MIDLAND LUMBER & COAL COMPANY,

ED. GALLES, Manager. PINE CITY, MINN

LARGE SURPRISE PARTY

Wednesday Evening A Number Of Pine City Firemen Surprised Their Chief, J. M. Collins.

Tuesday morning Mrs. J. M. Collins informed some of the members of the Pine City Fire Department that their house, recently occupied by Geo. Ruffcorn, was vacant and if they were disposed they might get up a surprise on their chief, J. M. Collins. Accordingly it was noised around and Wednesday evening the firemen, their wives and a few invited guests assembled at the above named place and tendered J. M. a real old fashioned surprise.

The ladies furnished the good things to eat that were to be served later in the evening, and the gentlemen furnished the music for the dance in which way the evening was spent. Mesrs. Davis and Sisco furnished the music, which was thoroughly enjoyed by all those that were present. It was a surprise in truth as Chief Collins did not have the slightest idea that there was anything on the string until he went home about 9:30, when he found the dance going full swing. The merry-makers continued dancing until about 12 o'clock when the luncheon the ladies had prepared was enjoyed by all, and after a couple more dances the company departed for their homes having spent a very enjoyable evening with Chief Collins and wife.

DECORATION DAY SOON

Decoration Day Will Be Observed in Pine City in Appropriate Manner. March To Cemetery.

All people, all societies are asked and invited to participate in the parade to be organized at the G. A. R. Hall at 1 o'clock P. M. Monday May 30th. Our school will be in the parade and all of the teachers of the surrounding schools are asked to help. Teachers come in with the children and join in the parade. Kindly have each child intending to march bring a bunch of some kind of flowers as far as possible. Children who cannot get flowers will be provided with a flag. Report to D. Greeley at G. A. R. Hall by 1 o'clock p. m.

Citizen Committee.

MEADOW LAWN Specials.

Sunday school every Sunday at 10:30 a. m.

N. J. Edridge and wife and Mrs. Stephen Smith were callers at the county seat Saturday.

The rain has put a check on the forest fires that have been raging for the past week in every direction. The crops are backward owing to the dry weather, but since the rain they are beginning to look better. Walter Cutler is building a new house on his farm on section 16 south of M. T. Lahart's. He expects to move into it soon.

School closed last Thursday, Miss Fisher returning to her home at Pine City. Her many friends were sorry to see her leave. A surprise picnic was given the children in the grove. After a bountiful dinner was served, games were played, foot and potato races ran. Those who received prizes for being quick on foot were: Mrs. P. Chaffee, Grace Franklin, Lydia Nichols and Aaa Decker. Then after feasting on candy and popcorn for some time all returned to their homes having spent a very pleasant day.

MAY 23 AND 24 MondaY and TuesdaY

ARE THE CHI-NAMEL DAYS AT BRECKENRIDGE'S DRUG STORE.

An Expert Demonstrator, a lady, will be at our store on the above dates.

We want every lady in Pine City and vicinity to attend. It will be worth many dollars to you. Come in the mornings and don't forget the dates. This will be a rare opportunity for the ladies to learn how to grain and varnish their floors and wood-work.

The very latest in the treatment of old floors, dirt stained floors or soft wood floors, is the Chic-namel Parquetry Floor Stenciling process, by which any inexperienced person can produce the inlaid wood effect. It makes a \$100.00 floor at a cost of only 2 cents per square foot. Completely hides the old floor stains, streaks and all other blemishes. Ladies from the county, if you want nice floors, fix them yourselves at a very small cost. Anyway, come and see how it is done. Entirely Free. Remember the dates and come. Also beautiful imported Chic-namel Beads given free to every lady who attends. Tell your friends about it.

Breckenridge's Pharmacy,

PINE CITY - - - MINNESOTA.

4th JULY MASS MEETING

Dr. R. L. Wiseman Calls A Mass Meeting Of The Citizens For May 20.

I have been requested to call a meeting of the citizens at the Village Hall Monday evening at 8 p. m. May 23, 1910. All interested should come out and discuss the Celebration of July 4th.

The calling of this meeting at this time is a move in the right direction, as the way it has always been here all the other towns have gotten out their advertising and posters for a celebration before our citizens seemed to be aware that Independence day came every year.

A gentleman from St. Paul said this week that he always made his arrangements, like a good many others, the middle of June for spending the fourth.

He said that he had always thought he would bring his family and spend that day in the best place for a celebration on the Duluth short line, but we had been too slow and they had gone elsewhere.

All our citizens should turn out Monday, and let us get busy at once and have a good celebration once more.

ROCK CREEK.

Mrs. Parrent and niece leave in a short time for Canada, to visit at their old home for a couple of months.

The Ladies Aid gave a social at the hall last Friday evening for the benefit of the M. E. church. It was a success both socially and financially.

Mr. and Mrs. Felix Wilson took the morning train north Wednesday. We understand it is a business trip and that they will return in a few days.

A. M. Challen is having a drainage ditch dug on his 200 acre farm. Jas. Caroon has the contract. The ditch goes back to his dead-end and when completed will add greatly to the value of the farm.

Mrs. Earl Chaffee drove down from Chengwatana Sunday to visit her parents, Wm. Stevens and wife. The lady is always a welcome visitor at her home and among her acquaintances in this neck o' the woods.

Mr. Franson, of Deer Valley, is doing carpenter work for Mr. Martinson near here on the east road. He is finishing up his new residence on the inside, and when through will erect another building for storage purposes.

The Erickson Bros. have returned from their trip to Canada, and report that everything looks prosperous in that country. They did not as yet purchase land, but say they will do so in the near future. Our old store keeper we understand intends to move his family out to that country and make that their future home.

E. Johnson, our storekeeper and postmaster, says he is always on the lookout for live stock. He shipped a car load Friday and expects to ship another car Monday. He informs us that his store business has been on the increase ever since he got the post-office, and the Co-operative store is also reported to be doing an increased business. It looks at the present time as if we were returning back to our old business standard.

The report we made last week about the culvert that was put in the road by Caspar Novak, is not intended for the benefit of the road and public, but only for a passageway under the road so that the cattle can go from one pasture to the other the same having been fenced on the south side of the road. It really turned out to be an obstruction to the traveling public, as it is

three or four feet above the road and a straight up hill pull. Now the public travel on the side of the cattle pass, but will be compelled to drive over the same when Mr. Novak fences either side of the passage. If our honorable road overseer does not know about it, that gentleman should look to it and investigate the same personally, and then he can tell if it can be allowed to remain so or not.

MEADOW LAWN.

Joe Novey was a caller at the Lawn Monday.

Arlo and James Nichols spent Sunday at home.

Vene Holler was a caller at the Lawn Friday.

Mr. and Mrs. E. A. Scofield spent Sunday at the Edridge home.

Stephen Smith returned to the quarry city last week for the summer.

Frank and Ben Purdy were callers Sunday at the Akin home near Hinckley.

Miss Anna Fisher closed her term of school in district No. 73 last Thursday.

The welcome rain came at last and also it was light it did a vast amount of good.

Frank Novey and sisters Anna, Rose and Will Mista were callers at the Lawn Sunday.

Peter Donlon was called to St. Paul Tuesday by the serious illness of his mother and brother.

Our mail carrier, Chas. Dile is seriously ill. Jos. Thiry is acting as substitute at the present time.

Sam Heath and family and Mrs. M. O. Gupitl and grand-daughter spent Sunday at D. W. Scofield's.

Alfred Decker has returned from Minneapolis where he has been working for the past few months.

The flying dust we have with us, always.

Temper and a pistol make a bad combination.

It is popular to have "the brain storm" after you get caught.

An oak tree in Minneapolis committed suicide. No one will blame it.

