Vincennes, Ind.

SHOE PROBLEM SOLVED

Quality added to value equals the sum of a good shoe. It's what you get when you buy The "BORCHERS'" SHOE

We sell these shoes because we know there's a hundred cents worth of satisfaction in every dollar invested.

Borchers' Shoe Store.

REGARDING YOUR BREAD don't you think that you owe it to yourself and family to use the very BEST FLOUR OBTAINABLE or is other word "GOLDEN KEY" FLOUR should be used exclusively in your home? You are safe in adopting this brand as a standard, as it is accorded everywhere the reputation as being the best.

PINE CITY MILLING & ELECTRIC CO.

CUSTOM PLANING and FEED MILL

For work in either branch I am prepared to give entire satisfaction. A trial will convince.

JOS. PROCHASKA,

JULY FOURTH IN PINE CITY.

As has been the custom for many years, Pine City fittingly celebrated the nation's birthday. Threatening weather and some rain kept away a large concourse of pleasure seekers who would undoubtedly have made this place the scene of their days entertainment. The slight fall of rain in the forenoon was a benefit in that it served to lessen the danger from fires.

The parade, which was the first event of the days program, was delayed slightly because of the rain. In the parade the Inter-State Lumber Co. and Bridgeman-Russell were represented in a very attractive manner. O. P. Larson, Pine County's tobacco raiser, was also well represented. Another unique feature was the large float conveying "Uncle Sam" and a throng of happy children. The parade was headed by the Zouave band and the fire department.

Following the parade the literary program was held in the park. Mrs. J. G. Heywood read the "Declaration of Independence," and the band rendered several appropriate selections. Editor Lindley of the Pine County Farmer, delivered the main address of the day, and gave his hearers a great many things to think about.

After the dinner hour the sports were pulled off. They were as follows:

- BOY'S RUNNING RACE—1st Clarence Kalb, 2nd Hunter Corrigan.
- FIVE-FOR-ALL—1st Warren, Hinckley; 2nd Jeppesen, Pine City; 3rd Ed. Brennan, Hinckley.
- SACK RACE—1st Joe Prochaska.
- TUG-OF-WAR—Pokegama Town came out victorious.

At the conclusion of this phase of the program, the ball game between the Flor-de-Knispel's, of St. Paul, and the Hurley Barrington's was held on the north side of the river. For the first few innings it looked rather dark for the St. Paul aggregation as the locals were hitting their pitcher, Grieger, at will. At the end of the second inning the score stood 8-3 in Pine City's favor. Again in the 4th the locals ran in four more scores. St. Paul scoring three times in this frame and once in the preceding one. Score, Pine City 12, St. Paul 7. Pine City blanked in the 5th, St. Paul scoring 2 runs. In the 6th the locals scored one run, the visitors two. Score, Pine City 13, St. Paul 11. After this inning the visitors scored once. The tabulated score is given below.

PINE CITY.		ABR. BILL PO A K			
Jeppesen, 1st	4	1	0	2	9
Ed. Brennan, 2nd	5	2	3	1	2

Total	43	12	18	24	11

In the evening the Zouave band of Princeton gave a concert in the park. They proved themselves quite capable as musicians and their selections were greatly appreciated by all who heard them. In spite of the fact that several of the members were only eight years old they performed like veterans. They were very ably directed by Albert Moe.

After darkness had fallen the usual fireworks program was carried out. The closing feature of the day's entertainment was the Firemen's dance. A large crowd was in attendance and a splendid time had in spite of the heat. The Princeton orchestra furnished the music for this dance.

A LITTLE HEART TO HEART TALK

It is a well known fact that anything which keeps the name of a town constantly before the people is an advertisement for the town. There is nothing which keeps a town in the public eye like having a winning ball team or some noted athlete. Who ever heard of Hegewich or Humbolt, Ia., until Nelson and Frank Gotch made them famous?

We have here the making of a corking ball team. No ball team can exist, however, without the support of the people, both by loyalty and financial aid. We can get the best semi-professional teams in the twin cities here, because of our record so far this season, but to do so means a lot of work and expense. The team will furnish the work if the people will provide for the expense by attending the games.

Pine City has not had a first-class team for the past two years and interest has naturally diminished. Now however, we believe we have a winner and as such it should be supported. We have played three teams so far, Mora, Cloquet and the Flor-de-Knispel's, and have beaten them all. On this coming Sunday, July 14th we scheduled a game with the Minnesota Transfer Railway Co's. team of St. Paul. This team plays in the Mercantile league; have won eight and lost only two games this season. Last Saturday they defeated the fast Crex team which has beaten Lindstrom and Oseola this season, so a good game is assured.

Now as the people here turn out for this game so shall we have to judge as to future attendance at our games. If we have a good crowd for the game we can go on and schedule games with the city teams, feeling confident that we will have the support of the people. If we cannot make expenses to pay for bringing this team here, how can we afford to go deeper in the hole by bringing teams from a greater distance, We can get games with the Simonets, of Stillwater, Conrads, of St. Paul, Lindstrom, Cloquet and teams of that calibre, but must see our way clear to do so even financially. The team does not expect or want to make any money, there is no money in it for a ball team in a town of our size.

All we want is to pay our just debt and put Pine City on the base ball map. Will you not help us?

PINE COUNTY TO HAVE EXHIBIT.

As was voted at a meeting of County Commissioners of this county, Robt. Dorr was appointed to have charge of an exhibit at the Minnesota State Fair. At the request of Mr. Dorr, Mr. Harte will assist him in gathering the exhibit and in properly caring for it.

They are gathering grasses, grain and other farm products, and will be greatly pleased to have any of these sent to Robt. Dorr, care of H. W. Harte of the Pine City State Bank, or brought to the above named bank.

It is to be hoped that every farmer in the county will give this movement his hearty support and help make it a success. There is no reason under the sun why Pine county can not make a creditable showing this fall, with the excellent crops we have.

It is for the good of every farmer in Pine county to get behind this matter with plenty of enthusiasm as no undertaking of this kind can be carried on successfully without the concentrated assistance of every one. Why not have Pine county carry off first prize at the State Fair in 1912?

DELICIOUS SODA DRINKS

Ask Breckenridge

For a delicious Chocolate Ice Cream Soda, and you won't deny the lusciousness of his Soda Drinks, that's certain. They couldn't be richer.

Are Made from the Purest Fruit Flavors

Breckenridge's Soda Drinks are the Perfection of Purity and are the best of their kind. Deliciously cold and fizzy, rich fruity, tart and tasty. A lot of flavors to select from, beside lemonades, egg drinks, sundaes and phosphates. Cooling, tasty and pleasing beverages for parched throats on hot days.

You Know The Place,

PINE CITY, MINN.

If Venice builds subways the gondola will get a black eye.

Missouri claims to be the banner strawberry state of the union.

They used to say that football was an awfully rough game before politics got to be so unslavlike.

Man in Baltimore demands a divorce because his wife is deaf and dumb. Casting pearls, as it were.

California man committed suicide because he was deserted by his wife. Excessive joy often causes insanity.

According to many millionaires, any man can become rich. But after looking at some of them, who wants to?

A foreign prince says that American girls are the prettiest in the world, and most of them don't it graciously.

A New Yorker is building a \$3,000 dog house at Lenox, Mass. Possibly afraid of some one kicking his house around.

They have had incubators in Egypt since the dawn of history. Tush! They never used the vacuum for a dog's nose, anyway.

A Kansas farmer advertises for a good milkster who will not swear at the cows. Explanations from the general milkmaid are now in order.

We are told that coal gas first was used as an illuminant 100 years ago, but natural gas has been used as an argument since politics began.

An Oklahoma dentist says kissing is a national crime that ought to be stopped by law. Are there not enough laws that are dead letters now?

Milwaukee doctors say that kissing is a blot on the state. It is at least frequently a blot on a freshly dandruffed cheek or a newly lacquered lip.

Twenty-five million dollars' worth of cutlery at Hitchen utensil bazaar to the shah of Persia, yet he never has a home-made strawberry shortcake.

A great deal of attention is being given these days to mothers' clubs. Yet the time was when the alderman would answer the purpose very well.

French police deny the rumor that Miss Lisa has been found, but in spite of that, dire catastrophe, the woman is able to sit v and take nourishment.

Professor Metchnikoff has found some microbes in dogs that he thinks will prolong the lives of men. But who wants to gain more days by the dog route?

A frankfurter, a glass of lemonade and a ball game proved fatal to a Jersey City boy. Strenuous combinations are apt to prove fatal these exciting days.

Judge in Pittsburgh advocates a law prohibiting the sound individual from riding on a street car. A better plan would be to make him pay an extra fare for his loud.

