## The Junior College

What is the Junior College? It is an advanced high school. That is in connection with the regular high school course, a two year advanced course is given which enables the student to procure enough credits to admit him to the first year of any college or university. This Junior College offers the regular academic course consisting of college mathematics, science, English, history and languages.

Is this not a money-saving institution? Indeed it is, and to the average student it means greater and better opportunities than have ever been offered heretofore. The advantages of the Junior College are numerous. First of all the student would have more efficient teachers than he would have in high school. All instructors must have a M. A. degree. The student will also receive more personal care and attention in the Junior College than he would at a larger institution. This stands to reason. In the large colleges there are so many students that it is utterly impossible for the teachers to give them all the attention they require. The first two years of college life are hard for the average student and he needs all the help a teacher can afford to give him. In the universities many of the juniors and seniors, especially, take charge of the freshmen and sophomore classes. This, in itself, is perfectly all right, as they become efficient in instructing through the practice institution; but many a first classman is devoid of needed attention which can only be given him by an efficient instructor.

Second, it gives the boy and girl a better opportunity of procuring an education. Many boys and girls are barred from college because they cannot procure sufficient funds to carry them through college. If this Junior College is adopted in addition and connection with the high school, the student can readily pass from the high school to the Junior college with no increase in expense. He will be enabled to have no board or room expenses exceeding those of his high school course. He will have none or very few of those college expenses which he would have if he were away from home. One can readily see that this means money saved for the student and "money saved is money earned."

Why not have a Junior College at Pine City? It would increase the expenses very little above the present expenditures. You are saving money by sending your son or daughter to a Junior College in your own home town. Money saved for you is opportunity gained for them. In this great educational betterment they will receive far better attention at such a college than at a large one. They have then built their college foundation and are prepared to enter the third year of any college or university.

The Junior College is becoming more popular in the state of Minnesota every day. It has proved successful wherever it has been adopted. Because of its numerous advantages and opportunities we should have a Junior College in Pine City.

—The Pinnacle

## Baccalaureate Sermon

The Baccalaureate Sermon was delivered by Rev. Thomas James Buckton, at the Presbyterian Church on Sunday evening, May 28. Following is a synopsis of the sermon.

The minister took for his text: "Who shall ascend into the hill of the Lord?" from Psalm 24:3.

The two words he picked out for discussion were, ASCEND and HILL. The object of the address was to speak about the nature of the life they live, about the character of the journey in which they are engaged. Life's journey is not along a level pathway, but like the ascent of a hill. For some of us the hill may be very steep and rugged, for others it may be easy.

Whatever the case, we will all have our trial of ascending to a better and higher level.

The Bible view is strikingly and eternally true: "We are all of us living on a slope." We must either climb or descend. We must either climb—as the price of strain and struggle and panting breath—up to God, heaven and nobility of life. These things, and they only, are all "on high." We can attain these heights by taking the "steep and narrow way," the only road to

eternal success. If we take the other path we shall slip almost insensibly down into the pit of baseness, failure and contempt. Life is like an inclined plane, a hillside. If we wish to get up we will have to ascend. This will mean greater effort on our part. We must supply the courage, the energy, and all that is necessary to drive the engine of life.

The speaker went on to show that if we take this view of life, the following results would ensue. First would beget, as Mr. J. A. Hutton puts it, "That Wholesome sense of danger and insecurity which is a great part of human wisdom and piety." We have to be careful how we walk; there is always the dreadful danger of slipping on the slope. We must be shod with the equipment of life; then our footing will be secure and we are prepared to climb to greater and higher ideas and ideals of life. Second, if we learn the lesson that we are living on a slope, it is impossible for us to stand still. Unless we get on in life and upward we must get out of existence, if we don't keep climbing is morally certain that we will slip back. Another lesson brought out was that there is no growth in sloppiness without struggle and strain.