One of the best things about the joy ride is that it so often turns out to be its own punishment.

It is feared that all the convicts in the various penitentiaries will at once begin writing poetry.

It is queer how these people who are going to be probed insist on a thorough examination of everything.

South American republics manage to have a scrap often enough to keep the limelight trained in that direction.

Another youth has gone wrong under the influence of dime novels. A little reading is still a dangerous thing.

"At this time of the year green is the unrivaled color," says the Boston Herald. Particularly if it is long green.

The end-seat hog is now fortified by a judicial decision, and he will no doubt hold tenaciously to all the seats he first gets.

One cannot at present secure a divorce at Reno, Nev., by telephone, but possibly Reno's facilities will be enlarged and broadened.

A newspaper story says that the bunco games in Mexico are the greatest in the world. Can the author have overlooked our own dear Wall street?

A hand in Springfield, Mass., says that he committed his crimes because there was something the matter with his head. There generally is.

A Cincinnati man failed with liabilities of \$1,200,000 and assets of \$400. No Wall street financier would look upon such an accomplishment as that as a failure.

Some eastern New York farmers are selling their cows and replacing them with Angora goats. It might be asked if this is a case of butting in or butting 'em out.

A large majority of the schoolboys of this country are earnestly hoping something dreadful may happen to William Slits of Boston because of his unportantlike propensity to acquire knowledge.

Announcement comes from fashion sources that "women's hats are larger." Of course this is a matter in which man has no vote, and what he may say or think does not count. But really it is necessary?

If conscription for army service in China were based upon the German plan an army of 20,000,000 soldiers could be put in the field, says the Philadelphia Record. Also, by the same plan, this nation would have an army of 5,500,000. But there is no sign that either the Chinese people or those of the United States would accept the plan.

The deaths from bubonic plague of two young women, daughters of the postmaster at Honolulu, Hawaii, offer convincing evidence that the germs of the plague linger on the islands, where the sanitary officials should toil unceasingly in order to suppress them. The same danger undoubtedly exists on the southern Pacific islands, where the rats should be made objects of unrelenting warfare.

That young Cambridge mathematical prodigy says in the fullness of his youthful wisdom that he is quite convinced he could construct a flying machine with which he could reach Venus in twenty minutes. He would use radium as a motive power. But it is noted that he has not said how much radium he would need or how much it would cost. There are other brilliant persons who could tell of the many wonderful things they might do if they could get a starter to do it with. And so long as it cannot be approved, the proposition is safe in staying his belief.

Rear Admiral Bacon of the British navy advocates the construction of larger battleships because in his opinion, with proper subdivision of the hull, they are not as likely to be sunk as a result of torpedo attack as the smaller ship. There is something in this, as the weight of armament carried by a large ship is not proportionately as large as that on the smaller ship. But it must not be overlooked that the torpedo is becoming more powerful under the develop of inventors, and the damage they inflict may be beyond the ability of even the best of compartmented hulls to withstand.

A wild deer in the vicinity of Three Lakes, Wash., looked horns in his mouth when he was shot. Both of them must have been gumtrees.

The latest and one of the biggest of the British battleships of the Dreadnought type is built largely after American plans, particularly as regards the construction of the turret and the turrets. Whether or not "blood is thicker than water," it is becoming evident that the greatest naval power in the world finds "Yankee ideas worth adopting."

EDWARD VII. DEAD--GEORGE V. REIGNS

LIFE OF GEORGE V. AT A GLANCE.

1865, June 3--Born at Marlborough House, London. 1877--Entered the navy. 1880--Promoted midshipman. 1884--Promoted lieutenant. 1888--Commander of torpedo boat. 1890--Commander of Gunboat. 1892--Became in direct line of succession through death of his elder brother, the Duke of Clarence. 1892--Created Duke of York. 1893--Promoted captain in the navy. 1893, July 6--Married Princess Mary of Teck. 1894--Prince Edward Albert, present heir, born. 1901--Made a tour around the world of the British possessions. 1901--Created Prince of Wales. 1905--Toured India for five months. 1910--Succeeded to the throne of England.

when the present king was only twelve years old. This was exactly in accordance with the future sovereign's boyish inclinations. He was born with a love for the sea, and throughout his period in the nursery and in the private schoolroom he was never so happy as when listening to tales of the sea as told by Rev. Lake Onslow, then rector of Sandringham, but formerly a sailor and naval instructor of the Duke of Edinburgh, the Prince of Wales' brother. George and his brother entered the naval service together and served as cadets, being treated much the same as are other embryo officers. George, however, made a regular profession of the navy, and was gradually promoted until, within a few weeks of his marriage, he had reached the rank of captain. In this service he took all the hard knocks which a sailor must use himself, and his readiness to do his share of the rough work won him the intense admiration of officers and men alike. It was on January 14, 1892, that George came into the direct line of succession to the throne, for on that day his brother, the Duke of Clarence, died of influenza. Up to this time he had been merely Prince George and, constitutionally speaking, a commoner, as are all members of the royal family until admitted to the house of lords.

The question then arose as to what title he should be given. It was decided that of all royal dukes that of Duke of York was most fitting for an heir apparent, since it dated from the time of Edward III, and had always been allotted to the second son of the sovereign until Queen Victoria broke the custom by creating her second son Duke of Edinburgh. So Prince George, as he afterwards became Duke of York, Earl of Inverness and Baron Killarney. On the accession of his father to the throne in 1901 he became Prince of Wales, Duke of Cornwall and Duke of Rothesay in Scotland. Although the propriety of a wedding between George and Princess May was questioned in some quarters, the vote of the critics was lost in the general burst of approval from the people. Princess May at that time was extremely popular, while George himself was much more popular than he has been since. The English people welcomed the idea of a union between these two, and the marriage took place in the royal chapel of St. James on July 6, 1893, amid general rejoicing in England and the colonies. Six children have sprung from this union. Prince Edward Albert, the eldest of the family, was born in 1894. He is now next in succession to the throne and will probably be created Prince of Wales almost immediately. The other children and the dates of their birth are: Prince Albert Frederick, 1895; Princess Victoria Mary, 1897; Prince Henry William, Prince John George Edward, 1905, and Prince John Charles.

Prince Albert Victor, Duke of Clarence and Avoncliff. Prior to that time he had been at liberty, as a mere second son of the then Prince of Wales, the late king, to follow in large degree his own inclinations. These inclinations were for a quiet life, with little of pomp and public appearance. He wanted to live unostentatiously and to pursue his career in his own way. He had married, organically, a woman whom he loved and who loved him—a niece of Vice-Admiral Tryon of the British navy, who lost his life in the Victoria-Camperdown collision in the Mediterranean in 1893. The wedding took place in the English church at Malta, and two children were born to the couple. Such was the situation of George's life in January, 1892, when the Duke of Clarence died. George found himself heir to the throne, with vast duties awaiting him. Immediately his entire life was changed. He had to give up the sea, he had to part from his morgnatic wife, he heir to the throne of the British empire faced duties inconsistent with the life possible to a prince not in the direct line of succession.

Men who were in a position to know declare that George renounced his quiet life as the "smaller prince" and he had to part from his morgnatic wife, he heir to the throne of the British empire faced duties inconsistent with the life possible to a prince not in the direct line of succession. Men who were in a position to know declare that George renounced his quiet life as the "smaller prince" and he had to part from his morgnatic wife, he heir to the throne of the British empire faced duties inconsistent with the life possible to a prince not in the direct line of succession.