If baseball players should announce that they will defy the umpire's decisions before they commenced the game, how many games would they win by that method?

There is no limit to the amount of punishment the human stomach can stand. For instance, there is the man who goes camping in summer and cooks his own grub.

One of the unconscious jokes of fate is shown in the fact that a Belgian stamp has been withdrawn from circulation because the face of the king upon it has a squint.

A traveler tells us that a laborer in Egypt can live on 5 cents a day, but there is reason to believe that said laborer does not eat porterhouse steak any oftener than once a day.

The young man named Wright, who carried thirteen feet in a hole, is not related to the Wrights of aeroplane fame, but he is considerable aviator, all Wright all right.

The proposition to card catalogue every public school child in the country and keep tab on its record merely shows how easy it is for the statistician to figure out jobs for itself.

Miss is alleged to have no sewer words. This may explain its failure to produce a first-class baseball team, which cannot be expected to flourish without language to hurt at the umpire.

An automobile running wild in New York bumped into a woman carrying a half a ton of dynamite, with no subsequent proceedings. These metallic products, it seems, cannot be relied on to always rise to their opportunity.

Miss Oregon girls who went to New York for the purpose of looking over that city reported that they were unable to see anything there which was worth their while. They may have been prejudiced. The view down the Bay is pretty fair.

TWENTY-TWO KILLED

FREIGHT HITS PASSENGER TRAIN ON LIGNONER VALLEY ROAD IN PENNSYLVANIA.

THIRTY ARE BADLY INJURED

Many Bodies Found Hundred Feet From Track—Half of List Pluckers and Guests of the Picnic of the Road.

Lafayette, Pa., July 6.—Twenty-two persons were killed and more than thirty injured, several fatally, when a heavy freight train crashed into a passenger train comprising an engine and a coach one mile from Ligonier on the Ligonier Valley railroad.

The trains came together on a sharp curve, the freight, drawn by two locomotives, completely demolishing the passenger engine and coach, and hurling the passengers in all directions. Many bodies were found a hundred feet from the track. Every person in the coach was either killed or injured.

Partial List of Dead.

Mrs. Harry Dillon and baby of Wilpen, crushed to death.

Frank McConaughy, engineer, aged forty-five; scalded to death under engine.

Fremont George Byers, aged twenty-eight.

Engineer Smith Beatty, aged thirty-five; died on way to hospital.

Fremont John Ahney, thirty-five; died on way to hospital.

Louise Rhody, aged eleven.

Mrs. John Overton and son Frank, aged Elizabeth Rhody, aged fourteen.

Samuel Brownfield, aged fourteen.

George Toah, aged sixty-eight.

Mike Hoodok.

Miss Hoon, aged twenty.

Thomas Murr, aged fifty-two.

William Campbell.

Five unidentified persons, ranging in age from four to six years, were found from one-half of the passengers were picnickers returning to Wilpen from the fair grounds near Ligonier. Most of the children who were killed were talking the outing as the guests of George Sent, president of the Ligonier railroad, and were in charge of Miss Mathews, a nurse employed in his home.

List of Injured Not Available.

The Ligonier railroad penetrates a somewhat isolated area, and facilities for communication are few. The names of the killed were learned by telephone. The list of injured was not available. It was said, however, that Dr. J. B. Johnson, Charles Kuhn, the conductor of the passenger train, and Miss Mathews, the nurse, were probably fatally hurt.

The cause of the wreck is not known, although it is supposed to have been a misunderstanding of signals. The engineer and fireman of the second engine hauling the freight had no statements. The crews of the passenger engine and the first freight train, however, had no statements.

Twenty-eight victims identified.

Corning, N. Y., July 6.—Twenty-eight of the dead victims of the wreck on the Lackawanna in the disaster here identified and 13 still await identification at Elmira and in Corning. Forty-one persons were killed and 51 injured in the disaster.

Of the injured persons, fifty-nine Mary Brennan, James Griffith, Nellie Behndel, all of Newark, and Max Eisman of Jersey City, are considered seriously hurt, but the hospital authorities said that their condition was encouraging.

The Tom New York, due here at 4:41 a. m., was struck by express No. 11. Many of the victims were excursionists bound for Niagara Falls.

President Will Be Formally Told of His Nomination by Republicans at White House.

Beverly, Mass., July 6.—President Taft will receive the formal notification that he is the nominee of the Republican party for president at the White House in Washington about August 1. The president told his visitors at Paramatta that he had talked with Senator Root of New York, permanent chairman of the Republican national convention, and that they had decided that the notification should take place in Washington.

President Taft explained to callers that, as far as he is concerned, the nomination by Secretary of the Treasury MacVeagh and A. Platt Andrew, his assistant secretary, who resigned, a closed incident. He has no intention of discussing in detail at cabinet meetings next week the charges made by Mr. Andrew.

3 DIE, SEVEN FATALLY HURT

Twenty More Injured When Care on Marion, Bluffton and Western Coils in Indiana Town.

Marion Ind., July 6.—George Douglas of York, William Lantz and Benjamin Silvers, both of this city, were killed, seven others were fatally hurt and 20 more or less seriously injured in a collision between two traction cars on the Marion, Bluffton and Eastern line in this city. The cars came together on a sharp curve, and the collision resulted in a fire which was very dangerous. Among those dangerously hurt are: George Barber, Jack Salmon, York Silvers, and the Kinley, all of Marion, and Mr. and Mrs. Walter Yarnes of Elwood.

EMPRESS OF GERMANY

The health of Empress Victoria of Germany is said that her physicians have advised her complete withdrawal from all functions.

YANKEE RUNNERS SWEEP HONORS AT OLYMPIAD

Craig, Meyer and Lippincott Take First Three Places With Belote Fourth—Feat Never Equaled.

Stockholm, July 8.—One, two, three, four was the way the Americans finished in the first track event of the Olympiad, the 100-meter dash. Immediately after the finish three American flags were run up on lofty poles at the end of the stadium, denoting that the United States men had won first, second and third places, or a total of six points in the grand summary.

It was the first time in the history of Olympic contests that three flags of one country had been raised, and at the end of a single event and the Sunday crowd that packed the stadium went wild with enthusiasm for the United States.

The hero of the second day was Ralph Craig of Detroit and Michigan university, who won the event in 10:45 seconds, equaling the Olympic record. A yard behind him came Alvah T. Meyer, separated inches from Donald F. Lippincott, who was a like distance ahead of Belote. Last of all was Patching, the speedy South African, who prior to the event, was held in almost sacred fear by the entire American team, including managers and trainers. Edward P. Drew, the Springfield (Mass.) schoolboy, was unable to compete on account of the strained thigh muscles.

The close of the day the American flag still fluttered from two of the high masts, for the next event in which the final competition of the Pentathlon was won by the Spaniard, James Thorpe, with James J. Donohue of Los Angeles third, making four more points in the summary, or a total of ten against three for Sweden for Lemming's javelin throw Saturday and second in the Pentathlon gave Norway two points. Other nations, particularly England, have not had a look in.

NEW NAVAL WAR GAME ON

Torpedo Boats, Submarines and Battle Ships Will Manoeuvre at Sea for Week.

Newport, R. I., July 6.—An important war game will occupy the attention of naval officers in these waters this week.

The torpedo boat and submarine flotilla in conjunction with the battle ships of the Atlantic fleet, will manoeuvre between Benton's Reef lightship between Montauk Point and No Man's Land. Rear Admiral Rufus Osterhaus on board the flagship Connecticut, will have general charge of the manoeuvres.

The operations will surpass in importance anything thus far attempted here. The torpedo boat flotilla will operate in two divisions, an attacking and defending force will remain at sea throughout the entire practice.

VOTE ON LORIMER IS NEAR

Illinois Senator's Right to His Seat to Be Decided This Week.

Washington, July 8.—Senator William Lorimer's right to his seat in the senate will be decided by a vote of his colleagues before the expiration of the legislative day which begins at noon, and may extend until the middle of the week.

The final clash of the two years' battle to oust the Illinois member began when the resolution drawn by the minority of the Lorimer investigating committee was called up in accordance with the unanimous consent agreement of the senate.

DARROW TO LEAD DEFENSE

Chicago Attorney Insists He Will Conduct Own Trial if Lawyer Does Not Reappear.

Los Angeles, July 8.—Clarence B. Darrow, on trial for alleged jury bribing, will be present to take charge of his own case in the event Chief Counsel Earl Rogers has not reappeared from his trip to Chicago. Mr. Darrow has informed Judge Hutton that no further delay will be sought by the defense on account of Rogers' illness. The defense expects to begin the presentation of its case Tuesday morning.

FORMAL CALL IS OUT

DEMON GIVES FORTH STATEMENT URGING PROGRESSIVES TO GET TOGETHER.

