. It gives instant relief and never
fails to cure. It allows you to eat
the food you want. The most sensit-
ive stomachs can take it. By its use
thousands of dyspeptics have been
cured after everything else failed. It
prevents formation of gas on the stom-
ach, relieving all distress after eating.
Dieting unnecessary. Pleasant to take.

It can't help but do you good
Prepared only by H. W. BARKER & CO., CHICAGO.
The 25c bottle contains 2 1/2 ounces net wt.

Look Out for Fever.
Biliousness and liver disorders at the
season may be prevented by cleaning
the system with Dr. Williams' Pink Pills
for Pale People. These famous little pills
do not grip. They invigorate the bowels
gently, but copiously, and by reason
of the tonic properties, give tone and
strength to the glands.

Stepped Against a Hot Stove.

A child of Mrs. Geo. T. Benson,
when getting his usual Saturday
night bath, stepped back against a
hot stove which burned him severely.
The child was in great agony and
his mother could do nothing to pacify
him. Remembering that she had a
bottle of Chamberlain's Pain Balm
in the house, she thought she would
try it. In less than half an hour
after applying it the child was quiet
and asleep, and in less than two
weeks was well. Mrs. Benson is a
well known resident of Kollar, Va.
Pain Balm is an antiseptic liniment
and especially valuable for burns,
cuts, bruises and sprains. For sale
by J. Y. Breckenridge.

WANTED.

A young man to act as Local Ad-
vertising and business Manager.