Not only was George, when he became heir, forced to take up the public duties of the Duke of Clarence, but he was also obliged to marry his brother's fiancée, Princess Victoria Mary of Teck, or "Princess May," as she was popularly known, who had been chosen as the future queen of England, and her marriage to the Duke of Clarence was to have occurred in 1892. After the duke's death Queen Victoria ordered George to marry the present queen. In 1893 George did so, when the period of mourning for the Duke of Clarence was ended. The metamorphosis in the present king's life was then complete. Remembrance of these somewhat unusual events of George's career, perhaps aid in giving an understanding of the new sovereign.

It was on June 3, 1865, at Marlborough House, London, that George V. was born. He was the second child as well as the second son of the late King Edward and Dowager Queen Alexandra, then Princess of Wales, of Wales. The Duke of Clarence was his elder by seventeen months, and the two boys grew up close companions. The father, with an eye to fitting them for responsibilities at the head of a seafaring nation, dedicated them both to the navy. They were both entered in the service as cadets in 1877,

and in 1878, when the present king was only twelve years old. This was exactly in accordance with the future sovereign's boyish inclinations. He was born with a love for the sea, and throughout his period in the nursery and in the private schoolroom he was never so happy as when listening to tales of the sea as told by Rev. Lake Onslow, then rector of Sandringham, but formerly a sailor and naval instructor of the Duke of Edinburgh, the Prince of Wales' brother. George and his brother entered the naval service together and served as cadets, being treated much the same as are other embryo officers. George, however, made a regular profession of the navy, and was gradually promoted until, within a few weeks of his marriage, he had reached the rank of captain. In this service he took all the hard knocks which a sailor must use himself, and his readiness to do his share of the rough work won him the intense admiration of officers and men alike. It was on January 14, 1892, that George came into the direct line of succession to the throne, for on that day his brother, the Duke of Clarence, died of influenza. Up to this time he had been merely Prince George and, constitutionally speaking, a commoner, as are all members of the royal family until admitted to the house of lords.

Another hobby, shared with his wife, has been the preservation of every scrap of printed matter from newspapers or magazines bearing upon himself, his wife or his children. This is a collection in which some day will be of great value to the historian.

THE NEWS IN BRIEF.

Representative Lincoln Dixon was reappointed for congress by the Democrats of the Fourth congressional district of Indiana.

Charles Michelin, a young French aviator, was killed in the races at Lyons when his machine struck a derisk, which fell on him.

James H. Corrigan, assistant corporation counsel of Chicago under Mayor Carter H. Harrison, shot and killed himself at St. Paul.

Cotton and corn crops in Georgia were damaged by a hail-and-wind storm. At Culverton several houses were blown from their supports.

Eben Plympton, the Shakespearean character actor, who once supported Booth as Nero, is seriously ill in Roosevelt hospital, New York.

After six years of American effort on the isthmus of Panama it is shown by figures that 16,358,672 cubic yards of earth and rock have been removed.

Charles F. Willard made a successful cross-country flight at Alexandria, La., in a Curtiss biplane, covering a distance of 12 1/2 miles and return in 30 minutes.

Frank W. Rollins, a former governor of New Hampshire and banker of Boston, is under bond in New York with his wife and son on a charge of attempt to smuggle.

Through the will of Edgar S. Auchincloss, a New York importer, who died a few days ago, is revealed a "guide to investors" to be observed by his executors in the administration of his estate.

Two hundred monkeys, a part of the cargo of the liner, Great Walderssee, which has reached New York from Hamburg, are assigned to the Rockefeller institute, where they are to be used for experimental purposes.

An inspection of terminal property at Port St. Joe, Fla., by New York Central officials leads to the belief that the railroad is planning a southern route to handle Panama traffic when the canal is finished.

William Powers was released from the Missouri penitentiary at Jefferson City, where he has been serving a two-year sentence, on his promise to marry Miss Nannie Snapp of Gaul, whom he neglected several years ago.

A bill to authorize the United States Steel corporation to reclaim hundreds of acres of the submerged bed of Lake Michigan at Gary, Ind., and to extend a series of navigable waters 2,600 feet into navigable waters passed the senate at Washington. It is still pending in the house.

ALL TARRYTOWN GOES RIDING

John D. Rockefeller Gives His Neighbors Toys for Automobiles and Carriages—Paper Vests as Souvenirs. Tarrytown, N. Y., May 13.—John D. Rockefeller, always popular among the people of this town, is adding to that popularity this spring by his fondness for taking his friends and neighbors out on his famous "pleasant day" by without the old king inviting some of them, men, women and children, to ride with him in automobile or carriage, and it is safe to say that the invitations are seldom declined, for his vehicles are the best to be had, and the drives around Tarrytown are beautiful.

Mr. Rockefeller, before starting for a ride, always dons a paper vest, declaring it a great protection against colds, and he insists that his guests do the same. After the ride he refuses to take back the garments, and consequently in nearly every home in Tarrytown may be found a paper vest preserved as a memento of a delightful ride with the multi-millionaire.

U. S. Asks Cuba's Permit. Washington, May 14.—The state department has begun negotiations with the government of Cuba for permission to raise the wreck of the battleship Maine.

THE MARKETS.

Table with market prices for various commodities including LIVE STOCK, FLOUR, CORN, BUTTER, EGGS, CHICKENS, CATTLE, HOGS, SHEEP, and GRAIN. Columns include item names, prices, and locations like CHICAGO and MILWAUKEE.

Better Health. A Pleasing Sense of Health and Strength Renewed and of Ease and Comfort. Follows the use of Syrup of Figs and Elixir of Senna, as it acts gently on the kidneys, liver and bowels, cleansing the system effectually, when constipated, or bilious, and dispels colds and headaches.

Among the primary pupils enrolled in a Baltimore school this term is the son of a prominent business man of that city. One afternoon, at close of school, the youngster sought out his father in his office, to whom he said: "Dad, I'm getting tired of school. I think I'll quit."

"Why?" asked the astonished parent; "what's the matter, Tommy? I thought you were fond of going to school?" "So am, dad," responded the youngster, suppressing a yawn, "but it breaks up the day so."—Harper's Magazine.

BABY WASTED TO SKELETON

"My little son, when about a year and a half old, began to have sores come out on his face. I had a physician treat him, but the sores grew worse. Then they began to come out on his neck and other parts of his body, and then one came on his chest, worse than the others. Then I called another physician. Still he grew worse. At the end of about a year and a half of suffering he grew so bad that I had to tie his hands in cloths at night to keep him from scratching the sores and tearing the flesh. He died in a mere skeleton, and was hardly able to walk."

"My aunt advised me to try Cuticura Soap and Cuticura Ointment. I sent to a drug store and got a cake of Cuticura Soap and a box of the Ointment and followed directions. At the end of two months the sores were all well. He has never had any more of any kind since. I can sincerely say that only for Cuticura my child would have died. I used only one cake of Cuticura Soap and about three boxes of Ointment."

"I am a nurse and my profession brings me into many different families and it is always a pleasure for me to see the children and to recommend Cuticura Remedies. Mrs. Egbert Sheldon, Littlefield, Conn., Oct. 23, 1905."

Even Among the Hoboes. "Hallo, Dusty," said Weary Wagles, as the two tramps met in the street. "How's livin'?" "Sometim awful," replied Dusty Rhodes. "The cost of everything's gone up so a feller can't hardly get his three meals per."

"Humph!" ejaculated Weary. "I never knowed you to pay for nothin'." "No," returned Dusty, "but it's the solemn fact that along my route, where I used to have to ask only once for a breakfast, they make me ask twice these days."—Harper's Weekly.

The Simple Shepherd! A Cockney, while spending his holidays on the Highlands, met an old shepherd driving a flock of sheep. Wishing to show off a bit, he said:

"Now, if I were a shepherd I would teach the sheep to follow me."