MEET IN CHICAGO AUGUST 5

National Progressive Provisional Committee Prepares to Name the Colonel for President—Document in Detail.

New York, July 8.—Reaffirming "Thou Shalt Not Steal" as one of the cardinal principles of this campaign, the national Progressive provisional committee has issued the formal call for the convention at which it is planned to name Theodore Roosevelt for president for 1912.

Chicago is the place and August 5 the date. Here is what Manager Joseph M. Dixon described as the latest "Declaration of Independence" of the States as set out.

"To the people of the United States without regard to past political differences, who through repeated betrayals, have permitted the power of the crooked political bosses and of the privileged classes behind them is so strong in the two old party organizations that no helpful movement in the real interests of our country can come out of either:

"Who believe that the time has come for a national progressive movement—a nation-wide movement—on non-sectional lines, so that the people may be served in sincerity and truth by an organization uninterfered by obligations to any party or clique:

"Who believe in the right and capacity of the people to rule themselves, and effectively to control all the agencies of government, and who hold that only through social and industrial justice, this secured, can honest property find permanent protection and growth:

"Who believe that government by the few tends to become, and has in fact become, government by the few; and

Note on Legislation.

"We believe that only through the movement proposed can we obtain in the nation, and the several states, the legislation demanded by the modern industrial evolution; legislation which shall favor honest business and yet not in the least hamper the growth of business so as to ensure their being used in the interest of the whole people; legislation which shall promote the better and the same time secure the better and the same time secure the diffusion of prosperity; legislation which shall promote the economic well-being of the honest farmer, wage earner, and laborer, and the honest business man alike, but which shall at the same time strike in efficient fashion—and not merely pretend to strike in the interest of the honest farmer of industry no less than in the world of politics:

"Who believe that only this type of wise industrial evolution will avert industrial revolution;

"Who believe that wholesome party government can come only if there is wholesome party management in a spirit of service to the whole country and who hold that the commandment 'Thou Shalt Not Steal' applies to politics as well as to business.

Chicago Meeting Place.

"To all in accord with these views a call is hereby issued by the provisional committee under the resolution of the mass meeting held in Chicago on June 22 last, to send from their respective states a delegation whose votes in the convention shall count for as many votes as the state shall have senators and representatives in congress to meet in convention at Chicago on the 5th day of August, 1912, for the purpose of nominating candidates for president and vice-president of the United States.

Many notable names were appended to the call.

Forty States Represented.

"You will see," said Senator Dixon, who promulgated the call, "that 40 of the 48 states are represented in the call. There can be no doubt that ultimately North and South Carolina, Arkansas, Delaware, Maine, Nevada, Idaho and Mississippi will be represented at Chicago at a convention which will be the first perhaps in the history of our government that is not a party caucus, but a meeting of delegates by the office holding clique."

"What is to be the method of selecting delegates—by primaries?"

"It will be determined by what kind of a law governing the choice of delegates prevails in the various states. We shall put up and congressional tickets in every state.

TRIBUTE TO GOV. MARSHALL

White County (Ind.) People to Give White-Preidential Campaign a Big Demonstration.

Lafayette, Ind., July 5.—Whitely county Democrats and Republicans will unite in a monster demonstration in tribute to Governor Marshall. The date will be determined this week and non-partisan committees will have it in charge. Columbia City, the county seat, will be the scene of the parade. They took his wife, a bride, and from there he went to the executive chair at Indianapolis. The news of his nomination reached the town at two o'clock in the morning. Within two hours after dark the town was a scene of bustling Republicans vying with Democrats to do honor to their townsmen.

FRANKLIN MACVEAGH

Secretary of the Treasury MacVeagh, accompanied by Assistant Secretary A. Platt Andrew on the latter's resignation, returned warmly, denying the charges made and saying Mr. Andrew was asked repeatedly to resign because he could not perform the duties of his position.

WOMEN'S CLUBS REFUSE TO INDORSE SUFFRAGE AT MEET

How President of Federation Side-tracked a Motion at San Francisco.

San Francisco, Cal., July 8.—An exciting incident featured the passing into history of the eleventh biennial convention of the general federation of women's clubs. It grew out of final effort on the part of the ardent supporters of equal suffrage to obtain the federation's indorsement of the proposition. And the present, Mrs. Philip N. Moore of St. Louis, stepped to the front of the platform to read some letters Miss Alice Henry, a delegate from Illinois, arose and made a motion that, inasmuch as the convention had given indorsement to the work in the interest of world peace, the motion had been postponed out of Baroness Bertha von Suttner. It is now the sentiment of the convention that the work of Susan B. Anthony be indorsed. The motion was promptly seconded.

Mrs. Moore, who had displayed signal ability as a presiding officer, was not in the least flustered by this unexpected motion, but calmly and with a smile she put the "steam roller" motion, and when she was through the motion had been postponed out.

"The motion is before the house," said Mrs. Moore, "and it will be given to the press."

The cities bidding for the convention of 1914 are Washington, D. C.; Chicago, Indianapolis, Noma, Alaska; Manila, P. I., and Jacksonville, Fla. A telegram has received from Mrs. Ella Flagg Young urging the claims of Chicago. No action will be taken on this matter at present. St. Joseph, Mo.; New Orleans, Valley City, N. D., and New York city are candidates for the 1912 council convention.

DARROW ATTORNEY IS ILL

Chief Counsel of Defense in Alleged Bribe Case Unable to Appear in Court.

Los Angeles, Cal., July 6.—Earl Rogers, chief counsel for Clarence Darrow in ill and was unable to be in court. Horace Appel and W. H. Dehm, assistant counsel, asked for adjournment of the trial until Monday. Judge Hutton said Mrs. Rogers had telephoned to him of Mrs. Rogers' illness.

Rogers was at the Volpiat-Barnes fight and jumped into the ring when the decision was given and denounced Referee Jack Welton declaring the decision was a robbery.

Judge Hutton consented to the adjournment but said that the defense must be ready to proceed. Monday morning at 10 o'clock.

TWO ARMY AVIATORS KILLED

British Officers Fall 400 Feet in England When Their Aeroplanes Turn Over.

Salisbury Plain, England, July 6.—Captain E. H. Lorraine and Sergeant Major Wilson of the army flying corps were killed while flying over the great military campment here. They were taking their usual early morning practice and the aeroplanes had reached a height of 400 feet when the machines lost its balance, turned over and to the roadway. Sergeant Major Wilson was killed instantly, but Captain Lorraine lived a short time, although he was unconscious when picked up.

WHY ASK TAFT TO QUIT

REPUBLICAN OFFICEHOLDERS WILL CIRCULATE A NATION-WIDE PETITION.

FEAR OF DEFEAT, CAUSE,

Roosevelt May Also Be Asked to Give Way to Compromise Choice for Sake of Harmony.

Washington, D. C.—A nationwide movement to petition President Taft to withdraw as a Republican presidential candidate is being backed by a large number of Republican office holders who feel that they face defeat in November unless the breach in the party can be healed.

These men include members of congress, members of state legislatures that will elect United States senators, state and county office holders and party candidates.

If the movement to petition Mr. Taft to withdraw succeeds in gaining any volume, it is said these same men, in the interest of party harmony, may ask Colonel Roosevelt also to withdraw as a prospective candidate for an independent nomination and permit a compromise selection of some man agreeable to both factions.

It is the desire of the promoters of the scheme that a decision shall be reached before August 5, when the Roosevelt faction plans to hold a convention in Chicago.

The circulation of petitions, it was declared, would be made within a week. It was said the movement would begin spontaneously in every state.

The organizers now are circulating blank forms of petitions and appointing supervisors who, in turn, will engage canvassers to solicit the signatures of Republican voters.

The authors of the plan expect to offer to practically every Republican voter in the United States a chance to express his opinion of Mr. Taft's candidacy, either by signing the petition or rejecting it.

The movement is in the hands of several well known members of congress. They are expected to stand sponsor for it until the movement was under way.

In the circulation of the anti-Taft petitions an effort will be made to get them signed by organization Republicans and others who have stood with the president as well as by citizens who have occupied neutral ground.

There will be no special effort made to get Progressive Republican signatures as it is believed vital to confine the petitions to that faction would encompass the defeat of the movement.

The sponsors of the plan say one of its first results would be to let Mr. Taft know if there are considerable number of Republicans who believe he should step aside in the interest of harmony.

RICHARD HARDING DAVIS

Author Takes Bessie McCoy, Actress, Far His Bride.

Greenwich, Conn., July 9.—Richard Harding Davis, the author, and Miss Elizabeth Genevieve McCoy, known on the stage as Bessie McCoy, were married here by Justice of the Peace William C. Runkle. The bridegroom's honor was Mrs. Russell Cobb, former wife of Miss Ethel Barrymore, and Mr. Davis was attended by Governor Morris the story writer.