Jesus said, "Strive to enter in at the straight gate." "Strive"—but that word is stronger in the original than we mean. "Agonize to enter in at the straight gate." With this idea in view we should be able to ascend the hill of life.

The whole address was an attempt to turn our faces toward the summit, to breast the hill, to start climbing. By starting the right way we will come face to face with the hill, unarmourable it may seem. We must attempt to breast climb and each step we take gives us a firmer and stronger foothold on that slope which leads to higher and better things.

—The Pinnacle

**CATHOLIC CHURCH NEWS**  
Father Leo, pastor

Services at Pine City next Sunday morning at 9 o'clock. Sunday school after the services.

Services at Beroun next Sunday morning at 10:30.

**METHODIST CHURCH NEWS**  
James A. Orrock, pastor

Our service will be held in union with the Presbyterian service next Sunday morning. Plan to convening service as usual at 8:00 in this church.

**PRESBYTERIAN CHURCH NEWS**  
T. J. Buckton, pastor

There will be a union service next Sunday morning in this church. No evening service, but all are urged to attend the evening service in the Methodist church. During the month of June Rev. Buckton has promised to assist in the community welfare by carrying on services in both the Methodist and Presbyterian churches while Rev. Orrock attends the rural pastor's short course of study at Hamline U.

Watch this page and this space, we are not going to be guilty of the sin of tameness if we know it in the month of June we are planning a morning service at the lake.

sides followed by a picnic dinner. Some have been guilty of going off separately on Sunday to the lake, and the woods. We think it better if we all go together. Have a big family picnic under the trees, have a service of song and a short sermon, and you can spend the afternoon as you will. We shall be better off for worshipping in the open. So remember June 11th.

## Theatre Notes

Friday and Saturday—Hoot Gibson in "Beareat". The Bearcat, alias the Singing Kid, breezed into Three Pines singing songs of bloody murder. Anyone would have thought he was but from the wicked way he slung verse around. Also a comedy "Toby's Goat."

Sunday and Monday—Johnny Hines and J. Brany Sherry in "Barn, Ten Up Breeze." Barn Ed Up Breeze, burned on my nose too often—and he awakened to find himself a hobo. From a tramp—in less than a day! He was down—not out! He came back and, oddly enough, the thing responsible for his downfall—became his salvation.

A romantic comedy, rich with honest laughs and thrilling action, enacted for the screen by a splendid supporting cast which includes Edmund Brees, George Fawcett, Betty Carpenter, J. Barney Sherry, and others.

Also a two reel Western picture Art Aford in "Matching Wits." Tuesday—Bill Hopkins recognized his old home place from an airplane and off he jumped—but with a parachute, of course. That is one of the things Hoot Gibson does in Universal's "Headin' West." Also G. Walsh in "With Stanley in Africa" Thursday—

Richard Barthelmess in "Tollable David." Stands with the screen's finest! Joseph Hergesheimer wrote the story for the Saturday Evening Post. But you ought to see what Barthelmess has made of the boy who wanted to be a man, but was just "tolable in his mountain mother's eyes. Also a comedy "Dog God Kids."

The Ocean... "The man who is a good really to use an opportunity is great." "You are the man who can seize that opportunity and make out of it an opportunity to prosper."

## The Elwell Cabinet

Will keep the cook in good nature and the kitchen in good order. More shelf room for the storage of groceries than any other cabinet.

Your flour bin right where you want it. No other made that is its equal. Holds 100 pounds of flour—more than twice the capacity of other makes. Metal lining can be taken out to air and clean.

A large adjustable work table—finest porcelain made. Removable metal bread and cake box—very convenient.

The Best Equipment of labor-saving arrangements you have seen.

Let us show you this Cabinet.

**ANTI-MUD-SPLASHING DEVICE IS NEW INVENTION FOR AUTOMOBILES**

The anti-mud-splashing device invented by W. G. Smith of How, England, was tested recently and the experiments proved an entire success. The automobile passing along a muddy road without splashing a white sheet placed in the rear of the car is swiftly driven by. The photograph shows Mr. Smith explaining his invention to auto boys.