"Oh, yes," said the shepherd, "and I'd give 'em a good kick in the hind if they saw another sheep in front they'd be sure to follow."—Tit-Bits.

Something Visible. "Show me some tarras, please. I want one for my wife." "Yes, sir. About what price?" "Well, at such a price that I can say: 'Do you see that woman with the tarras? She is my wife.'"

Old Feller's Paper? "Wright—He's going to call his new paper the Sausage Links."

Penman—In three sections, I suppose.—Yonkers Statesman.

A clear brain and Steady, dependable nerves Can win wealth and fame For their owner. Clear headedness and a Strong, healthy body Depend largely on the Right elements in Regular food and drink. Coffee contains caffeine—A poisonous drug. Postum is rich in the Gluten and phosphates that Furnish the vital energy That puts "ginger" and "hustle" Into body and brain. "There's a Reason"

ABOUT THE TOWN.

Chic-Namel Day at the Drug Store Monday, May 23. All ladies invited to attend. Don't forget the Date.

—Miss Sophia Versek spent Sunday with her parents and friends at Beroun.

—John Huber arrived home Sunday to spend a few days with his family and friends.

—The most up-to-date line of Buggies and Wagons ever shown in Pine County to be seen at the Smith Hdw. Co.'s store.

—Get one of those Five or Seven Tooth Cultivators at the Smith Hdw. Co.'s store at prices that others can't duplicate.

—Fred Priem and wife, who reside on a farm nine miles southeast of here were county seat visitors Wednesday on business.

—Jas. Hurley had the lobby of the Hotel Agnes papered and new linoleum put on the floors. It adds greatly to the appearance of the place.

—Ed. Peterson, of Henriette, drove over with his fast horse Wednesday afternoon. He made the Pioneer office a very pleasant call while in town.

—Miss Rose Cranton, who has been visiting friends in Willow River for the past few days, returned home on the noon train Wednesday.

—The service at the Methodist Sunday School Sunday will be in keeping with the day; the program will be used which has been prepared for the Sunday Schools of the world.

—The memorial services at St. Mary's Catholic church Sunday, May 29 will begin at eleven o'clock sharp. Everyone is cordially invited to these services.

—Mrs. Peter Olesan passed thru here on the north bound limited Wednesday enroute to her home in Cloquet, after spending a few days with her brother, who is at a hospital in Minneapolis.

—The rain of Sunday night was just what was needed and now everything is looking nice and green, and with a little warm weather the grain and garden truck will just spring from the ground.

—Norris Atchinson, son-in-law of Rev. H. Taylor, came up Wednesday morning from St. Paul. He brot with him a shetland pony by express for his son Richard. He purchased the pony at Fargo, N. D.

—William Kibbee, the copper king of Hinckley, has been spending the week in the county seat with his friend J. Bennett Smith, the veteran copper king of Pine County.

—Services as usual next Sunday at the Methodist church. Preaching at 11 a. m. and 8 p. m. by the pastor. It being the World's Sunday School Day, the morning sermon will be on "The value and influence of the modern Sunday School."

—The carpenters are busily engaged in putting in a hardwood floor in Stekl's hall. This is something that has long been needed and when completed the hall will have as fine a dancing floor as any.

—Bernard Vaughan, who is attending the State "U" in the law department, came up the latter part of the week and spent Sunday and the fore part of the week with relatives and friends. He departed for the scene of his school hours Wednesday.

—George Kunz, eldest son of Frank Kunz, who is a fireman on the Duluth & Iron Range Railroad, came down on the noon train Wednesday and was met here by his father and mother, who accompanied him on a visit to the twin cities, Mankato and other cities in the southern part of the state, where they have relatives and friends.

—Dr. Brown, of St. Paul, who purchased the Hart cottage at St. Elmo last fall, and whose wife has been staying at the lake for the past month, came up last Saturday and spent Sunday. He was accompanied by his son. They returned home on the noon train Monday.

—Clinton Breckenridge, who has been in the northern part of the state for the past couple of weeks, returned home the fore part of this week. We

ABOUT THE TOWN.

have been informed that he will leave for Virginia in a short time where he goes to play ball with the Virginia team. Clint is a good ball player and should be a valuable addition to the Range City team.

—Mr. Gray is getting ready to move and has a few household articles for sale. Several iron bedsteads and bedding; several small tables; 1/2 dozen dining room chairs; 1 good extension table; a good heater and several other articles he does not wish to take with him.

—Last Sunday morning one of the worst wrecks in the history of the Duluth Short Line branch of the N. P. Railroad occurred at Finlayson. A heavy freight train left the track at this place, piling up nine box cars and killing the fireman and head brakeman. The wreck was caused by an open switch. The switch was apparently opened by some unknown person.

—Pete Engel, J. Netser and Kape Cranton are the champion fishermen of the county. They went up to Lake Pokegama Wednesday afternoon and between the hours of 4 and 8 caught forty-five large Pike. This is no fish story, either, but if Kape could see well enough to count, he would, no doubt, have contradicted the others' veracity. Perhaps they counted double, anyway.

—The World's Sunday School Day will be observed at the M. E. church Sunday, May 22. The World's Sunday School Association program will be used. Short addresses will be given. Special music by the Young Peoples' Chorus Choir. Parents and friends are cordially invited to come. Service begins at 9:45 a. m.

—J. Adam Bede's great lecture, "Our Country—It's Problems and Progress," Friday evening, May 20, at the M. E. church, given under the auspices of the Clover Club. This subject, discussed by a man of Mr. Bede's ability and experience should fill the seating capacity of the church.

—The copper mine at Chengwatana is running full blast and they are finding ore that makes the natives sit up and take some notice. It is a cinch that the J. Bennett Smith Copper Mine Co. of Chengwatana, have struck the richest ore of any mine in the county and if the present indications continue the mine at Chengwatana will be heard from in the near future.

—A. P. Franden Jr., of Duluth, traveling salesman for the Wright-Clarkson Mercantile Co., was a Pine City visitor Wednesday afternoon. A. P. is well known in this place, having been in business at Grass Lake before the Coon Creek branch of the Great Northern was built. Mr. Franden and family have been living in the Zenith City for the past three years. A. P. called at the Pioneer office while in town.

—Miss Ella Gerow departed on the fast train Sunday for Portland, Oregon, where she went to meet Carl Busemeier to whom she was married yesterday forenoon in that city on the coast. Miss Ella and Carl, the next to the youngest son of Mrs. Busemeier, who left here some two years ago, have been engaged to be married ever since Carl departed for the west. Carl is an honest, industrious young man who was born and raised in this place and up to the time of his departure for the west has always made this place his home. Miss Ella is the oldest daughter of Mr. and Mrs. Edward Gerow and has lived here since she was a little girl and is one of Pine City's favorite daughters. We wish the young couple long life and happiness in their western home.

—At a meeting of Chengwatana Temple No. 40, Pythian Sisters in K. of P. hall Tuesday evening, it was decided to hold a reception for Mrs. Margaret B. Greeley who was elected Grand Chief of the Pythian Sisters' order of the state at the meeting of the Grand Lodge in Minneapolis last week. The reception will be given for the benefit of the Knights and the Sisters, a week from next Wednesday evening. All the Knights and their ladies, and Sisters husbands or sweethearts are requested to meet in the K. of P. hall on Tuesday evening, May

ABOUT THE TOWN.

31 to honor the election to the highest office in the gift of the state in the Order of Pythian Sisters to Sister Greeley.

—The game of baseball played by the local high school team against the high school team of North Branch last Saturday afternoon at North Branch, must have been a hot game according to the reports the boys handed out. The score was 13 to 9 in favor of the Branch. From the score it would look as if the boys were defeated, but it is almost an impossibility to play a team and then play the ump. The game, according to reports, was a succession of bum decisions. The louder the boys called for a new ump, the worse deals they got. With a man that is at least half way square behind the slab, the local boys can easily defeat the Branch outfit.