PINE COUNTY PIONEER

ED. C. GOTTRY, Editor and Prop'r

Entered in the Postoffice at Pine City as Second-Class Matter

Pine City, Minnesota, July 12, '12

The fire scare which Pine City experienced last week may induce that fine little village to put in a more adequate fire protection. It costs money; but it's worth the price. Sandstone Courier, 7-4-12.

The safe and sane Fourth is coming more into prominence with rapid strides. The people are waking up to the fact that a Fourth of July celebration does not consist wholly in making a big noise, destroying property, or injuring yourself for life. Let the good work go on.

An aerial line established between here and the lake might be a paying proposition just now. It seems well nigh impossible to make the trip with a launch under the prevailing conditions. And yet some people think that the removal of the dam was a benefit. We wonder in what way?

PINE COUNTY will have an exhibit at the Minnesota State Fair this fall. The work is in charge of Commissioner Derr, who has the able assistance of Mr. Harte, of the Pine County Agricultural Society. Pine County should do something with the excellent crop of farm produce she has this year. This is your chance, rural brother; to do something for your country that you may be proud of.

ELBERT ON J. ADAM.

Fra indulges in a Tribute to Bede Who "Is an Individual."

By Fra

J. Adam Bede comes in for an appreciation at the hands of Elbert Hubbard in the June issue of "The Fra," wherein Fra Elbertus remarks that "he raises, blackberries, potatoes, garden-sass and ideas out at Pine City and in the evening reads Adam Smith's 'Wealth of Nations.'"

"Adam Bede is an individual," says the Fra. "Most men are merely types. There is something about him that is distinctly peculiar, unique and of a kind that God has not duplicated. He has intellect, wit, hope, appreciation and sympathy. In his humor there is the half-pathetic touch that reveals to you the fact that this man's feelings have been sounded deeply."

After likening him to Abraham Lincoln the Fra says that when Bede is dead he will be pointed out by the people of Minnesota as the biggest man the state has ever produced with one single exception, and that exception is a man who does not resemble Bede in the slightest degree.

"A humorist has no place in Congress. When Adam Bede made a speech on the floor in Washington the cloakrooms were emptied and the galleries filled."

"My hope is that Bede will start a magazine and call it 'The Beadle.' If he does it will be worth your while to subscribe, no matter what the price may be. Bede will supply you with thrills; he will make you smile; he will make you sigh; perhaps he will make you mad in any event he will make you think." [Pioneer Press, 7-8-12]

SOUTH MEADOW LAWN.

Will Dile spent the 4th at the Lawn. Johnie Kilgore is visiting at the Holler home.

Miss Gerlie Holler has returned home from Evergreen.

Mrs. Auman was a caller at the Dile home Monday.

Mrs. Grace Etridge, of Minneapolis, is visiting friends at the Lawn.

J. O. Clynne and wife visited with their children at Wilder over the 4th. Ernest and Vene Holler were down from Evergreen for a few days last week.

Maudie Chase, Franklin and Nela Etridge were visiting friends at Boron Saturday.

The farmers trimmed the regular base ball team the 4th by the score of 10 to 2. The game was played at Chas. Franklin's.

Grandma Scofield was out to help celebrate the 4th at the Dile home. We hope to have her with us for many more holidays.

There must be some very good Christians in the Lawn, as they were praying for rain on the 4th. Their prayers were answered, but it did not stop the celebration.

The dance given Saturday evening by Harry Milligan in honor of his sister, Gerlie Holler's home coming was a social success. The dance was given on the platform at the Dile farm.

The picnic and dance given at the Dile farm on the 4th was quite a success, and instead of a small crowd, there was a very large crowd, and every one reports having spent one of the best 4th's of their lives.

ROCK CREEK

August Altman has sold a flock of 30 sheep, fat all ready to butcher, to A. M. Challeen, at Pine City.

Two of the married daughters of Mr. and Mrs. Krueger are home for a short visit. They will return to their home at Lake Elmo Monday.

Mrs. Horcker, a daughter of Mrs. Marie Doran, and her family, of Duluth, came down Thursday to visit with relatives and friends for a short time.

Mrs. Perkins is enjoying a visit by her mother and two sisters, who came up from Minneapolis a week ago last Monday to remain for the balance of the summer.

A shingling bee was held at the Jas. Caroon farm one day the first of the week, at which time 18 men shingled half of Mr. Caroon's new barn, which is 60 feet long. We understand that another bee will finish the job the latter part of the week.

The Smith Hardware company's auto of Pine City, is seen in this vicinity quite often delivering goods that have been purchased at their store. It is fine when one can make such long deliveries with an auto. The Smith Hardware Co. always keeps up with the times.

John Algure and John Tate drove down to Rush City Wednesday with Mr. Algure's team. On returning home, when near the Creek, the lines broke near the wagon the horses ran into the creek throwing both of the gentlemen out. Mr. Algure was cut about the face but not seriously.

Harry Mills and son, Geo. Lemmeroth and Chas. Heineman made an auto trip Sunday to Rush City to see the game

of ball between the Rush City and the local teams. They did not stay for the finish, as the game was too one sided to be interesting, the local team should get out and practice if they intend to even try to play ball.

The following is the sworn statement made by Mr. Sorenson, the butchermaker for the Rock Creek Co-operative Co. for the month of June 1912: Paid cash for butter fat \$5,918.01 Butter manufactured, pounds 26,840 Shipped east last week 112 tubs, 63 lbs. to the tub. This is a correct statement and is considerable more than the same month and last week of the month last year. Subscribed and sworn to before Chas. Heineman, Justice of the Peace.

LETTERS ADVERTISED

Remaining uncalled for at the Post Office at Pine City for the week ending July 8th, 1912.

Miss Jessie Abney, N. E. Berquist, Henry H. Crandall, Gust Christenson, Miss Freda Hansen Swan Hanson, Mrs. Clara Kline, K. H. Nordby, Nels A. Nelson, A. D. Seeley, Mrs. Albert Schuler, McClain Tilton, Miss Marie Maisonneuve.

Persons claiming the above letters will please say "advertised" giving date of this list. Will be sent to the Dead Letter office July 27th, 1912.

J. Y. Breckenridge P. M.

MUST BELIEVE IT

Who's Well-known Pine City People Tell It So Plainly.

When public endorsement is made by a representative citizen of Pine City the proof is positive. You must believe it. Read this testimony. Every backache sufferer, every man, woman or child with any kidney trouble will find profit in the reading.

Mrs. August Carlson, North Pine City, Minn., says: "I am just as strong in my praise of Doan's Kidney Pills today as I was three years ago, when I publicly recommended them. For about two years I had kidney complaint. It began with pain and weakness in my back that prevented me from doing any lifting. If I stooped, sharp twinges darted through my loins and head. My rest was broken at night and often I was hardly able to attend to my work. Doan's Kidney Pills were procured at Breckenridge's Pharmacy and they restored me to good health. I shall always be pleased to tell of the merits of this preparation."

For sale by all dealers. Price 50 cents. Foster Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other. Breckenridge's Pharmacy, Pine City, Minn.

Good Oil Makes Good Paint.

THE most important part of any paint is the linseed oil. Without pure linseed oil, paint will in a short time dry up, scale off, and leave the lumber exposed to the action of the weather. The only way for the manufacturer to be sure of the quality and age of the linseed oil is to make it himself. Minnesota Paints are made from our own Minnesota Linseed Oil. This is what makes it better, as the linseed oil is never out of our control until it is sealed up in the can and shipped as Minnesota Paints. In Minnesota Linseed Oil we grind pure White Lead and XX New Jersey Zinc, the two best paint pigments known. The grinding and mixing is done with the latest improved heavy machinery by expert workmen, supervised by practical paint men whose experience has extended over forty years. Do you wonder that

Minnesota Paints

have been known for forty years as "The Best Paints Made." We make "A Special Paint for Every Paintable Surface." The cost per can has nothing to do with the cost of paint. Figure how much surface a gallon will cover and protect satisfactorily. Minnesota Paints, on this basis, are the cheapest paints on the market.

THAT COZY LOOK

Paint your floors in colors that harmonize with the wall decorations and rugs.

In addition to the comfort and "cozy look," painted floors are a source of joy on cleaning day. With a damp cloth around the broom you can clean them in a jiffy. Its play rather than hard work to do it. Then, too, they are always dry, sanitary and healthful. Of course, you must use Vindex Floor Paint.

It dries hard over night, wears remarkably well, far longer and better than you think.

Is Good Paint, that's the reason.

Kitchen Cabinets

at cut cost

YOU spend a large part of your life in the kitchen, madam.