**AVOID MUCH TRAFFIC ON AUTOMOBILE TRIP**  
Census Shows Tuesday or Wednesday as Best Days.

Highways in United States—Start Early in Morning.

If you are going on an automobile trip and want to avoid all possible traffic you should go on Tuesday or Wednesday. Such is the conclusion reached from a study of a traffic census taken recently by the bureau of public roads, United States Department of Agriculture, on one of the most traveled roads in the United States. If you want to go at an hour when there will be the least traffic, start between 2 and 3 o'clock in the morning.

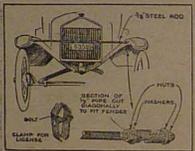

Traffic increases in amount steadily from Wednesday to Saturday, the census shows, and then jumps into big volume on Sunday. The volume on Sunday is about twice that on Tuesday or Wednesday. On Monday there is a decided drop from the Sunday figures and on Tuesday the lowest ebb is reached.

There is less traffic on the road between 2 and 3 o'clock in the morning than at any other time of day. From 5 o'clock to 6 there is a slight increase; then a steady climb until 11. Between 11 o'clock and 4 there is a slight drop, and then an increase again until the peak is reached between 2 and 3. After 3 o'clock traffic drops slightly until 7 when the decrease becomes more pronounced. By midnight traffic has almost reached its lowest point.

Ninety per cent of the day's traffic, the census shows, rolls over the road between 7 a. m. and 9 p. m., and 82 per cent between 1 p. m. and 8 p. m.

**BRACE HOLDS FENDERS RIGID**  
Device Illustrated Will Help Material to Reduce Objectionable Rattling.

A great deal of the noise set up by light automobiles is the result of rattling fenders, which, even at moderate speed, make a noise so much exceeding weight. The drawing shows a fender brace that not only holds the fenders rigid but forms a convenient support

Braces for Front and Rear Fenders of Light Automobiles Help to Reduce the Objectionable Noise of Rattling Sheet Iron.

for the license plate. A piece of three-eighths-inch steel rod is threaded, for several inches, on each end and attached, through holes cut in the fenders, by means of nuts, washers, and pipe wedges, which are screwed up tight against both sides of the fenders, as shown in the drawing. Similar braces may be fitted to the rear fenders. Small metal clips formed from one-eighth or three-sixteenths-inch sheet metal and held together with stove bolts, are used for clamping the license plate to the brace.—Popular Mechanics Magazine.

Swat 'Em.  
"Road hogs" in motor vehicles and "jay walkers" on highways are the two worst enemies of automobilizing.

**BEROUN NEWS DEPART.**

Dr. Geddy of Peimont is spending a few days at his farm. Wm. Mista and family spent Sunday at the Kuzel home.

**Service Rendered by Co-operation**

ONE of the most perfect forms of industrial service is that which results from co-operation between manufacturer and consumer.

Recognizing this, the Standard Oil Company (Indiana) has developed a service bureau headed by lubricating engineers of wide experience whose business it is to co-operate with designers, manufacturers and users of all types of machinery that they may get a maximum of correct lubrication at a minimum of cost.

In developing this service the Standard Oil Company (Indiana) had a two-fold motive—the first that Standard Oil products shall render the most of service and second that the user shall get full value for the money he spends.

As a result of this service the customer finds it unnecessary to carry on costly experiments. The lubricating specialists of the Standard Oil Company (Indiana) will, upon request, study his problems and tell him the exact oils and greases needed to insure correct lubrication of his machinery.

This highly specialized service is rendered without cost. It is one of the underlying principles of this Company that the customer must be given the benefit of our wide experience, that his lubricating costs per year may be as low as possible.

In the individual plants, large and small, which the lubricating engineers of the Standard Oil Company (Indiana) have served, this principle is well recognized.