—Marian Madden is out of school this week as the house is quarantined.

—Gertrude Reinhold is absent this week on account of illness.

—Florence Juergens is home this week on account of illness.

—The Neuhauer children are sick this week.

—Marie Binger is out this week on account of scarlet fever.

—Waldo Madden is out this week on account of illness.

—Mrs. Hurley visited school Friday.

—Lorena Bede has the mumps and is unable to attend this week.

—Mabel Housted is back at school after a weeks absence on account of illness.

—Philip Hamlin was out Tuesday a. m. as he had a severe cold to doctor up.

—The ball game played last Saturday between the North Branch and Pine City high school teams resulted in a victory for North Branch. It is impossible to beat that umpire and as a consequence North Branch won the game. McCoy pitched the first seven innings and then Gordon was put in. The team is improving rapidly and expects to play another game or two before school is out.

WILLOW RIVER.

—Otto Westlund has moved his family to White Pine.

—Mr. Sly has moved to White Pine, where he will start a lunch counter, pool hall and moving picture show. We wish him success.

—Our base ball team is a cracker jack. The boys played at the Finlayson team Sunday, and defeated them by the score of 14 to 3.

—The rain of Sunday, Monday and Tuesday was just what we have needed for some time. It will cause the grain, vegetables and grass to grow, and put out the forest fires that have been raging for the past few weeks.

—Jos. Mickag had the misfortune to lose a quantity of cord-wood by the forest fires Sunday, and it was only by the hard work of himself and family that his home was not burned also.

—Mr. Cloth lost his saw mill by fire Sunday it catching from the forest fire. He has purchased the saw mill belonging to Jas. Malerick and will keep right along with his sawing. You can't keep a good man down.

—A dance will be given in the hall Saturday evening for the benefit of the base ball team and supper will be served at Sherrick's hotel. All those who enjoy a good time should not fail to attend. Come out and show the boys that you appreciate their efforts in giving our village a good ball team.

—The local base ball team and the ball team from Sturgeon Lake will cross bats on the local's diamond Sunday afternoon. All those who enjoy a good game of ball should see the game Sunday.

—J. W. Sherrick has rented the Willow River House and will immediately start up a first-class hotel. Mr. Sherrick is a hustler and should run a good hotel. We wish him success in his new undertaking.

WANT ADS.

For Sale—80 acres good unimproved land, 2 1/2 miles from Pine City. Also 120 acres unimproved land 8 miles south of Brookpark. Address H. care of Pioneer.

For Plain Sewing call on Mrs. Clara Youngbauer, on north side of river.

8 horse power Olds Gasoline Engine and Arbor for saw. Slightly used. Can be had for \$160.00. J. S. Fritzen.

For Sale—A bay mare 8 years old; sound, gentle, fast and strong; also a rovel colt coming 2 years; well bred and promising. Apply at this office.

For Sale or Rent—My butcher shop and residence. Building in first-class location for good meat market. Apply to Mrs. Mary Neuhauer, Pine City.

FOR SALE—One bay mare for sale 4 years old; weight 1200. Inquire of G. H. Bacon, Comfort, Sec. 12, Kanabec Co.

For Sale—The Glanville property two minutes walk from postoffice. For particulars call or address this office.

For Sale—A farm of 30 acres 1/2 mile south of this place, all fenced. A good eight room house, granary, machine shed, large barn, good drilled well of water with wind mill, corn crib, chicken house and hog pen, all complete and in good repair. Call at this office for particulars.

SCRAP Iron 25 cents per 100, rags mixed and unmixed 50 cents per 100, clean rubbers, 4 cents per lb., clean copper and brass 6 cents per lb., highest price paid for bottles. I will make regular monthly trips to this place to get what you have saved the first trip will be the first week in May. Lois Lutz, the Rush City Scrap Iron Man.

GEORGE SHERWOOD'S Dray Line

We are prepared to do all work in our line in a workman like manner.

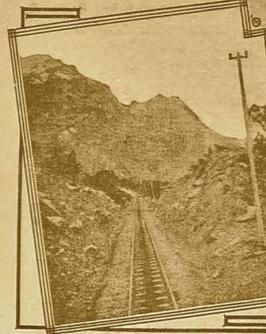

Geo. Sherwood, Prop.

INTERNATIONAL SIGNIFICANCE of the ANDEAN TUNNEL

ON THE mountain frontier, between the Argentine Republic and Chile, nearly 12,000 feet above the level of the sea, at Cumbre Pass, is a piece of stonary absolutely unique in history. "The Christ of the Andes" cast in the bronze from the cannon of opposing Chileans and Argentines, it was placed on the boundary line of the two nations in March, 1904, as a symbol of the perpetual peace which should therefore obtain between them. It stands a colossal figure 23 feet in height, placed on a gigantic column surrounded by a globe on which the configuration of the earth is outlined. One hand holds a cross and the other is extended in blessing. At the base are two tablets, one inscribed with the history of the monument and the other bearing in Spanish the following legend:

"Sooner shall these mountains crumle into dust than the people of Argentina and Chile break the peace to which they have pledged themselves at the feet of Christ the Redeemer."

Scarcely less potent than treaties and tributes to the Prince of Peace for the maintenance of harmony between

A MOUNTAIN SCENE ON THE TRANSDIANDINE RAILWAY

being located about 1,000 meters below the crest of the Andes. The Chilean section covers 1,535 meters and the Argentine 1,752, the completed work being estimated at a cost of \$500,000.

The tunnel is made to the same dimensions as the Simpson and is therefore large enough to allow locomotives, carriages, or trucks that are run on a 5 foot 6 inch gauge to pass through it. It is straight throughout, except for 120 yards at the eastern entrance where there is a curve of 219 yards radius.

Much work still remains to be done before trains will be running over the route, but it is proposed that communication shall be established by May 29, 1910, thus affording a most appropriate and adequate celebration of the centenary of the revolution which gave to both nations their independence. It will undoubtedly be utilized in the official exchange of visits between the executives of Chile and the Argentine Republic, which have been arranged as a feature of the centennial year.

The immense practical value of the new route is shown by the statement that the time for the trip from Valparaiso to Buenos Aires will be reduced to 34 or 35 hours, thus facilitating the transport of passengers and of perishable merchandise. While the romantic aspects of the journey will be greatly reduced, the saving of time and the greater ease of travel will more than make up for the loss. The picturesque mountain peaks and the stage trip between railway terminals will be superseded by a continuous all-rail journey from ocean to ocean in a day and a half.

So long as the chief exports of the countries interested continue to be raw materials no great changes may be expected in the character of products transported to the seaboard, though the volume will inevitably be greatly augmented. Argentina, grains, hides and beef, and Chilean copper and nitrates, will continue to be sent abroad by sea, but in the development of a greater commercial volume between the countries of the east

and west coasts of South America and in the transport of lighter manufactured goods from Europe and America the rail route will prove a formidable rival.

Though Brazil and the Argentine Republic are washed by the Atlantic, vast tracts of rubber-growing districts of the one and of the agricultural and cattle sections of the other lie far nearer to the Pacific. With facilities of transport it is reasonable to suppose that products which have hitherto found their sole ports of shipment on the Atlantic seaboard will ultimately turn to the Pacific, and vice versa.