You have every reason, therefore, to make your kitchen as nice and comfortable as possible. A handy **KITCHEN CABINET** is the best helper you can have there. It keeps your kitchen tidy, you always know where to find things, it saves your feet and time and adds to the "look" of the room.

The kind we sell are elegant pieces of furniture. Once you use one of our Kitchen Cabinets you will wonder how you ever got on without it. The prices have been cut. Come in and look over our stock.

We can furnish you with two bin Cabinet tables, at the factory, from \$2.85 up to \$5.00.

Solid base Cabinets with high tops from \$11.50 up.

Yours for Business,

'PIPER' the Pine City FURNITURE MAN.

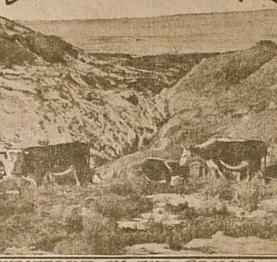

ROCK-EATING CATTLE

E. S. Cameron

BONE-CHEWING is a frequent cause of death among ranch cattle, which also chew the shed antlers of mule deer. The bones usually become firmly fixed in the teeth of the lower jaw, and the poor brutes wander about until they die of starvation. The late Henry Evans, who made systematic search for dead deer during his long lease of Jura Forest, found bone-chewing to be a not uncommon cause of death, but the victims were mostly stags, and his own comment was: "Probably, as in the human species, females are more desirous than males." Fortunately, numbers of cattle are relieved in time, and my neighbor (Lamb) saved from death a famished cow, which had mistaken a piece of tough cottonwood root for a bone. It was wedged transversely in her mouth (against the jawbone on one side, but firmly embedded in the cheek flesh of the other) and was removed with difficulty after the animal had been "roped" and thrown. I think, however, that accidents of any kind arising from the bone-chewing habit, whether to deer or cattle, are transcended by the re-

markable appetite for rock displayed by some of the cattle on a well-known Montana ranch. This rock-eating propensity (which is operative only in winter) is almost invariably fatal, and but very few cases have recovered, either naturally or when medicinally treated. The phenomenon was first observed on March 4, 1905, when the senior of two brothers (Archdale) had ridden out to look over his herd. To his consternation he found the bodies of fifteen steers, which had died in some mysterious manner—some in one place and six in another. At first sight the cattle appeared to be resting easily upon their chosen bedstead, and as there was no indication either of tympanitis or a struggle, death was presumed to have been painless. An autopsy revealed that the rumen of all the steers contained a pint of fragments of red rock, varying in size from a pigeon's egg to a pea, and in the second stomach was a less amount of the same mineral. The mucous membrane of the paunch was so severely burnt that it would peel off at the touch. This "brick-like rock" (called by geologists laterite) is composed of silicate of aluminum and iron oxide, which later gives it the red color. Archdale, who has had a long experience with cattle, had never seen a similar case, but rightly attributed poisonous qualities to the rock, and immediately sent away samples to various chemists. Some of the replies were to the effect that no poison could be detected; others stated that potassium nitrate was present, but not in sufficient quantities to cause the disaster. It remained for Mr. V. K. Chesnut (the eminent chemist of the Bozeman Agricultural experiment station) to clear up the mystery after he had examined numerous samples of rock. In a conclusive letter to Mr. Archdale, he pointed out that the animals were poisoned by an silicofluoric acid exuded from the porous rocks containing nitric and sulphuric acid salts of sodium and potassium—in other words, crude saltpetre. The quantity varied, of course, with different samples, which would explain some of the favorable verdicts returned.

The report went on to state: "Two ounces is sometimes sufficient to kill a horse, and from four to eight ounces are nearly always fatal to horses and cows." No doubt remained as to the correctness of Mr. Chesnut's diagnosis, as the chemist's description of all the symptoms and post-mortem appearances exactly coincided with the careful observations made by Mr. Archdale. The latter was still further convinced by the following statement: "The whole course of the sickness sometimes covers only a few hours, and in a few cases death has been observed to follow within five minutes after taking the salt." Thanks to the skillful diagnosis of the Bozeman chemist, the cause of the fatalities has now been decisively ascertained; but the question still remains as to how these losses are to be prevented in future. The cattle in question, which are chiefly Hereford, with the remainder a cross between Hereford and Shorthorn) either roam over free prairie or are confined in a 5,000-acre pasture, the country consisting of wide parks bisected with creeks and enclosed by steep ranges of pine-clad scoria-topped hills. These scoria crags are of several different colors, many are red, others yellow or green, some even mauve—in fact, almost any hue may be seen. The deadly fragments of white-encrusted red rock lie scattered upon the sides of the hills or around their bases. In parts of the badlands, where laterite has disintegrated, a maroon powder is formed which may be collected with a spoon, and was formerly used by the Indians as war-paint. It is heartrending to ride among these hills of death and come suddenly upon a trembling eighty-dollar steer which, after reeling to and fro, succumbs in an apoplectic fit; or to see a favorite heifer vainly struggling for life, as described to me (in lit.) by Archdale, as follows: "I saw her come from one of the rocky hills and take a drink of water. She commenced to shudder and wobble about, growing gradually weaker, and when it seemed that all her strength had left her she lay down. I rode away and returned to her in about half an hour. The heifer was then upon her feet, trying to walk, but only went about fifty yards, when, after another attack of the staggers, she lay down again and died. The cattle have had all the salt they could eat for six weeks prior to the death of this heifer, and they would walk away from the salt to pick up a bit of this rock to chew. What is it that gives them such a craving for it?"

While the loss in these cattle from the laterite encroachment is inconsiderable when compared to that sustained from blizzards or wolves, varying from about three per cent in one year to all over the whole period of eight years since its commencement, there can be no question that the rock-eating tendency is very remarkable, and to me it is inexplicable except on the ground of a depraved hereditary appetite. It cannot be due to the lack of salt, since the owners are accustomed to haul this out in 150-pound barrels and to eat their salt from it. In the letter already quoted, rather may it be compared with the strange propensity of certain horses to eat hens' eggs, a case of which was recently brought to my notice. As justly observed by Mr. Chesnut, the matter is of all the more interest, because it occurs to the country, and I can myself assert, after twenty-two years' residence, that although similar red rock occurs extensively through the pine hills and badlands of eastern Montana, no like fatalities have ever been there reported.

As may be supposed, many curious accidents to cattle are discovered on the bi-annual round-ups. In two separate instances a steer was found dying of starvation, owing to a firmly-fixed tomato can on the upper jaw. In each case it was, of course, necessary to haul the animal before the obstruction could be removed. My neighbor Lund (previously mentioned) found one of his long-horned Texas steers with its head held fast between two ash trees as in stanchions. He rode to his nearby ranch for an axe, and returning to the prisoner, bound its head tightly around the base of the horns to one tree before proceeding to cut down the other. This precaution was necessary with the already infuriated steer.

Just as well. "Why is it that you insist on giving your daughter a college education, while you are planning to make your son go to work as soon as he gets through the high school?" "Well, you see, it's this way. I can't afford to send them both to college, and the boy can get his training just as well by joining some athletic club."

Settled Long Ago. "Now, my dear," said young Mr. Sunboly when he had signed the lease for the pretty little flat. "The first thing we shall have to decide is which of us is to be supreme in command here." "Oh, no, George, you are mistaken," she sweetly replied. "I decided that while our friends were still throwing shoes at us."

A Different Code. The tenor sang an aria. "Rotten" bearded a spectator. "Take him out." "I'll take you out," said the usher, "if you keep insulting the singers." "Excuse me," said the man. "I forgot I was at an opera, not at a ball game."

Starting in Business. Pretty Miss—Is this the license bureau, please? Clerk—Yes, ma'am. Pretty Miss—Well, I've just finished my first book of poems and I want to take out a poetic license—how much will it be?—Judge.

A Connoisseur. "Does Bilkins take an interest in art?" "You wouldn't ask me such a foolish question if you could only see the way he stares at all the billboards."

"Every Day Is Bake Day at Our House!"

writes an accomplished housewife, an enthusiastic patron of

DR. PRICE'S Cream BAKING POWDER

"It is Hot Biscuit, Muffins, Sally Lunn, Waffles, Pot Pie, and almost daily, now that the season has come, a Fruit Short Cake—all home-made, home-baked of course, and perfectly delicious! Home-baking, thus, with the aid of Dr. Price's Baking Powder, provides the most tasty food, which I know to be of absolute purity, clean and healthful, and with considerable economy."

Our correspondent has written for us the whole story.

DR. PRICE'S CREAM BAKING POWDER

Makes Home-Baking a Success and a Recreation, with food more healthful, desirable, and safe from all improper contamination.