Plenty of oil does not necessarily mean good lubrication. Correct lubrication consists in applying the right oil in the right place in the right way.

To enable its patrons to achieve correct lubrication is the business of the lubricating engineers of the Standard Oil Company (Indiana).

This lubrication service is but one of the many specialized ways in which the Standard Oil Company (Indiana) serves industry and hence serves society.

You can't fool the youngsters. They can always tell the difference between **KELLOGG'S** and imitations.

**Kellogg's Corn Flakes**  
snap up fussy appetites something wonderful!

No coaxing needed to tempt family folks and visitor folks to eat a plenty—not when there's a big pitcher of milk or cream and lots of Kellogg's Corn Flakes—and, maybe some fruit—ready to tickle fickle palates!

Kellogg's are unlike any corn flakes you ever ate! They're the original kind—they ought to be best! No other corn flakes are so delicately flavored; no other corn flakes retain such wonder-crispness till eaten! And Kellogg's are never leathery or tough or hard to eat!

Kellogg's are always a delight to serve—and a treat to eat at any meal! In fact, you'll never know how good corn flakes can be until you know **KELLOGG'S!**

Do more than eat for corn flakes—eat **KELLOGG'S CORN FLAKES!** The kind in the RED and GREEN package!

**Kellogg's CORN FLAKES**

Also makers of **KELLOGG'S KRUMBLES** and **KELLOGG'S BRAN**, toasted and branched.

**For Ten Dollars and Ninety Cents—This 30 x 3 1/2 Usco**

**THE 30 x 3 1/2 tire situation today is just this—**  
The man who buys an USCO at \$10.90 is justified in believing that his money is going farther in tire value than it ever has gone or could go before.

Naturally he appreciates the quality of USCO. That was established long ago.

It is still fresh in his mind that USCO led the national market into the \$10.90 price range.

The makers of U. S. Tires always intended the 30 x 3 1/2 USCO to be the highest value in its field.

At \$10.90 it creates a new classification of money's worth.

# COFFEE SALE!

## Friday and Saturday, June 2-3

Buy your needs at our special offering, when our wonderful value Quality Coffees are further reduced.

Soon prices will be much higher.

### Now Is The Time to Buy!

Four Tenths of One Cent a Cup

---The Difference Between the Finest and Cheap Coffee.

The thrifty housewife figures it out and says "I cannot afford to buy cheap Coffee."

To every pound of coffee brewed the cost is:

For Cheap Coffee		For Good Coffee	
Coffee	.30	Coffee	.50
Cream	.90	Cream	.90
Sugar	.10	Sugar	.10
<b>Total</b>	<b>\$1.30</b>	<b>Total</b>	<b>\$1.00</b>

(Cream Price based on 12c per 1-2 pint and 1 1/2 pints to the gallon)  
(Sugar Price based on 6 1/2c per pound and 10 ozs. to the gallon)

Based on 50 Cups of Rich Coffee to the Pound we have:

---Cheap Coffee		---Finest Coffee		---Difference	
Cost per cup	2.6 tenths	Cost per cup	3c	Cost per cup	4 tenths of 1c

**STUDY THE ABOVE:**

It shows coffee cost is largely cream and sugar, two-thirds or more, and it costs as much for poor coffee as for good coffee. It shows 4-10c per cup is all the difference between good and cheap coffee. It shows 20c additional cost for coffee will change the spoiling of \$1.30 to complete satisfying success.

Ask Yourself, Does Cheap Coffee Pay? No!

For Package Buyers

## FLORENCE OIL COOK STOVES

Meals on Time

The Florence cooks, bakes and roasts evenly and thoroughly. No ashes, no smoke, no troublesome dampers.

Let us show you what an intensely hot, blue flame its powerful burners give. Handy levers control the heat perfectly. Kerosene supply is always in sight in the glass bull's-eye of the tank.

The baker's arch of the Florence Portable Oven assures even baking, tempting pastries, and well-browned roasts.