As a medium of ocean traffic the importance of South America is to a great extent a commercial appanage of Europe. On the east coast the trade of the United States with the countries of the Atlantic has been handicapped by inadequate shipping conditions, and also by the fact that the east coast to the south of the turn of the continent is really much nearer to Europe than to the United States with the added advantage of more favorable sailing conditions, and the west coast is as remote by sea from New York as it is from Liverpool or Hamburg. When the Panama canal is completed a different condition will prevail. Then the United States, especially in its manufacturing sections, will enjoy a tremendous advantage in respect to all that portion of South America situated on or commercially tributary to the Pacific. Already the opening of the Tehuantepec line across Mexico and the interoceanic route in Guatemala has augmented the volume of trade between the Atlantic and Pacific.

With the Buenos Aires-Valparaiso route open to easy transport, Chile and Peru will not longer be cut off from the great streams of the world's commerce. They will be in direct and constant intercourse with the countries to the east and will be brought proportionately closer to Europe, and the long step will be taken toward South American solidarity by bringing the capitals of the west coast under the same influences as those of the east.

CRATER LAKES OF MEXICO

Mexico, with all her romance, has never given abroad any description of her crater lakes. Guadalupe de Santiago, a little town of the state of Jalisco, boasts four of the most perfect and beautiful of such lakes.

The village nestles among 11 craters. In the old days the town, which is an ancient one, was called the Town of the Seven Candles, for the seven craters which surround it. The 11 craters mentioned by scientists are not well defined, some having come up within the others at later periods, resulting in but seven well-defined lakes. The four craters which contain the lakes are all within a few miles of the city, but two, La Alberta and Zintara, are within easy walking distance of the sea, but in the development of a greater portion of the crater wall has fallen away so that the approach is very easy.

Half a mile across in the low line of the crater wall and down below it is the greenest of lakes, calm as a plate of glass. The tiny boat which glides on the lake is on the opposite side, close below the walls of basalt which rim it. The walls, which rise nearly a hundred feet above the surface of the lake, are part of the native rock, which was blown down like the cork of a bottle when the crater was formed. It rises sheer and erect above the lake on every side.

The other crater lake which one can visit conveniently is the Zintara, which is approached after a long climb up its high sides; the lake glitters deep at the bottom with sloping sides covered with green leading down to it. A tiny beach of sand is seen on one side and on this a small mountain just brings another Swiss touch to the scene. A background of a towering peak, one of the Seven Candles, rises a short distance

away, and in the great hollow of the crater crowds of hundreds can be heard and not a murmur but the echo of one's voice from across the crater, nearly a mile away, is heard.

The calm restfulness of a crater lake is unlike anything else in the world. One finds no waves and the calm there is akin to stillness, but they are stirred sometimes by passing breezes and the trees will wave above in the wind. But in a crater lake there is not a breath that will stir it and even a stone cast into its bosom creates ripples that seem as though they would be swallowed ere they are born. Peace is on the slope of a meaning until one lies silent on the slope of such a crater with such a lake at his feet.

HE SHOWED HIM.

A physician who acts as examiner for an accident insurance company said that he has to be watchful in order to keep the company representatives from being "stung" on accident claims.

"A man was in my office," he said, "who said that he had fallen from a street car. I examined his arm, and lo and behold there were a few bruises on it. It didn't appear to be badly hurt."

"How high can you raise it?" I continued, and he answered by raising his arm with apparent difficulty until his hand was a few inches above his head.

"Pretty bad," I commented. "Now show me how high you could raise it before this accident happened."

"He lifted it easily then 'way up in the air, and it wasn't until I began to laugh that he realized that he had exposed himself. He clenched out in a hurry then."

Fortune Telling

Does not take into consideration the one essential to woman's happiness—womanly health.

The woman who neglects her health is neglecting the very foundation of all good fortune. For without health love loses its lustre and gold is but brass.

Womanly health when lost or impaired may generally be regained by the use of Dr. Pierce's Favorite Prescription.

This Prescription has, for over 40 years, been curing delicate, weak, pain-racked women, by the hundreds of thousands, and this too in the privacy of their homes without their having to submit to indelicate, expensive and often-times injurious examinations.

Sick women are invited to consult Dr. Pierce by letter free. All correspondence held as strictly confidential. Address World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

Dr. Pierce's GREAT FAMILY DOCTOR BOOK, The People's Common Sense Plain English book of delicate questions which every woman, single or married, ought to know about. Sent free, in plain wrapper to any address on receipt of 21 one-cent stamps to cover mailing only, or in cloth binding for 31 stamps.

Really a Serious Dilemma.

"The chap who works on one side of me," said an office man, "has been married six weeks and he sneaks to the telephone booth four times a day and calls up his wife, and then I hear him saying: 'Dear, how is your headache doing? I hope you are feeling better.' Then pretty soon he comes back to his desk and goes to work again all smiling."

"The man who works on the other side of me has been married six years and he goes to the telephone only when he's called and then I hear him saying: 'Why, I can't possibly do that. I can't spare the money and then he comes back to his desk all scowling.'

"And, really, when I hear the way these two men go on I don't know what to do. I don't know whether to get married or to stay a bachelor."

Too Laxative.

Mrs. Dobbs was trying to find out the likes and dislikes of her new boarder, and all she learned increased her satisfaction.

"Do you want pie for breakfast?" she asked.

"No, I thank you," said the new boarder, with a smile. "Pie for breakfast seems a little too much."

"That's just the way I look at it," said Mrs. Dobbs, heartily. "I say pie for dinner is a necessity, and pie for supper gives a kind of finishing touch to the day; but pie for breakfast is what I can't put up with."—Youth's Companion.

New Work for Women.

Mrs. Frederick H. Snyder is the only woman impressario on earth, she says. She decided that grand opera would be a good thing for St. Paul, and made her first venture so successful that she has continued in the business after the fashion of men engaged in the same work.

As a mule is compelled to listen to his own voice, we don't blame him for being a chronic kicker.

FOR DESSERT TO-DAY, JELLYCON

Deliciously Flavored. The Perfect Jelly Dessert. FREE! BEAUTIFUL ALUMINUM JELLY MOLDS.

The Jeweled Set.

An actress said of Eleanor Robson: "She is a dear. She has married August Belmont. Now she is in the set that I once heard her so wittily ridicule."

"She said that in conversation with a leading matron of this guided, this Jeweled set, she once said:

"'And where do you think you'll spend the summer, Mrs. Van Gelt?'"

"'Er—the North Cape, I believe,' Mrs. Van Gelt answered. One can get skiing there all through August, you know."

"'And where will you spend the winter, then?'"

"'Oh, Florida, by all means. There's such ripping January bathing at Palm Beach.'"

A Divided Family.

The bright sixteen-year-old daughter of a physician happened into his reception room the other day and a waiting woman patient engaged her in conversation.

"I suppose you go to church and Sunday school?" she asked.

"'Oh, yes, ma'am,'" she replied.

"'And what denomination do your parents belong to?'"

"'Why,'" said the little one, "mamma's a Presbyterian and papa's a stomach specialist."

New Fly Trap.

A Californian has taken advantage of the fact that flies always walk up a window by inventing a trap to be fastened to a pane in such a manner that if a fly enter it without being aware that it has left the surface of the glass.

His Land or His Lass

By MARTHA McCULLOCH-WILLIAMS

(Copyright, 1909 by Associated Literary Press.)

"I do wonder," Mrs. Page began plaintively.

Her sister, Sue Andrew, interrupted sympathetically. "What? You wonder so much, I wonder if you didn't for a whole hour."

"Well! I can't help thinking about Sonny. You don't understand, Susan—you never had a boy, nor minded what you had on. But I'm afraid college is going to do mighty hard with him. Boys that have to wear homemade shirts and earn their own spending money it seems to me had better keep at home."

"Shut up, Agnes! You make me sick!" She said, stamping her foot. "It is just your way—you'll be writing the boy word to quit. Patient knows, he got load enough without that. Every Page from great-grandpa down here has been through college. Do you reckon he's the very last of 'em, down to grow up and loaf—and stay poor forever?"