PRICE BAKING POWDER CO., CHICAGO

JOHN'S FRIENDS WERE LOYAL
Young Bride Got Early Proof of the Way Men Will Stick by One Another.

The bridegroom of three months bade his wife adieu one morning and started on a business trip to a town 25 miles distant. The journey was to be made by automobile and he promised to return in time for seven o'clock dinner as usual.

But no husband appeared when dinner was served and the anxious wife watched the hands of the clock as they journeyed on and announced that the hour was midnight, and still the husband failed to appear. The frantic wife sent telegrams to six friends of the groom living in the town where he might have gone, asking if he was spending the night with them. As dawn appeared a farm wagon drove up containing a farmer and the missing husband and furnishing motor power for a broken down automobile that trailed behind. Almost simultaneously came a messenger boy with an answer to one of the telegrams, followed at intervals by five others and all of the telegrams said:

"Yes, John is spending the night with me."
In loyalty what surpasses man?
With the lid off.
"Mother," asked Bob, with a hopeful eye on the peppermint jar, "have I been a good boy this afternoon?"
"Noney," answered mother, dubiously, recalling a certain little rift within the lute. The four-year-old diplomat looked anxious.
"Please," he begged, "say a wide-open yes!"—Harper's Bazar.

It is only the very young man who wants to paint the town. An old man is satisfied if he can fresco the corners.

Yes, Cordelia, a romantic man may be all to the good as a lover, but he isn't in it with the matter-of-fact man as a family supporter.
And So True, Too.
Father was walking to Sunday-school with little Johnny, and endeavoring to improve the time by teaching Johnny his Golden Text, the words of which were: "Whatsoever a man soweth, that shall he also reap." Johnny repeated it after his father several times, and seemed to have mastered the correct wording. As they drew near the Sunday-school the father gave Johnny his last rehearsal. "Now, son," he said, "let's have the Golden Text once more without any help from me." "This is what he got from Johnny: 'Whatsoever a man sees always ripe'—Harper's Bazar.

If there ever is a time when you are justified in cussing, it is when the summer weather sets your appetite to hanging. But there isn't any need to risk your soul and shock the neighbors—Tempt your appetite with Toasties and get singing to your labors.

Building Trunks for Flying Machines

Probably the biggest trunks ever built are four which were made to order about a year ago by a New York manufacturer and which were designed to carry about 200 pounds of baggage. There were two of these flying machines, both monoplanes, and to carry them there were built four giant trunks; a trunk for each flying machine body, one on each side of the wings, each divided into two parts, were packed, and a fourth trunk in which were stowed four propellers.

Each of the body trunks is 35 feet long by about 45 inches square. The trunk for the wings is 25 feet long and 12 feet broad at one end and 9 feet broad at the other, while the trunk for the propellers is 9 feet long.

These tremendous trunks are finished outside in the usual fashion, canvas covered with metallic trimmings. They are so strengthened and trussed as to enable them to stand the strains to which they are likely to be subjected in use. Of course no baggage man that ever lived could sling those trunks around, and in fact the body trunks can't be got into an ordinary side door car and have to be transported in end door freight cars. The trunks have been at least once to the Pacific coast and so far under the stress of handling and travel they have stood up well.

Very likely these are the only aeroplane trunks ever built, but there are made to order many trunks for many odd uses. Theatrical trunks built to order are designed to stand wear, and they do. Besides trunks for the theatrical profession generally, there are many special trunks made to contain apparatus used in special acts by stage performers; and there are built also trunks for travelling musicians for orchestra players or for violinists performers.

Perhaps the most extraordinary of all instrument trunks is the harp trunk, which is not only of great size but also of peculiar shape. Another big and remarkable trunk is that made for the carrying of a bass viol. This trunk, like that for the harp, is made to conform to the shape of the instrument. A bass viol trunk is 6 1/2 feet in length. Smaller trunks of the same style are made for cellos.

Many brass instruments are carried by hand in specially made holders, but brass instruments are also carried about in trunks specially made for them. The player of a big brass horn, for instance, may have a trunk especially built for it. This would be a big trunk in shape and proportion of a convention trunk type, but inside there is formed a padded and plush lined deep pocket, shaped everywhere perfectly to fit the instrument in all its various dimensions, including the big bell, a pocket into which the big horn fits snugly and in which it rides safely. There may be brass instrument trunks in which several horns of smaller sizes may be securely stowed.

The xylophone player may have a special trunk. The xylophone when played rests on a table and the player wants a table that in every way just

suits him. He is likely to have a table with folding legs or with detachable legs, and if he travels he has a trunk into which the dismantled table and the instrument can be safely packed.

There are vandellie players who play perhaps half a dozen instruments of widely diverse character and who may have a trunk built to contain them all. The violin player may have constructed in his traveling trunk a special compartment for his violin.

A Different Code. The tenor sang an aria. "Rotten" bearded a spectator. "Take him out." "I'll take you out," said the usher, "if you keep insulting the singers." "Excuse me," said the man. "I forgot I was at an opera, not at a ball game."

Starting in Business. Pretty Miss—Is this the license bureau, please? Clerk—Yes, ma'am. Pretty Miss—Well, I've just finished my first book of poems and I want to take out a poetic license—how much will it be?—Judge.

A Connoisseur. "Does Bilkins take an interest in art?" "You wouldn't ask me such a foolish question if you could only see the way he stares at all the billboards."

Stung! Father (to his son, whom he has reproved for lying)—I never told a lie when I was small. Hans—Well, how did you get your father, whom you began?—Fitzgerald Blaxter.

Linda

By Clarissa Mackie

Copyright, 1911, by Associated Literary Press.

Linda Gray was walking in the Hillcrest woods. The oak and chestnut trees reared their heads toward the sky and their straight trunks formed clean-cut lines through the dim shadows. Under foot the leaves of many summers made a thick, wrinkled carpet, broken here and there by a tangle of cat-brier or a clump of dark green laurel.

Hillcrest was the property of young Joshua Hill, who had inherited the place since he had inherited it from a bachelor uncle. The people in the little village at the foot of the hill were severe in their denunciations of the young millionaire who neglected a fine piece of property. If Hillcrest were occupied and its farm-houses busy with farmers and dairy-men; if its great stables were filled with horses and the extensive grounds well kept up—then said the people of Crestville, would there be plenty of work for all of them. The occupation of Hillcrest meant prosperity in the village.

Linda Gray had heard all these arguments a hundred times; her father was rector of the church and many complaints came to him. Linda had listened and sympathized and finally grown very indignant with the careless owner of Hillcrest.

She was thinking of him this very afternoon as she strolled through the woods, the dappled shadows adding to the varying expressions of her face. Her dark eyes flashed and softened and her brown hair glimmered with a thousand golden lights. Her pink organdy gown threw deeper rose tints into her cheeks.

Suddenly her steps were stayed. An inquisitive cat-brier had reached out and caught the delicate fabric of her skirts in a ruthless grasp. Linda turned to release herself and became more than a little perturbed. There came a quick foot fall on the leaves accompanied by a grave, pleasant voice. "May I help you?"

"Oh, thank you," said Linda, looking up to discover a strange young man bending above the offending brier.

As he bent to the task of extricating her gown from its thorny embrace,

"Unholy myself being very busy," he corrected gravely. He wondered why such a pretty girl should spoil a charming afternoon by assaulting him with socialist's arguments.

She explained breathlessly that she often read about him in the newspapers of the millionaires—his pleasures, steam yachts, racing stables, automobiles, his half-donated handsome homes. Then she drew a picture of the former owner of Hillcrest. Many of the villagers who had depended upon the estate for their bread and butter had gone away to other places in search of work, while the others who could not go away simply lived in idleness, waiting for the new owner to come and provide work for them. Meanwhile, the village was deteriorating rapidly.

The young man listened gravely and once or twice his lips parted as if he would interrupt her, but he did not speak until she had concluded her argument for her poor people.

"What you say is all very true," he said soberly; "I understand that all the things you hope for are soon to come to pass. My cousin has just arrived and he has many plans for the betterment of the estate. I am to live here and have charge of the property and see that his many plans are carried out. I shall depend upon you to direct my efforts in the proper direction."

Linda flushed crimson and prepared for flight.

"Oh, who are you?" she asked quickly. "I thought you were Mr. Joshua Hill."

"He shook his head, laughing. "I am only the poor relation—I am Carl Hill and my cousin has very kindly thrown a lot of his business in my way. So you see that you really were not far away when you brought up the matter to me."

"I am afraid I was very rude—I am very sorry," she said, much interested in the people and—

"I hope you will not lose your interest in what I shall count upon your co-operation in putting the right people back into their old positions."

"That will be splendid. Father can help me. My father is the rector of St. Paul's."