"He always loved the land—dumb creatures and sheep were a heap more to him than books," Mrs. Page protested. "At least, until he fell in with Molly Glen, and you put it in him to turn lawyer and marry into her father's firm. As if she'd wait all that long time! Why, she's got beat by Miss."

"She'll wait—never you fear," Miss Sue said confidently. "Can you keep a secret? Well, she herself told me to tell Billy she would wait, she ain't in a hurry to part with her—besides, she thinks the world and all of Son—of William, I mean. We've got to get out of using that baby name. He had to do—said daddy would lend William all the money he needed. I tell you she took her breath away, speaking out so. But we couldn't make a man, you know—Son—William, must get his

land. It was the things he felt in honor bound to force that brought it again the Easter struggle. It was lively even before he reached home and found again the lack of the man's hand and eye. He hung himself ardently into righting things—so ardently that Miss Sue shook her head. Molly also complained—William never had time for her. Miss Sue—when he no longer called him Sonny—giped a little as he listened, but said nothing.

He was still fighting his battle—a hard one for a lad of twenty. All summer it raged within him, now one force, now the other, getting the best of it.

College would have won if he had not loved Molly so well. In the light of that love he knew some part of what he meant to do. He chose, however, not to leave her to loneliness, to poverty, at last to homelessness. She might not live to see him retrieve everything.

So one still, still August night he said to Molly, very low, the words like sob almost:

"I'm not going back; it would be wrong because of mother." The more quickly, but very, very humbly: "I hope you don't mind—much. I know you never could—marry a farmer."

"I believe I might—if only he would ask me," Molly said, reaching out her hand. "But you're a goose, a big goose," she said, "if you mean to save you—aint Sue and I. You shan't have to give up either your land or your lass."

"I hope there'll be no need—the crop's looking fine," Miss Sue said comfortingly. "Don't you worry, Agnes. You'll live to ride in your carriage yet—once William gets a start. I know his way—he won't stop short of the top."

The crop fulfilled its promise—and rather more. It brought a fine price, likewise, and Sonny, away at college, was let know he might, if he chose, come home at Christmas. "I'll wait for Easter recess," he wrote. "I want to see the woods in bloom, and smell the blowing."

He did come at Easter, high-hearted, full of joy and hope. In a day he was far otherwise. Things were going ill on the place. His aunt and his mother did their very best, but they had to depend on hired men or croppers to keep up the fences, to plow, and sow, and plant. The stock looked unthrifty—all but the fowls and the milk cows—to them. Miss Sue herself gave care to Billy gave over all holiday plans and set himself sedulously to work. He had ten days free and in course of time he was as charming as ever, and he approached him sweetly for not coming earlier, and especially for alighting her Easter picnic and his party later.

was not alien nor repellent to him. Moreover, it led to Molly. He could not doubt that—the fact at least as to him so. She would never be allowed to marry William Page, farmer, but when Will Page, her father's joint partner, would be a match quite acceptable to the paternal mind.

Over against all that there was his mother, a figure of pathos, of pity and resignation. She would turn his sold out of home and home for Sonny's advantage, and do it not merely in snook uncomplaining, but with a sort of painful joy. Aunt Susan, likewise, although she was of tougher fiber, and more filled with ambition, yet the home's making would hit her hard.

How would they manage through the long years before he got on in his profession? If, lacking him, the place were already falling away from itself, its income would have dwindled to the vanishing point by the time he was ready to earn a living. That meant it would have to be sold outright by the time he was ready to begin his career. He wanted to be a great man, a part of himself, but there was another, a stronger part, that pleaded for the home, the things he had inherited.

He could only listen faintly then. He was going back on the morrow. But it was not so long to term end. Afterward, he thought no further. Instead, very early, he went to sleep. And when the charm of college life had again laid hold on him he some-how shunted the conflict to the very back of his mind.

He got through commencement with such mild honors as are possible to freshmen. Molly was there to see him, and she did not dance with her. In spite of Aunt Sue's warning, he had no festal garments. So the dances knew him not.

Indeed, it was the things he felt in honor bound to force that brought it again the Easter struggle. It was lively even before he reached home and found again the lack of the man's hand and eye. He hung himself ardently into righting things—so ardently that Miss Sue shook her head. Molly also complained—William never had time for her. Miss Sue—when he no longer called him Sonny—giped a little as he listened, but said nothing.

He was still fighting his battle—a hard one for a lad of twenty. All summer it raged within him, now one force, now the other, getting the best of it.

College would have won if he had not loved Molly so well. In the light of that love he knew some part of what he meant to do. He chose, however, not to leave her to loneliness, to poverty, at last to homelessness. She might not live to see him retrieve everything.

So one still, still August night he said to Molly, very low, the words like sob almost:

"I'm not going back; it would be wrong because of mother." The more quickly, but very, very humbly: "I hope you don't mind—much. I know you never could—marry a farmer."

"I believe I might—if only he would ask me," Molly said, reaching out her hand. "But you're a goose, a big goose," she said, "if you mean to save you—aint Sue and I. You shan't have to give up either your land or your lass."

"I hope there'll be no need—the crop's looking fine," Miss Sue said comfortingly. "Don't you worry, Agnes. You'll live to ride in your carriage yet—once William gets a start. I know his way—he won't stop short of the top."

The crop fulfilled its promise—and rather more. It brought a fine price, likewise, and Sonny, away at college, was let know he might, if he chose, come home at Christmas. "I'll wait for Easter recess," he wrote. "I want to see the woods in bloom, and smell the blowing."

LIVESTOCK NOTES.

Breeding a \$200 mare to a \$50 male is poor business.

An active sow will generally farrow an extra lively litter of pigs.

When picking out a hog for good quality, look for one with fine hair.

The horse that stands without lifting its legs is the best run that never exploded—but once.

Hogs lay on fat slowly if sappy, but mature corn is fed. Sound corn is worth double for hog feed.

Save time, temper and thrashing at will time by fixing the trough so the hogs cannot climb into it.

It is bad policy to have the sow fat at breeding time. The overt sow will surely have smaller pigs.

Dipping does not harm sheep; in fact, it is good for their skin and promotes the growth of their wool.

Records kept of what your live stock return in a pecuniary way will be an incentive to produce better grade animals.

It is not only disagreeable and costly but it is extremely unprofitable to allow hogs to sleep in damp or muddy quarters.

Sheep will clean up the turnip field pretty well in their own way, but it is much better to dig the turnips and feed them regularly.

By proper breeding and common sense in feeding and care sheepmen can raise five pounds of wool where they are now raising three.

The stomach of a horse is small compared to that of a cow and the feed of the former should contain more concentrates than in case of the latter.

CONCRETE MANGER IS CHEAP

Simple of Construction and Saves Feed From Being Wasted—How to Put One Together.

The construction of a concrete manger is simple. Forms are erected at a distance apart equal to the greatest outside width of manger as well as the height of the manger. The board on the side where the animal stand should be set slightly slanting, as cut of completed manger illustrates, writes A. C. Houghton in Missouri Valley Farmer. A wood form is now placed to conform to the concave surface and you want the concave surface or trough of manger to be, as shown in illustration. This is simply

a flat board cut in this shape with a large convex projecting part to mold the main surface of manger. And on each side of this two concave or hollow parts are cut out, to mold the edges of side walls so they will be rounded. This will prevent sharp edges chipping off or injuring animals. The concrete is filled into the forms in a rough shape of the manger and the wood form placed upon same, and by drawing this back and forth, with each end resting on the side boards, the concrete is pressed into the proper form much easier and more exactly than can be done with a trowel or in any other way.