"Ah, Joshua has a letter to Mr. Gray. I was on my way to deliver it. Perhaps you will show me the way?"

Linda showed Carl the way to the rectory, but after that he did not need any direction and the path through the woods became well-defined before another season passed.

Later on, when the big house was occupied as well as all the farms on the estate, all the villagers participated in the prosperity of Hillcrest when Linda Gray married the millionaire's cousin, the steward of the estate.

"It would have been grand if Miss Linda had married Mr. Joshua Hill instead of his poor cousin," commented one of the old farmers.

Linda heard of the remark and smiled proudly. "I am ten times richer now than if I had married Joshua Hill," she told her husband.

"Value is a relative term," observed Representative "Stove" Porter of Pittsburg. "Some months ago, on a hunting trip," says Porter, "I stopped at a farmhouse, where the entire family was in high glee over the possession of a fine red bull they had just bought. It had cost \$100, and the man said it was worth that much just for the pleasure its owner had already given them. Two days later I stopped at that same house and found the man of the place with a rifle walking toward the red bull, which was tied to a tree in the side yard.

"'I'm goin' to kill the blamed thing,' he told me between his clenched teeth. "'Kill the bull!'" I started. "I thought you just paid \$100 for it."

"'Yes,' he said, 'and I'm not doing this without due deliberation. Yesterday I dragged the bull over the fence and skinned up several trees by knocking me against them. So last night I thought it all over and I came away \$100 to me for the fun and satisfaction of killing the con-demed brute!'"

Dying Industry.

Save your Kashmir shawl. It may soon become as valuable as a fine old Turkish rug.

The use of imported European wool in India threatens the extinction of what remains of the shawl industry in that country, and it is impossible for it to regain its lost position. In fact, it is only a matter of time when the Kashmir shawl will be a curiosity.

Also the Indians, with the advance of civilization, seem to be losing the art of shawl making, just as the American Indians are forgetting how to weave baskets. Dealing with the wool of the wild animals, one notices how, with the arts and the trade which Kashmir had in olden days, the business and commercial qualities of the people of the country deteriorated. Kashmir shawl once and a shawl trade of \$1,000,000 a year.

Magnificent Gift to Charity.

Peter A. B. Widener of Philadelphia lost his son and grandson in the Titanic disaster. As a memorial to them he is adding \$4,000,000 to the first endowment of \$3,000,000 for the Widener Home for Crippled Children. Safely invested and economically administered, the income on this additional sum should offer support, care and surgical attention for more than 300 helpless child victims of accident or heredity, not for one year or ten years, but for all time, or so long as the world has any interest. That and so this gift is broad and wholesome humanity can hardly be questioned.

THE DAIRY

GOOD PLAN FOR DAIRY HOUSE

Demand Created by Recent Developments for Building Fulfilling Sanitary Requirements.

(By E. KELLY and E. E. PARKS.)

Recent developments in dairying have created a large demand for a dairy house which will fulfill sanitary requirements and at the same time be practical and inexpensive. For those who are striving to improve the quality of their products, such a building is an absolute necessity. Milk which is poured or strained in the barn, or allowed to stand there, is apt to be contaminated by germs and to absorb stinging odors. The best practice is to remove the milk to the dairy house as soon as each cow is milked. Milk should be cooled immediately, so the dairy house should be provided with proper facilities for this purpose.

Inexpensive, Sanitary Dairy House.

Contaminated by germs and to absorb stinging odors. The best practice is to remove the milk to the dairy house as soon as each cow is milked. Milk should be cooled immediately, so the dairy house should be provided with proper facilities for this purpose.

While the dairy house should be conveniently located so that the animals do not have a long walk from the barn, it must be so placed that it is free from contaminating surroundings. It should be built on a well-drained spot, and the drainage of the dairy house itself should be carried well away from the building. If possible the ground should slope from the dairy house toward the barn, rather than from the barn toward the dairy house.

The principal purpose in building a dairy house is to provide a place where dairy products may be handled apart from everything else. To carry out this object it is necessary to divide the interior of the building so that utensils will not have to be washed in the same room where the milk is cleaned up, and to carry off steam from the wash room. Windows are of prime importance, as they let in fresh air and sunlight, and facilitate work. In summer the doors and windows should be screened to keep out flies and other insects.

It is imperative that there should be a plentiful supply of cold running water at the dairy house. If it is not possible to have a regular water system, the supply may be piped from an elevated tank fed by a hydraulic ram engine, windmill or hand pump.

For the proper sterilization of utensils an abundance of steam or hot water is needed. A pall or can may be held to the eye and yet may carry numberless germs which will hasten the souring of the milk, cause bad flavor or butter or cheese, or spread contagion. After utensils are washed clean they should be either scalded with boiling water or steamed.

Rations for Dairy Cattle.

The following general facts should be observed in making up the ration for a dairy cow. A cow should be fed all that she will eat and digest well, giving due consideration to the cost, digestibility and composition of the food. The more palatable the food the greater quantity a cow will consume. Variety often increases palatability.

A part of the ration should be succulent in nature, as such food stimulates action in the intestinal tract, which stimulates vigor, thrift and health in the animal. Another important part of the ration is water. Too often this is not given proper consideration.

Silo and the Dairy.

The careful farmer who gives his personal attention to the making and feeding of silage and is not satisfied with the result is yet to be heard from. The silo seems to be edging mightily near the cornerstones of successful dairying.

Do the Best We Can.

The best cows are none too good when measured by the profit, but it is all of us cannot afford to go out and buy the best; hence we should try and do the best we can with those we have until we can secure better.

CARE OF MILK IN THE HOME

Frequently Contain Bacteria in Such Large Numbers It is Not Safe for the Children.

Milk delivered in the cities in the summer months frequently contains bacteria in such large numbers that it is not a safe food for children, especially for infants whose food consists entirely of milk. When it is impossible to obtain milk entirely free from suspicion, it is advisable to pasteurize the milk.

Pasteurization should be done in such a way that disease-producing bacteria as well as those likely to produce intestinal disturbances are destroyed without injuring the flavor or the nutritive value of the milk. This may be accomplished in the home by the use of a simple improvised outfit.

Milk is most conveniently pasteurized in the bottles in which it is delivered. To do this use a small pall with a perforated false bottom. An inverted pail with a few holes punched in it will answer for this purpose. This will raise the bottles from the bottom of the pall, thus allowing a free circulation of the water and preventing bumping of the bottles.

Punch a hole through the cap of one of the bottles and insert a thermometer, a good one with the stem etched on the glass should be used. Set the bottles of milk in the pall and fill the pall with water nearly to the level of the milk. Put the pall on the stove or over a gas flame and heat it until the thermometer in the milk shows not less than 145 degrees nor more than 160 degrees. The bottles should then be removed and allowed to stand from 20 to 30 minutes.

The punctured cap should be replaced with a new one or the bottle covered with an inverted cap. After

two indispensable supports. Of all the most common habits that lead to political profligacy, religion and morality are indispensable supports.—George Washington.

SKIN ERUPTION ON CHEEK

Kingsley, Mich.—"Last May my thirteen-month-old baby had a sore come on her cheek. It started in four or five small pimples, in two or three hours' time spread to the size of a silver dollar. It spread to her eye. Then water would run from the pimples, wherever that touched it caused more sores until nearly all one cheek and up her nostrils were one solid sore. She was very fretful. She certainly was a terrible-looking child, and nothing seemed to be of any use.

"Then I got some Cuticura Soap and Cuticura Ointment. She tried to rub off everything she put on so that we would sit and hold her hands for two hours at a time, trying to give the medicine a chance to help her, but it didn't work with Cuticura Soap and then put on the Cuticura Ointment they seemed to soothe her and she did not try to rub them off. It was only a few days before her face was all healed up, and there has been no return of the trouble since. We thought that baby's face would be scarred, but it is not." (Signed) Mrs. W. J. Cleland, Jan. 5, 1910.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 25-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston."

KEEP MILK COOL IN SUMMER

Where Ice Cannot Conveniently Be Used Piece of Flannel Cloth, Immersed in Water, is Good.

When ice or cold water cannot be obtained, or where a can of milk has to be left in a place where water and ice cannot be conveniently used, a wet flannel cloth—preferably a wrung-around the can is an aid in keeping milk cool.

One end of the cloth is best left extending from the bottom of the can, and immersed in a pail of water. A large amount of the sun rays falling into the can, and is thus prevented from reaching the milk. So long as the cloth is kept wet it is a protection, but soon as it becomes dry heat passes through it to the milk uninterrupted.

DAIRY NOTES

Keep your cream test about 30 per cent.

Good fences and good pasture are a fine combination.

Foamy butter is a sign that the cream was too sour.

The more the study, the greater the success in dairying.