Partitions for Hog Trough

Smooth Galvanized Iron Wire Nailed Across Prevents the Animals From Crowding Each Other.

Instead of nailing slats across the hog trough to prevent hogs from crowding, take No. 9 smooth galvanized wire.

Wire Partitions.

nized wire and staple firmly across. The wire will take up much less room than slats and will last longer.

Rations for Fattening Horses.

A mixed grain ration of corn and oats when fed with clover hay is more valuable than a single grain ration of corn for producing large gains in horses in an 84-day feeding period. Clover hay when fed with a mixed grain ration of corn and oats is worth about twice as much for producing gains as timothy.

Exercise has a retarding effect on the taking of food.

Feeding Blocked Cows to Hogs. If spring finds us with a few shoals of cows out in the field we haul them up to the barn and feed them out to the hogs. It doesn't hurt the hogs to huck the corn, but does them good. The fodder makes manure, which is all it is good for, while the hogs are saved the bother of hucking the corn

LIFE-SAPPING PARASITES THAT WRECK HUMAN SYSTEM

The following remarkable statement was recently made by L. T. Cooper. It concerns the parasites which have been so widely disseminated throughout the country during the past year, and has sold in such enormous quantities in leading cities:

"It is now a well-known fact that wherever I have introduced my New Discovery medicine, hundreds of people have brought internal parasites, or tapeworms, to me. In many cases these people do not know the nature of the parasites, and were consequently extremely nervous until I explained the matter to them. In some cities so many have had this experience that I know it generally has been eliminated."

"I take this opportunity of explaining what these creatures are, and what I have learned about them in the past. Tapeworms are much more common than would be supposed. I venture to say that ten per cent. of all chronic stomach trouble, or what is known as indigestion, is caused by them. In an individual may suffer for years with one of these great parasites and not be aware of it."

Contrary to general belief, the appetite is not generally increased. It only becomes irregular. There is a general feeling of faintness, however, and a gnawing sensation in the pit of the stomach.

"People afflicted with one of these parasites are nervous and depressed. Their chief sensation is one of languor and they are very fatigued. Lack of energy and ambition affect the body, and the mind becomes dull and sluggish. The memory becomes not so good, and the eyesight is generally poorer."

"The human system, in feeding stomach and bowels of all impurities, seems to be fatal to these great worms, and almost immediately expels them from the system. I wish to inform you, one who has the experience just related with my preparation, that there is no cause for alarm in the matter, and that it will be a rare instance if any restoration to good health."

Cooper's New Discovery is sold by all druggists. If your druggist cannot supply them, write to me, and I will forward you the name of a druggist in your city who will. Don't accept "something just as good."—The Cooper Medicine Co., Dayton, Ohio.

A Surprising Event.

Mr. Brown, writing excitedly into the room. "Marriage, intelligence has just reached me."

Mrs. Brown (calmly interrupting him)—"Well, thank heaven, Henry—Life."

HELP FOR THE AGED.

No Need to Longer Suffer from Kidney Trouble.

Mrs. Catherine Sullivan, 1712 Motif St., Joplin, Mo., says: "Like most elderly people, I suffered from kidney trouble for years. My back ached incessantly and there was a feeling of numbness in my spine. My hands cramped and the urinary passages were profuse. Doctors prescribed for me but I was not benefited. Finally, I began taking Doan's Kidney Pills. They drove my troubles away, and I now enjoy excellent health."

Remember the name—Doan's. For sale by all dealers, 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Cause of the Rush.

"Sad, sad, to see humanity ever engaged in a mad rush for wealth."

"Forget it. Then others is on their way to the ball park."

Cataract Cannot Be Cured with LOCAL APPLICATIONS, as they cannot reach the disease. Cataracts is a blood or muscle disease, and in order to cure it you must internal remedies. Hays Cataract Cure is taken the internally and acts directly on the blood. It is a simple, safe, and effective remedy. It is a simple, safe, and effective remedy. It is a simple, safe, and effective remedy.

Tea Time Talks

It's always tea time when you are tired or thirsty.

Tea When You're Sick

It is tea and toast, not coffee and toast, that go to the sick room. Neither the stomach nor nerves of the sick are strong enough to endure coffee.

Right there you get a suggestion of the comparative effects of tea and coffee. Tea is a stimulant and a sedative. It is more refreshing than coffee and its after effects are soothing instead of straining to the nerves.

"Salada" Tea is pure tea, fragrant and of delicious flavor. It comes in air-tight packages to ensure plantation goodness to the purchaser.

Ask your grocer for "Salada" Tea or send to cents for a sample package. "Salada" Tea is made of the finest tea leaves. Whether Black or Green tea is desired.

Look in the "Story of the Tea Plant," sent free. "SALADA" TEA CO., Detroit, Mich.

Oh! had even a whole city reaped the evil fruit of a bad man.—Hobbes.

DR. FERRY'S PARALYTIK CURE FOR PARALYSIS AND BRUISES, SCALDS, AND ALL THE AFFECTIONS OF THE SKIN. It is the only medicine that puts a man in the undertaker's hands.

Dr. Perry's Pleasant Pellets regulate and irritate stomach, liver and bowels, and cure all the affections of the digestive tract.

Never let matters come to an open rupture.

GAL-VA-NITE

GAL-VA-NITE comes in rolls ready to be put on. Any one can properly apply same with but hammer and knife. Each roll will cover a surface ten feet square. Nails, lap cement and directions in center of each roll.

With GAL-VA-NITE once on your buildings you are insured against leaks and the trouble and expense of patching, painting and funing each time it rains. GAL-VA-NITE is waterproof on both sides of the sheet with a triple coating of mineral asphalt. Weatherproofed with a heavy armor plating of Galad mica which makes it impervious to the ravages of rust and the dangers of flying sparks and fire brands.

GAL-VA-NITE is cheaper and better than shingles. Can be put on in quarter the time.

Let us send you samples and book—"The Inside Story of Galvanized Roofing." Drop us a postal note. Address the Manufacturers: UNION ROOFING & MFG. CO., 200 Union Road, St. Paul, Minn.

Be Sure You Right Get GAL-VA-NITE

A Storekeeper Says:

"A lady came into my store lately and said: 'I have been using a New Perfection Oil Cook-Stove all winter in my apartment. I want one now for my summer home. I think these oil stoves are wonderful. If only women knew what a comfort they are, they would all have one. I spoke about my stove to a lot of my friends, and they were astonished. They thought that it was a small and smoke from an oil stove, and that it heated a room just like any other stove. I told them of my experience and one after another they got one, and now, not one of them would give hers up for five times its cost.'"

The lady who said this had thought an oil stove was all right for quickly heating milk for a baby, or boiling a kettle of water, or to make coffee quickly in the morning, but she never dreamed of using it for difficult or heavy cooking. Now—she knows.

Do you really appreciate what a New Perfection Oil Cook-Stove means to you? No more coal to carry, no more coming to the store, no more waiting for a kettle of water, or to make coffee quickly in the morning, but she never dreamed of using it for difficult or heavy cooking. Now—she knows.

Do you really appreciate what a New Perfection Oil Cook-Stove means to you? No more coal to carry, no more coming to the store, no more waiting for a kettle of water, or to make coffee quickly in the morning, but she never dreamed of using it for difficult or heavy cooking. Now—she knows.

New Perfection Oil Cook-stove

It has a Cabinet Top with a shelf for keeping plates and food hot. The nickel finish, with the bright blue of the chimneys, makes the stove ornamental and attractive. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

Every dealer everywhere; if not at your city, write for Descriptive Circular to the nearest agency of the Standard Oil Company (Incorporated)

Hoods Sarsaparilla