Soaking the churn in brine occasionally will help keep it sweet.

The best milk flow cannot be maintained without a variety of feeds for the cow.

In 100 days of fresh green grass, don't fail to keep plenty of salt before the cows.

Individual excellence is the only safe guide to be depended upon in selecting cows for purchase.

To thoroughly clean milk utensils they first should be rinsed with cold water, to remove all particles of milk.

Fly time means milking after dark, having a darkened milking shed, the use of some fly repeller, or else a fight with the flies.

The best dairy appliances in the world are of little use to us if we do not learn how to use them to the best advantage.

Do not turn your cows on the lush grass long at a time; neither is it well to shut off their grain as soon as grass comes. Taper off slowly.

One advantage of succulent feed is the fact that it not only provides the cow with more moisture, but at the same time is more appetizing.

MORE HOSPITALS ARE NEEDED

Situation Improved, but Further Work is Needed to Stamp Out Tuberculosis.

Only four states, Mississippi, Nevada, Utah and Wyoming, have no beds whatever in special hospitals or wards for consumptives. Eight years ago when the National Association for the Study and Prevention of Tuberculosis was organized there were 20 states in which no hospital or sanatorium provision for consumptives existed, and the entire number of beds in the United States was only 10,000. While these figures would indicate a remarkable activity in anti-tuberculous activity," says Dr. Livingston Farrand, executive secretary of the National association, in commenting on the subject, there are still practically ten indigent consumptives for every one of the 30,000 beds, including those for paupers. In other words, we have from 250,000 to 300,000 consumptives in this country too poor to provide hospital care for themselves.

It is gratifying to note that the United States is in the United States, more hospital provision for these foes of infection must be provided."

Willing to Oblige.

A story comes from a town where firms advertise to sell fish direct to all purchasers. The glowing advertisements asked for the sending of half a dollar with a list of the varieties of fish preferred. One letter read:

"I want two salmon, a dozen whitefish, a dozen fresh herring, some flounders, and if you have them you can add a lobster."

The next day the lady received a letter which ran:

"Dear Madam: Please send another dime and we will forward the fisherman."—Dallas News.

Singing and the Lungs

It is well known that singing, like walking, is a fine exercise for the lungs, and some doctors advise those who fear consumption to go in for singing for this reason.

At the same time they, of course, do not advance the claim that singing alone will save anyone from or cure consumption. Accurate the habit of taking the big deep breath, which is a primary requisite of any kind of singing, bad or good, and the physical joy derived from it will never allow you to relax into lazy breathing.

Her Special Advantages

James Fullerton mentioned in his book, "The Land of Contrasts," tells of an American girl who was patronizingly praised by an Englishman for the purity of her English and who replied: "Well, I had special advantages, inasmuch as an English missionary was stationed near our mission."

DO YOU HAVE CHAM TO BELLY?

At the same time they, of course, do not advance the claim that singing alone will save anyone from or cure consumption. Accurate the habit of taking the big deep breath, which is a primary requisite of any kind of singing, bad or good, and the physical joy derived from it will never allow you to relax into lazy breathing.

Explanation.

Fair Young Thing—What is that man who is running down? Fan—He is going home to mother.

Important! It is that the blood, no job pure. Garfield Tea is big enough for the job.

Love may find the way, but it isn't always able to pay the freight.

A TIGER HUNT IN JAVA
By F. C. INGELSTON.

We left Kertajongkang West on the morning of May 29th, at 6 o'clock on the direction of O. W. McKinzie. The party consisted of 4 white men and 25 Coolies or bearers.
At 10:30 a. m. we struck the foothills, and from here on the going was most difficult, at 1:00 p. m. we left our ponies that were watched by three of the Coolies, and after partaking of a good lunch and also a good drink of good C. C. whiskey, we started on up the North side of the Dankon mountain. Our object was to reach the upper level, or plateau before night, but at about 4 o'clock we were overtaken by a rain and wind storm and were obliged to remain in the shelter of a friendly rock, however at 7 o'clock we pushed on again up, and ever up, and at 9 o'clock in a beautiful star and moonlight we were at the top. This plateau is some 18 miles long by 12 miles wide, covered by a dense growth of delecta and teak wood. Many beautiful streams come rushing down from the higher levels, and the pure water sparkles as it leaps and tumbles over the rocks. We made camp, and with guards posted (as you must not sleep without guards as we are now in the haunts of the grand Old Royal Bengal tiger, the black panther and many other savage beasts which the taste of human flesh and blood would be as sweet as an American mince-pie.) We were soon sleeping soundly as only a tired hunter can.

It is cool and the blanket was not at all uncomfortable to me. It might have been 2 a. m. when I was awakened by McKinzie, (who by the way is an native of this island) shaking me gently by the shoulder, and laying his finger on my lips least in the moment of awaking I should speak, upon sitting up I was amazed to see the natives sitting around in a circle with their spears in hand, and Mc with his 506 laying on his knees. I asked no questions, but got the 45 Winchester, with which I was equipped, and also looked scared I think. Not a sound broke the stillness of that mighty forest, only the sound of the brook some 200 feet away. I think I would have welcomed any danger that I could have seen in preference to this awful silence. This lasted for perhaps two minutes, but it seemed more than an hour to me, I saw the heavy rifle of McKinzie slowly raising to his shoulder, and as I looked in the direction indicated by his aim, I could make out what looked to me like a rock or dog, an instant of this and then a flash and the mountain echoed with the report of the rifle, and McKinzie's voice saying "Missed by Dunder" and the sound of a heavy body going bounding down the hill side, all was in confusion, and upon seeing Mc what it was about, he said "Gott for Duma, I would give my pipe for another shot at him." The him I learned had been a huge tiger prowling around and the natives had awakened Mc, the fire had gone down until only a few coals glowed, and after these had died out, had he not been discovered Mc said the tiger would have got one of the men that were sleeping on the ground. After this we heard him roar at intervals during the balance of the night, and answered from three different directions, but is it necessary for me to say no sleep came to my eyes that night.

At day light we started for a swamp and upon arriving there Mc put me in a tree and told me to watch the edge of the jungle when the noise of the beaters was heard, which soon started upon the opposite side. The four of us were in trees at intervals of perhaps 400 yards in a line parallel with the jungle. The Coolies had circled this patch of bamboo and grass, and were coming from the opposite side beating upon drums and pans and making a fearful noise, no wonder the poor beasts are scared, I was myself.

It may have been 5 minutes and I had begun to think there was nothing doing, when I heard the rifle of Knuts bark at the end of the line and then saw the most beautiful sight I had ever seen two full grown tigers. Mc and Westameck had both opened fire, but I was at too long a range. I saw one go down and the other sneak back upon the beaters and a cry of pain from them told us that he had gone through the line perhaps at the cost of a man's life. However only one had been hit,

and he only received a broken leg and torn hip. The sorrow for his hurt is soon forgotten when we pull the one that has been shot out and look at him, 1 foot and 5 1/2 inches from tip to tip, and must weigh not less than 700 lbs. Some of you might see the feeling of planting your foot upon a deer you have killed, but had it have been me or my luck to have killed that beast, my head would have swelled until it burst.

To skin the tiger, make a stretcher for the wounded lion, and then a quick march down to our horses, for we must reach the plantation before dark. But Oh! for a month here at this sport, and I will have it next year, if I live. We reach the factory at 6 p. m. tired but full of good cheer and C. C. W., and I have seen my first real tiger hunt, but not my last.

MEADOW LAWN

A dance was given last Saturday evening at the Dile farm in honor of Gertrude Holter.
Daniel Seuffer and Miss Jennie Butler took supper with Miss Hattie Lyseth last Sunday evening.
Mrs. Ole Lyseth has been assisting Mrs. Elford, of Huatleton, with her housework for the past week.
Miss Mattie Lahart, who has been visiting with relatives and friends in the southern part of the state, is expected home this week.
Mrs. M. T. Lahart had the misfortune to slip and strain her ankle, while at work in the kitchen Wednesday afternoon. We all hope for her speedy recovery.

Pine City did celebrate, so did Meadow Lawn, and that in grand style. Had it not been for the rain it would have been much nicer, but everyone enjoyed themselves nevertheless. The fireworks were very nice and something quite new for Meadow Lawn.

THE "HONOR ROLL"

The following list will be added to each week as the subscriptions come in.
We the undersigned agree to take the amount of stock set opposite our names in the Pine County Agricultural Society, the money so subscribed to be used in building an exhibition building at the Fair Grounds.

- Said stock to be paid for as follows: 10 percent on demand, 10 percent February 1st, 1912, 10 percent March 1st, 1912, 10 percent April 1st, 1912, 10 percent May 1st, 1912, 10 percent June 1st, 1912, and the balance July 1st 1912.
